Medicare Program; Changes to the Hospital Inpatient Prospective Payment Systems and Fiscal Year 1997 Rates; Correction

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Correction notice.

SUMMARY: On May 31, 1996, we published a proposed rule (61 FR 27444) that would revise the Medicare hospital inpatient prospective payment

systems for operating costs and capital-related costs to implement necessary changes arising from our continuing experience with the systems. In the addendum to the proposed rule, we announced the prospective payment rates for Medicare hospital inpatient services for operating costs and capital-related costs that would apply to discharges occurring on or after October 1, 1996, and set forth the factors for determining the rate-of-increase limits for hospital and hospital units excluded from the prospective payment system. This notice corrects errors made in that document.

FOR FURTHER INFORMATION CONTACT: Tzvi Heftner, (410) 786-1304.

SUPPLEMENTARY INFORMATION: In the May 31, 1996 proposed rule (61 FR 27444), we indicated that the addendum would discuss our proposed update of the factors for determining the rate-of-increase limits for cost reporting periods beginning in Federal fiscal year 1997 for hospitals and hospital units excluded from the prospective payment system. This discussion was inadvertently omitted from the published document.

In addition, there were errors in our calculations of the Geographic Adjustment Factors (GAFs) in tables 4a and 4b. The tables are reprinted in their entirety in this document. The GAFs set forth in table 4c are correct.

The proposed rule also contained other technical and typographical errors. Therefore, we are making the following corrections to the May 31, 1996 proposed rule:

1. On page 27474, in the table entitled Initial Residency Period, after "Allopathy" and before "ANESTHESIOLOGY" insert the following row:

ALLERGY AND IMMUNOLOGY3.

2. On page 27504, in the second column before "V. Tables", the following information should be inserted:

IV. Proposed Rate-of-Increase Percentages for Excluded Hospitals and Hospital Units

The inpatient operating costs of hospitals and hospital units excluded from the prospective payment system are subject to rate-of-increase limits established under the authority of section 1886(b) of the Act, which is implemented in § 413.40 of the regulations. Under these limits, an annual target amount (expressed in terms of the inpatient operating cost per discharge) is set for each hospital, based on the hospital's own historical cost

experience trended forward by the applicable rate-of-increase percentages (update factors). The target amount is multiplied by the number of Medicare discharges in a hospital's cost reporting period, yielding the ceiling on aggregate Medicare inpatient operating costs for the cost reporting period.

Effective with cost reporting periods beginning on or after October 1, 1991, a hospital that has Medicare inpatient operating costs in excess of its ceiling is paid its ceiling plus 50 percent of its costs in excess of the ceiling. Total payment may not exceed 110 percent of the ceiling. A hospital that has inpatient operating costs less than its ceiling is paid its costs plus the lower of—

- Fifty percent of the difference between the allowable inpatient operating costs and the ceiling; or
- Five percent of the ceiling.

Each hospital's target amount is adjusted annually, at the beginning of its cost reporting period, by an applicable rate-of-increase percentage. Section 1886(b)(3)(B) of the Act provides that for cost reporting periods beginning on or after October 1, 1993, and before October 1, 1994, the applicable rate-of-increase percentage is the market basket percentage increase minus the lesser of 1 percentage point or the percentage point difference between 10 percent and the hospital's "update adjustment percentage" of at least 10 percent. The rate-of-increase percentage for hospitals in the latter case is the market basket percentage increase. The "update adjustment percentage" is the percentage by which a hospital's allowable inpatient operating costs exceeds the hospital's ceiling for the cost reporting period beginning in Federal fiscal year (FY) 1990. For cost reporting periods beginning on or after October 1, 1994, and before October 1, 1997, the update adjustment percentage is the update adjustment percentage from the previous year plus the previous year's applicable reduction. The applicable reduction and applicable rate-of-increase percentage are then determined in the same manner as for FY 1994. The most recent forecasted market basket increase for FY 1997 for hospitals and hospital units excluded from the prospective payment system is 2.7 percent.
