**[OPP-181010; FRL 5366-6]**

**Carbofuran; Receipt of Application for Emergency Exemption, Solicitation of Public Comment**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** EPA has received specific exemption requests from the California Environmental Protection Agency, Department of Pesticide Regulation, and from the Mississippi Department of Agriculture (hereafter referred to as the "Applicants") to use the pesticide flowable Carbofuran (Furadan 4F Insecticide/Nematicide) (EPA Reg. No. 279-2876) to treat up to 300,000 acres of cotton in California, and up to 1 million acres of cotton in Mississippi, to control cotton aphids. The Applicants propose the use of a chemical which has been the subject of a Special Review within EPA's Office of Pesticide Programs, and the proposed use could pose a risk similar the risk assessed by EPA under the Special Review of granular carbofuran. Therefore, in accordance with 40 CFR 166.24, EPA is soliciting public comment before making the decision whether or not to grant the exemption.

**DATES:** Comments must be received on or before May 23, 1996.

**ADDRESSES:** Three copies of written comments, bearing the identification notation "OPP-181010," should be submitted by mail to: Public Response and Program Resource Branch, Field Operations Division (7506C), Office of

Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: Rm. 1132, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Comments and data may also be submitted electronically by sending electronic mail (e-mail) to: opp-docket@epamail.epa.gov. Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect in 5.1 file format or ASCII file format. All comments and data in electronic form must be identified by the docket number [OPP-181010]. No Confidential Business Information (CBI) should be submitted through e-mail. Electronic comments on this notice may be filed online at many Federal Depository Libraries. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be provided by the submitter for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments filed pursuant to this notice will be available for public inspection in Rm. 1132, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA, from 8 a.m. to 4:30 p.m., Monday through Friday, except legal holidays. **FOR FURTHER INFORMATION CONTACT:** By mail: David Deegan, Registration Division (7505W), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Floor 6, Crystal Station #1, 2800 Jefferson Davis Highway, Arlington, VA, (703) 308-8327; e-mail: deegan.dave@epamail.epa.gov.

**SUPPLEMENTARY INFORMATION:** Pursuant to section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), the Administrator may, at her discretion, exempt a state agency from any registration provision of FIFRA if she determines that emergency conditions exist which require such exemption. The Applicant has requested the Administrator to issue a specific exemption for the use of carbofuran on cotton to control aphids.

Information in accordance with 40 CFR part 166 was submitted as part of

this request. As part of these requests, the Applicants assert that the states of California and Mississippi are likely to experience non-routine infestations of aphids during the 1996 cotton growing season. The applicants further claim that, without specific exemptions of FIFRA for the use of flowable carbofuran on cotton to control cotton aphids, cotton growers in much of these states will suffer significant economic losses. The applicants also detail use programs designed to minimize risks to pesticide handlers and applicators, non-target organisms (both Federally-listed endangered species, and non-listed species), and to reduce the possibility of drift and runoff.

The applicants propose to make no more than two applications at the rate of 0.25 lb. active ingredient [(a.i.)] (8 fluid oz.) in a minimum of 2 gallons of finished spray per acre by air, or 10 gallons of finished spray per acre by ground application. The total maximum proposed use during the 1996 growing season (California proposes a use season of July 20, 1996 until October 15, 1996; Mississippi proposes a use season from the date of EPA issuance until September 15, 1996) would be 0.5 lb. a.i. (16 fluid oz.) per acre. The applicants propose that the maximum acreage which could be treated under the requested exemptions would be 300,000 acres (California) and 1 million acres (Mississippi). If all acres were treated at the maximum proposed rates, then 150,000 lbs. a.i. would be used in California, and 500,000 lbs. a.i. would be used in Mississippi.

This notice does not constitute a decision by EPA on the application itself. The regulations governing section 18 require publication of a notice of receipt of an application for a specific exemption proposing use of a chemical (i.e., an active ingredient) which has been the subject of a Special Review within EPA's Office of Pesticide Programs, and the proposed use could pose a risk similar the risk assessed by EPA under the previous Special Review. Such notice provides for opportunity for public comment on the application.

A record has been established for this notice under docket number [OPP-181010] (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI is available for inspection from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays.
