§ 150.20 Recognition of Agreement State licenses.

(a)(1) Provided that the provisions of paragraph (b) of this section have been met, any person who holds a specific license from an Agreement State, where the licensee maintains an office for directing the licensed activity and retaining radiation safety records, is granted a general license to conduct the same activity in—

- (i) Non-Agreement States;
- (ii) Areas of exclusive Federal jurisdiction within Agreement States; and
- (iii) Offshore waters.

(2) The provisions of paragraph (a)(1) of this section do not apply if the specific Agreement State license limits the authorized activity to a specific installation or location.

(b) Notwithstanding any provision to the contrary in any specific license issued by an Agreement State to a person engaging in activities in a non-Agreement State, an area of exclusive Federal jurisdiction within an Agreement State, or in offshore waters under the general licenses provided in this section, the general licenses provided in this section are subject to all the provisions of the Act, now or hereafter in effect, and to all valid rules, regulations and orders of the Commission including the provisions of §§ 30.7 (a) through (f), 30.9, 30.10, 30.14(d), 30.34, 30.41, 30.51 to 30.63, inclusive, of part 30 of this chapter; §§ 40.7 (a) through (f), 40.9, 40.10, 40.41, 40.51, 40.61, 40.63 inclusive, 40.71 and 40.81 of part 40 of this chapter; §§ 70.7 (a) through (f), 70.9, 70.10, 70.32, 70.42, 70.51 to 70.56, inclusive, 70.60 to 70.62, inclusive, and to the provisions of 10 CFR parts 19, 20, and 71 and subpart B of part 34, §§ 39.15 and 39.31 through 39.77, inclusive, of part 39 of this chapter. In addition, any person engaging in activities in non-Agreement States, areas of exclusive Federal jurisdiction within Agreement States, or in offshore waters under the general licenses provided in this section:

(1) Except as specified in paragraph (c) of this section, shall, at least 3 days before engaging in each such activity for

the first time in a calendar year, file an NRC Form 241, "Report of Proposed Activities in Non-Agreement States," 4 copies of its Agreement State specific license, and the appropriate fee as prescribed in § 170.31 of this chapter with the Regional Administrator of the U.S. Nuclear Regulatory Commission Regional Office listed on the NRC Form 241 and in appendix D of part 20 of this chapter for the Region in which the Agreement State that issued the license is located. If an acceptable method for filing 3 days before engaging in activities under reciprocity is not available to the licensee, because of an emergency or other reasons, the Regional Administrator may waive the 3-day time requirement provided the Agreement State licensee informs the Region by telephone, facsimile, an NRC Form 241, or letter of initial activities or revisions to the information submitted on the initial NRC Form 241, receives oral or written authorization for the activity from the Region, and files an NRC Form 241, 4 copies of the Agreement State license, and the fee payment within 3 days after the notification.

(2) Licensees that seek changes in work locations, radioactive material, or work activities different from the information contained on the initial NRC Form 241 must file an amended NRC Form 241 or letter and the appropriate fee as prescribed in § 170.31 of this chapter with the Regional Administrator.

(3) Licensees engaging in radiography activities must comply with § 71.12 of this chapter, including quality assurance program requirements for transportation.

(4) Shall not, in any non-Agreement State, area of exclusive Federal jurisdiction within an Agreement State, or in offshore waters, transfer or dispose of radioactive material possessed or used under the general licenses provided in this section, except by transfer to a person

(i) Specifically licensed by the Commission to receive such material, or

(ii) Exempt from the requirements for a license for such material under § 30.14 of this chapter;

(5) Shall not, under the general license concerning activities in non-Agreement States or in areas of exclusive Federal jurisdiction within Agreement States, possess or use radioactive materials, or engage in the activities authorized in paragraph (a) of this section, for more than 180 days in any calendar year, except that the general license in paragraph (a) of this section concerning activities in offshore waters authorizes that person to possess

or use radioactive materials, or engage in the activities authorized, for an unlimited period of time.

The Proposal

The FAA is considering an amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) to revise the Class E airspace, controlled airspace extending upward from 700 feet AGL, at Carlisle Municipal Airport, Carlisle, AR. A new GPS SIAP to RWY 09 has made this proposal necessary. The intended effect of this proposal is to provide adequate Class E airspace for aircraft executing the GPS SIAP to Rwy 09 at Carlisle, AR.

The coordinates for this airspace docket are based on North American Datum 83. Designated Class E airspace areas extending upward from 700 feet or more above ground level are published in Paragraph 6005 of FAA Order 7400.9C, dated August 17, 1995, and effective September 16, 1995, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations that need frequent and routine amendments to keep them operationally current. It, therefore—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air

traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
