The following request has been submitted to the Office of Management and Budget for review under the Paperwork Reduction Act of 1995:

*Evaluation of the Effectiveness and Impact of Community Health Centers—New—*A mail survey will be conducted of fifty community health centers (CHCs) to collect information on characteristics of health centers (e.g., patients, services, staffing, financing and participation in managed care) during 1992. The survey is one component of an evaluation of community health centers that examines utilization and expenditures among Medicaid CHC users and non-users, using a sample of 50 health centers in 10 states. The survey will collect data that supplement information already available from health center annual reports, reviews and grant applications. Together with the secondary data, the survey results provide the basis for characterizing attributes of the CHC delivery system and examining whether features of the CHC delivery model assist in explaining observed differentials in use and expenditures among CHC users. The survey will be mailed to CHC Executive Directors, who are expected to delegate portions of the questionnaire to staff for completion. Burden estimates are as follows:
