The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9.

The EPA would like to solicit comments to:

(i) evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) enhance the quality, utility, and clarity of the information to be collected; and

(iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Under the Acid Rain Program regulations (40 CFR 72.7), utilities may petition EPA for an exemption from permitting and monitoring requirements for any new utility unit that serves one or more generators with total nameplate capacity of 25 MW or less and burns only fuels with a sulfur content of 0.05 percent or less by weight. On the earlier of the date a unit exempted under 40 CFR 72.7 burns any fuel with a sulfur content in excess of 0.05 percent by weight or 24 months prior to the date the exempted unit first serves one or more generators with total nameplate capacity in excess of 25 MW, the unit shall no longer be exempted under 40 CFR 72.7 and shall be subject to all permitting and monitoring requirements of the Acid Rain Program.

EPA is issuing written exemptions to the following new units, effective from January 1, 1996 through December 31, 2000:

Wamego units 1920-3, 1920-4, and 1920-5 in Kansas, operated by the City of Wamego. The designated representative for Wamego is Larry Fechter.

Malden units 2, 3, and 4 in Missouri, operated by the City of Malden. The designated representative for Malden is Gary Youngquist.

Vandalia units 4 and 5 in Missouri, operated by the City of Vandalia. The designated representative for Vandalia is Todd Hileman.

Additionally under the Acid Rain Program regulations (40 CFR 72.8), utilities may petition EPA for an exemption from Phase II permitting requirements for units that are retired prior to the issuance of a Phase II Acid Rain permit. Units that are retired prior to the deadline for continuous emissions monitoring system (CEMS) certification may also petition for an exemption from monitoring requirements.

While the exempt retired units have been allocated allowances under 40 CFR part 73, units exempted under 40 CFR 72.8 must not emit any sulfur dioxide or nitrogen oxides on or after the date the units are exempted, and the units must not resume operation unless the designated representative submits an application for an Acid Rain permit and installs and certifies its monitors by the applicable deadlines.

EPA is issuing written exemptions from Phase II permitting requirements and monitoring requirements, effective from January 1, 1996, through December 31, 2000, to the following retired units:

Waterside units 51 and 52 in New York, operated by Consolidated Edison. The designated representative for Waterside is M. Peter Lanahan, Jr.

Victoria unit 5 in Texas, operated by Central and Southwest Services, Inc. The designated representative for Victoria is E. Michael Williams.
