**Bureau of Reclamation****Proposed Long-Term Water Service Contract Renewal, Sargent and Farwell Units, Middle Loup Division, Pick-Sloan Missouri Basin Program, NE**

**AGENCY:** Bureau of Reclamation, Interior.

**ACTION:** Notice of information/scoping meetings.

**SUMMARY:** Pursuant to the National Environmental Policy Act (NEPA) of 1969, as amended, the Bureau of Reclamation (Reclamation) will prepare a draft environmental assessment (EA) on the proposed renewal of the long-term water service contract for the Loup Basin Reclamation District which provides service to the Sargent and Farwell Irrigation Districts in the Middle Loup River Basin (Basin) in Nebraska. The existing water service contract will expire in December of 1998.

The purpose of this action is to provide for the continued beneficial use of federally developed water within the Basin. Reclamation is proposing to renew the long-term water service contract for the reclamation district in accordance with current law and policy while examining all reasonable alternatives to balance contemporary surface water needs within the Basin.

Reclamation has scheduled a series of public information/scoping meetings in connection with the development of a Resource Management Assessment (RMA) and the draft EA.

**DATES:** The schedule for the public information/scoping meetings is:

- May 28, 7:00 p.m., Sargent, NE, Palladium, 105 N. 2nd Street.
- May 29, 7:00 p.m., Loup City, NE, Middle School Gymnasium, 800 N. 8th Street.
- May 30, 7:00 p.m., St. Paul, NE, Public School, 1305 Howard Avenue.
- May 31, 1:00 p.m., Grand Island, NE, Holiday Inn Mid Town, 2503 S. Locust Street.

**FOR FURTHER INFORMATION CONTACT:** Ms. Jill Manring, Basin Study Coordinator, Bureau of Reclamation, Nebraska-Kansas Area Office, PO Box 1607, Grand Island, NE 68802-1607; telephone: (308) 389-4557.

**SUPPLEMENTARY INFORMATION:**

Reclamation constructed Milburn and Arcadia Diversion Dams, Sherman Dam and Reservoir, and associated canal and drainage systems in the Basin in the 1950's and 1960's pursuant to the Pick-Sloan Missouri Basin Program of the Flood Control Act of 1944.

Prior to initiating construction on the individual projects, Reclamation

negotiated and entered into a long-term water service contract with the reclamation district. The initial long-term water service contract which was issued for a 40-year term, became effective upon completion of the respective projects, and will expire in December of 1998.

The location of the reservoir and irrigation districts within a common watershed provided Reclamation an opportunity to evaluate the direct, indirect, and cumulative effects of long-term water service contract renewal from a watershed perspective.

Reclamation will initiate its watershed analysis by preparing the RMA to identify water-related resources within the Basin, document their historic and existing conditions, identify resource trends and/or predict future conditions, propose goals and objectives for resource management, and provide a framework for development of the range of alternatives necessary for the comprehensive NEPA compliance document. Much of the information gathered for, and incorporated into, the RMA will be used to prepare the draft EA.

An extensive range of management scenarios will be formulated for the RMA that are unconstrained by existing law or regulation. Input from the public is encouraged to help define different management scenarios. The initial range of management scenarios will include over 25 options and vary from no change from current management to:

- optimizing deliveries of water for irrigation at the expense of other beneficial uses,
- optimizing reservoir management for fisheries and recreation at the expense of irrigation,
- restoring the natural hydrograph to the degree possible, and others. All of the preliminary management scenarios will be evaluated in the RMA process. It should be recognized that some of the management scenarios ultimately identified in the RMA may include actions beyond Reclamation's authority to implement. The RMA process will conclude with the identification of resource management goals and objectives and a reduced range of feasible management scenarios. Further screening, public input, and evaluation during the environmental compliance process will produce an ultimate range of reasonable alternatives that will be considered and evaluated in detail in the EA. Should the EA impact analysis process not result in a Finding of No Significant Impact (FONSI), the NEPA compliance effort will be elevated to an Environmental Impact Statement (EIS). Both the RMA and NEPA compliance

documents will assess potential impacts to Indian Trust Assets.

Anyone interested in additional information concerning the environmental compliance or water service contract renewal processes, having suggestions regarding significant environmental issues or management scenarios, or having input about concerns or issues related to Indian Trust Assets should contact Ms. Manring at the above address.

Meetings have been scheduled to inform the public of the status of contract renewal, to allow for public input on the development of preliminary management scenarios to be evaluated in the RMA process, to inform the public of significant issues identified to date, to identify additional significant issues that should be analyzed in the draft EA, and to identify issues related to Indian Trust Assets. The RMA and draft EA are expected to be completed and available for review and comment in mid 1997.

Individuals requiring special assistance at these meetings should make their needs known in advance to Lee Loseke, Bureau of Reclamation, Nebraska-Kansas Area Office, at (308) 389-4625.

Dated: May 14, 1996.
