#### Oregon: Supplementary Rules for Management of the New River Area of Critical Environmental Concern (ACEC) Management Plan

**AGENCY:** Coos Bay District Office, Bureau of Land Management, Interior.

**ACTION:** Coos Bay District is implementing restrictions, closures and prohibited acts as described in of the New River ACEC Management Plan which was approved on April 4, 1995.

**SUMMARY:** This notice supplements the established order, Federal Register, volume 48, No. 127, Thursday, June 30, 1983, which generally identifies New River ACEC. Pursuant to the authority of Federal Land Policy and Management Act of October 21, 1976 (Section 202(C)(3)) and 43 CFR 1601.6-7, only BLM administered public land within the following areas are designated as the New River ACEC. Supplementary rules are required to carry out the intent of the Management Plan, which incorporated public review and consideration of public comment prior to being approved. The Authority for implementing supplementary rules is 43 CFR 8365.1-6. These supplementary rules are the minimum necessary to implement the plan as published, and apply only to those BLM administered lands designated as the New River ACEC.

The New River ACEC is located five (5) miles south of Bandon, Oregon, on the southern Oregon Coast fronting the Pacific Ocean and east of New River, a partial estuarine stream. The ACEC encompasses 1168 acres of BLM administered public land. Management intent under the New River ACEC Management Plan and the Resource Management Plan (RMP) is protection of important plants, wildlife, natural and cultural values while providing for other compatible land uses.

The ACEC designation provides protection to the Federally endangered western lily and Federal Candidate species silver phacelia, as well as other plant species whose habitat is strictly limited to coastal sand dunes. The area also provides habitat for Federally Threatened avian species the Western Snowy Plover, Peregrine Falcon, Bald Eagle, Aluetian Canada Goose as well as the Federally Endangered brown pelican. A unique isolated beach-marsh-estuarine environment is found throughout the area. The sand dunes rest on a layer of peat which is not found in other dunes along the Oregon coast.

The New River ACEC Management Plan identifies restrictions, closures and prohibited acts necessary to manage recreational use and to protect on site resource values. These restrictions, closures and prohibited acts cover all current BLM administered New River ACEC lands and any future ACEC acquisitions.
