

nuclear fuel to a geologic repository or centralized interim storage site. At a repository, the naval spent fuel would be unloaded from the casks and placed in a geologic repository's surface facilities for loading into disposal containers. The unloaded transportable storage casks could be returned to INEL for further storage and transport.

(5) *Dual-Purpose Canister*

Alternative—Use of an existing, commercially available canister and overpack system for storage at INEL and shipment of naval spent nuclear fuel to a geologic repository or centralized interim storage site. At a repository, the naval spent fuel would be unloaded from the canisters and placed in a geologic repository's surface facilities for loading into disposal containers.

(6) *Small Multi-Purpose Canister*

Alternative—Use of smaller multi-purpose canisters, such as those currently being designed under a DOE contract, rather than large multi-purpose canisters. The small multi-purpose canisters would be similar in design, operations, and function to the large multi-purpose canisters, but would offer a lower weight and size alternative for transportation and handling at a geologic repository or centralized interim storage site.

In addition, the environmental evaluations in this draft EIS include several actions which are related to the container system choice: manufacturing the container system; handling and transportation associated with the container system; modifications at INEL to support loading naval spent nuclear fuel into containers for dry storage; the location of the dry storage at INEL; and the storage, handling, and transportation of certain radioactive waste (called "special case waste") associated with naval spent nuclear fuel management.

The draft EIS does not contain a preferred alternative. Instead, the Navy will identify a preferred alternative in the Final EIS, and select an alternative in the Record of Decision, taking into consideration the following factors: (1) Public comments; (2) protection of human health and the environment; (3) cost; (4) technical feasibility; (5) operational efficiency; (6) regulatory impacts; and (7) storage or disposal criteria which may be established for a repository or centralized interim storage site outside the State of Idaho.

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Director of the Information Resources Group publishes this notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Recordkeeping burden. Type of Review: New.
Title: Quick Response Information System (QRIS).
Frequency: One-time.
Affected Public: Not-for-profit institutions; State, local or Tribal Gov't, SEAs and LEAs.

Reporting and Recordkeeping Hour Burden:

Responses: 4,308.

Burden Hours: 3,228.

Abstract: This is a request for system clearance for the QRIS survey system which consists of the Fast Response Survey System (FRSS) and, as of Fall 96, the Postsecondary Education Quick Information System (PEQIS). FRSS primarily conducts surveys of the elementary/secondary sector and public libraries while PEQIS focuses on the postsecondary education sector. The FRSS and PEQIS were established (in 1975 and 1991 respectively) to meet quick turnaround data requests of the Department of Education and others with requirements for education data that are not available elsewhere and are needed to formulate policy; to make legislative, budgetary, and planning decisions for existing programs; and to develop new programs. The surveys are characterized by short survey forms with short response time and typical sample sizes of around 1,000. It is anticipated that about five surveys will be conducted under QRIS per year.
