### NUCLEAR REGULATORY COMMISSION

[Docket Number 40-6622]

#### Pathfinder Mines Corp.; Amendment of Source Material License

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Amendment of Source Material License SUA-442 to include reclamation milestone dates.

**SUMMARY:** Notice is hereby given that the U.S. Nuclear Regulatory Commission has amended Pathfinder Mines Corporation's (PMC's) Source Material License SUA-442 to include reclamation milestone dates. This amendment was requested by PMC by its letter dated March 26, 1996, and the receipt of the request by NRC was noticed in the Federal Register on April 5, 1996.

The license amendment adds License Condition 50 to include completion dates for various site-reclamation milestones. The schedule proposed by PMC and accepted by the NRC staff is as follows:

(1) Windblown tailings retrieval and placement on the tailings pile, December 31, 1997.

(2) Placement of an interim cover over tailings, December 31, 1997.

(3) Placement of final radon barrier, December 31, 1999.

(4) Placement of erosion protection, December 31, 2000.

(5) Completion of groundwater corrective actions, December 31, 2005.

An environmental assessment is not required since this action is categorically excluded under 10 CFR 51.22(c)(11), and an environmental report from the licensee is not required by 10 CFR 51.60(b)(2).

**SUPPLEMENTARY INFORMATION:** PMC's amended license, and the NRC staff's technical evaluation of the amendment request are being made available for public inspection at the Commission's Public Document Room at 2120 L Street NW (Lower Level), Washington, DC 20555.

**FOR FURTHER INFORMATION CONTACT:** Mohammad W. Haque, Uranium Recovery Branch, Division of Waste Management, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Telephone (301) 415-6640.

Dated at Rockville, Maryland, this 10th day of May 1996.

[Docket No. 50-146 (License No. DPR-4)]

#### Saxton Nuclear Experimental Corporation (Saxton Nuclear Experimental Facility); Order Approving Transfer

I

On November 15, 1961, pursuant to 10 CFR Part 50, Provisional Operating License No. DPR-4 was issued to Saxton Nuclear Experimental Corporation (SNEC) for the Saxton Nuclear Experimental Facility (SNEF) located in Saxton, Bedford County, Pennsylvania. On February 29, 1964, the provisional operating license was replaced with a full-term operating license. On February 11, 1967, an order was issued that extended the expiration date of the license from April 13, 1967, to December 31, 1968. On December 27, 1968, Amendment No. 4 was issued to Operating License No. DPR-4 which

extended the expiration date of the license to December 31, 1972. On August 15, 1972, Amendment No. 8 was issued to Amended Facility License No. DPR-4 that changed the license status to possession-only. On January 10, 1974, Amendment No. 9 was issued to Amended Facility License No. DPR-4 which extended the expiration date of the license to February 11, 2000.

## II

By letter dated November 21, 1995, as supplemented on March 13, 1996, pursuant to 10 CFR 50.80 and 50.90, SNEC submitted a request for consent to transfer control of the license and approval of amendments to the SNEF Amended Facility License No. DPR-4 and Technical Specifications appended thereto that would add GPU Nuclear Corporation (GPU Nuclear) as a possession-only licensee for the SNEF and would transfer from SNEC to GPU Nuclear all management-related responsibilities for the SNEF. SNEC's responsibilities as a licensee would not otherwise be affected. The NRC published a "Notice of Consideration of Issuance of Amendment to Facility License and Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing" in the Federal Register on January 31, 1996 (61 FR 3502), and published a "Notice of Transfer of Control of License" in the Federal Register on March 19, 1996 (61 FR 11231).

The transfer of control of Amended Facility License No. DPR-4 is subject to the NRC's approval under 10 CFR 50.80. On the basis of information provided by SNEC in the letters of November 21, 1995, and March 13, 1996, and other information before the Commission, the NRC staff has concluded that GPU Nuclear is qualified to be a joint holder of Amended Facility License No. DPR-4 to the extent and for the purposes described above and that the proposed transfer, subject to the conditions set forth herein, is otherwise consistent with the applicable provisions of law, regulations, and orders issued by the Commission. This proposed action was evaluated by the staff as documented in a Safety Evaluation, dated May 10, 1996.

## III

By June 10, 1996, any person adversely affected by this order may file a request for a hearing with respect to issuance of the Order. Any person requesting a hearing shall set forth with particularity how such person's interest is adversely affected by this Order and shall address the criteria set forth in 10 CFR 2.714(d).

If a hearing is to be held, the Commission will issue an Order designating the time and place of such hearing.

If a hearing is held concerning this Order, the issue to be considered at any such hearing will be whether this Order should be sustained.

Any request for a hearing must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date. Copies should also be sent to the Office of the General Counsel and to the Director, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, and to Ernest L. Blake, Jr., Esquire; Shaw, Pittman, Potts, and Trowbridge; 2300 N Street NW., Washington, DC 20037.

## IV

Accordingly, pursuant to sections 161b, 161i, and 184 of the Atomic Energy Act of 1954, as amended, 42 U.S.C. 2201(b), 2201(i), and 2234, and 10 CFR 50.80, it is hereby ordered that the Commission consents to the proposed transfer of control of Amended Facility License No. DPR-4 to GPU Nuclear to the extent and for the purposes described herein subject to the following: (1) the approval of the amendment proposed in the SNEC submittals dated November 21, 1995, and March 13, 1996, which, when issued by the NRC, would become effective as of the date of issuance, and (2) should the transfer of the license as set forth above to GPU Nuclear not be completed by August 9, 1996, this Order shall become null and void unless upon application and for good cause shown, this date is extended.

For further details with respect to this action, see the application for amendment and transfer of license dated November 21, 1995, as supplemented on March 13, 1996, which is available for public inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC 20037, and at the Local Public Document Room located at the Saxton Community Library, 911 Church Street, Saxton, Pennsylvania 16678.

Dated at Rockville, MD., this 10th day of May 1996.

For the Nuclear Regulatory Commission.

## [Docket No. 50-244]

### **Rochester Gas and Electric Corporation; Notice of Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing**

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DRP-18 issued to Rochester Gas & Electric Corporation (RG&E) for operation of the R. E. Ginna Nuclear Power Plant located in Wayne County, New York. The proposed amendment would modify the Technical Specifications to correct several typographical errors that were implemented in the Ginna Station Improved Technical Specifications (ITS) at Ginna Station per Amendment No 61.

On February 24, 1996, RG&E implemented the ITS. Currently, Ginna Station is in a defueled condition while in the performance of a steam generator replacement project. While in this condition, several typographical errors have been discovered within the ITS by various plant staff personnel. In general, these errors are minor and are readily apparent. However, several errors could lead to confusion and a potential incorrect application of a requirement. The correction of these more limiting errors is required prior to entering MODE 2 which is scheduled to occur on June 2, 1996. Failure to correct these known errors would therefore prevent a scheduled resumption in power operation. The proposed changes would permit the Ginna Station to enter MODE 2 as planned. Exigent action is justified in order to avoid an unnecessary delay in reactor startup.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

Pursuant to 10 CFR 50.91(a)(6) for amendments to be granted under exigent circumstances, the NRC staff must determine that the amendment request involves no significant hazards
