

Conservation Regulation (UACR) R307-1-3.5.4., was submitted by the State to satisfy the Clean Air Act (CAA), as amended in 1990, requirements for an emission statement program to be part of the SIP for Utah. EPA's approval will serve to make the emission statement inventory regulation federally enforceable. In addition, EPA is proposing to approve other minor changes involving definitions in UACR R307-1-1. and the ozone nonattainment area designation definition in UACR R307-1-3.3.3.

In the Rules Section of this Federal Register, EPA is approving the State's SIP revision as a direct final rule without prior proposal because the Agency views this as a noncontroversial revision and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this proposed rule, no further activity is contemplated in relation to this rule. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time.

DATES: Comments on this proposed rule must be received in writing by June 5, 1996.

If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule.
