

lions. This 1996 EA is a supplement to, and augments, an EA prepared in 1995 that examined non-lethal alternatives to lethal removal. The EA also provides additional information and results of actions taken to protect and enhance the winter steelhead population in 1995.

NMFS has evaluated the environmental consequences of the proposed action and has concluded that it is unlikely to result in any significant impacts on the human environment and therefore has made a finding of no significant impact (FONSI). The EA and FONSI have been prepared in accordance with NEPA and implementing regulations at 40 CFR parts 1500 through 1508 and NOAA guidelines concerning implementation of NEPA found in the NOAA Administrative Order 216-6.

Additional information on steelhead enhancement and management measures being taken by the State of Washington, or a copy of the EA and FONSI is available upon request (see ADDRESSES).
