

provisions in the Federal Deposit Insurance Corporation Improvement Act of 1991.

Discussion Agenda

3. Proposed 1997 Federal Reserve Bank budget objective.

4. Any items carried forward from a previously announced meeting.

Note: This meeting will be recorded for the benefit of those unable to attend. Cassettes will be available for listening in the Board's Freedom of Information Office, and copies may be ordered for \$5 per cassette by calling (202) 452-3684 or by writing to:

Freedom of Information Office, Board of Governors of the Federal Reserve System, Washington, D.C. 20551

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452-3204.

Dated: July 3, 1996

Jennifer J. Johnson,

Deputy Secretary of the Board.

[FR Doc. 96-17402 Filed 7-03-96; 3:16 pm]

BILLING CODE 6210-01-P

Sunshine Act Meeting

AGENCY HOLDING THE MEETING: Board of Governors of the Federal Reserve System.

TIME AND DATE: Approximately 10:30 a.m., Wednesday, July 10, 1996, following a recess at the conclusion of the open meeting.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, N.W., Washington, D.C. 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.

2. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452-3204. You may call (202) 452-3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Dated: July 3, 1996.

Jennifer J. Johnson,

Deputy Secretary of the Board.

[FR Doc. 96-17403 Filed 7-3-96; 3:16 pm]

BILLING CODE 6210-10-P

GENERAL SERVICES ADMINISTRATION

[GSA Bulletin FPMR D-238]

Locating Federal Facilities on Historic Properties in Our Nation's Central Cities

1. Purpose. This bulletin announces the policy concerning the location of Federal facilities on historic properties in our central cities.

2. Expiration date. This bulletin contains information of a continuing nature and will remain in effect until canceled.

3. Background. a. On May 21, 1996, President Clinton signed Executive Order 13006, entitled "Locating Federal Facilities on Historic Properties in Our Nation's Central Cities," to encourage "leasing, acquiring, locating, maintaining, or managing" Federal facilities on historic properties in our nation's central cities. So that federal agencies may benefit from GSA's real property management expertise, government-wide policy guidance is being provided concerning the acquisition and use of historic properties to be utilized by federal agencies where operationally appropriate and economically prudent.

b. The Public Buildings Cooperative Use Act of 1976 (40 U.S.C. 601a) directs the Administrator of General Services to "acquire and utilize space in suitable buildings of historic, architectural, or cultural significance, unless use of such space would not prove feasible and prudent compared with available alternatives." In the past, some Federal agencies have successfully promoted the acquisition and use of space in "buildings of historic, architectural, and cultural significance" by extending a 10 percent cost preference for these properties.

4. Action. In accordance with Executive Order 13006, and subject to the requirements of section 601 of title VI of the Rural Development Act of 1972, as amended, (42 U.S.C. 3122), and Executive Order 12072, when locating Federal facilities, Federal agencies shall give first consideration to historic properties within historic districts. If no such property is suitable, then Federal agencies shall consider other developed or undeveloped sites within historic districts. Federal agencies shall then consider historic properties outside of historic districts, if no suitable site within a district exists.

All Federal agencies must use procedures which implement the policy to extend first consideration to locations as prescribed in the Executive order. These implementation procedures

should be consistent with the existing policy set forth in Executive Order 12072 (Federal Space Management), which extends first consideration to central business areas (CBAs), and should consider applicable requirements relating to full and open competition under the Competition in Contracting Act, 41 U.S.C. 253 *et seq.*

Federal agencies are encouraged to consider the Government's previous approach extending preference to historic properties. Where operationally appropriate and economically prudent, Federal agencies may extend first consideration to historic properties using various methods, including but not limited to extending a cost preference (similar to GSAR 570.701-4, Historic Preference); limiting competition to historic districts and/or historic properties; conducting market surveys and market analyses to identify historic properties or districts to be included in the area of consideration; providing notice of a requirement and an opportunity to respond to local, state or regional historic preservation officials; or a combination of the foregoing.

Dated: June 28, 1996.

G. Martin Wagner,

Associate Administrator, Office of Policy, Planning and Evaluation.

[FR Doc. 96-17208 Filed 7-5-96; 8:45 am]

BILLING CODE 6820-23-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Notice of Specific List for Categorization of Laboratory Test Systems, Assays, and Examinations by Complexity; Notice of Additional Waived Laboratory Test Systems, Assays, and Examinations; and Notice of Announcement of Boards Approved by HHS

AGENCY: Centers for Disease Control and Prevention (CDC), HHS.

ACTION: Notice with comment period.

SUMMARY: Regulations codified at 42 CFR 493.17, implementing the Clinical Laboratory Improvement Amendments of 1988 (CLIA), Public Law 100-578, require that the Secretary provide for the categorization of specific laboratory test systems, assays, and examinations by level of complexity. The criteria for such categorizations also are set forth in those regulations.

This Notice announces the addition of test systems to the waived category, and

announces approximately 2400 additional test systems, assays, and examinations that have been categorized and notified between March 15, 1995 and June 7, 1996. These categorizations were effective on the issue date of the notification letter sent to the manufacturer, and are subject to the 30 day comment period for this Notice.

This Notice also announces the waiver of those test systems, assays, and examinations that have met the CDC guidelines reflected in the proposed criteria for waiver as outlined in a Notice of Proposed Rulemaking, 42 CFR Part 493, HSQ-225-P, published September 13, 1995, in the Federal Register (60 FR 47534). These test systems and test system instructions may have been revised in order to meet the criteria for waiver. Please contact the manufacturer of the test system regarding this information.

This Notice is published with an opportunity for public comment. PHS reserves the right to reevaluate and recategorize a test based upon the comments it receives in response to the Federal Register notice.

In addition, this Notice announces HHS approval of two certification organizations, the American Board of Histocompatibility and Immunogenetics and the American Board of Medical Genetics, for qualifying individuals as laboratory directors and clinical consultants.

DATES: *Effective date:* All categorizations in this Notice were effective on the date of the test categorization notification letter sent to the manufacturer. Written comments on the tests initially categorized in this Notice will be considered if they are received at the address indicated below, by no later than 5 p.m. on August 7, 1996. CDC reserves the right to reevaluate and recategorize tests based on the comments received in response to this Notice.

ADDRESSES: Comments on the categorization of tests in this Notice should be addressed to Public Health Service, Attention: CLIA Federal Register Notice, Centers for Disease Control and Prevention, Mail Stop F-11, 4770 Buford Highway, NE, Atlanta, Georgia 30341-3724.

Requests for test complexity categorization should be submitted to: Attention: Test Categorization/CLIA, Centers for Disease Control and Prevention, Mail Stop F-11, 4770 Buford Highway, NE, Atlanta, Georgia 30341-3724.

Requests for waiver status should be submitted to: Attention: Request for Waiver Status/CLIA, Centers for Disease

Control and Prevention, Mail Stop F-11, 4770 Buford Highway, NE, Atlanta, GA 30341-3724.

Due to staffing and resource limitations, we cannot accept facsimile (FAX) copies of comments. Nor can we accept comments by telephone.

FOR FURTHER INFORMATION CONTACT: Rosemary C. Bakes-Martin, (770) 488-7655.

SUPPLEMENTARY INFORMATION: All requests for test categorization should be submitted to the CDC. CDC is reviewing submissions for test categorization concurrently with the FDA's review process for 510(k) clearance or PMA clearance. In order to assure timely review by CDC, manufacturers are requested to submit the package insert and 510(k) number for the product to CDC when the product is submitted to the FDA. However, CDC will not be able to issue the test categorization until the FDA has finished its review process. CDC is currently issuing test categorization notification letters to manufacturers within one week of the FDA 510(k) or Pre-Market Approval (PMA) clearance. Test categorizations are effective as of the date of notification to the applicant. The CDC will publish updates and revisions to the test categorization list periodically in the Federal Register with opportunity for comment. The CDC will also maintain an updated list of categorized tests electronically, available to the public via Internet. For further information regarding this capability, please call (770) 488-7655.

Additions to the Waived Category

The CDC is evaluating requests for waiver based on the guidelines for submission of waiver requests that were sent to manufacturers of laboratory testing devices and other interested parties through correspondence dated December 19, 1994. These guidelines reflect the proposed criteria for waiver that are outlined in the Notice of Proposed Rulemaking, 42 CFR Part 493, HSQ-225-P, published September 13, 1995 in the Federal Register (60 FR 47534).

The following test systems have been granted waived status based upon meeting these guidelines: (25112) HemoCue B-Glucose System for the analyte (2203) glucose; (10170) Cholestech L*D*X Test System for the analytes (1020) cholesterol, (6118) triglyceride, (2550) HDL cholesterol, and (2203) glucose; (58338) Serim PyloriTek Test Kit for the analyte (2512) *Helicobacter pylori*; and (52036) Quidel QuickVue In-Line One-Step Strep A Test for the analyte (5828)

Streptococcus, group A (from throat only).

This Notice also announces that the (10165) ChemTrak AccuMeter, the (31014) Johnson & Johnson ADVANCED CARE Cholesterol Test, and the (07776) Boehringer Mannheim Accu-Chek InstantPlus Cholesterol for the analyte (1020) Cholesterol have been granted waived status following clearance by the FDA for home use.

In this Notice we also are verifying the complexity of two test system/analyte combinations. The test system, (04542) All Qualitative Color Comparison pH Testing for the analyte (0731) Body fluid (other than blood) pH, is the same as the waived dipstick color comparison products for qualitative pH measurement in urine. Therefore, this test system has been added to the list of waived tests.

The second test system, (58217) SmithKline Gastrocult for the analyte (2211) Gastric Occult Blood, is the same test system as that for fecal occult blood. Therefore, this test system is also now included on the list of waived procedures.

Comments and Responses

On May 15, 1995, a test list of approximately 3,000 additional test systems, assays, and examinations categorized by level of complexity was published in the Federal Register (60 FR 25944) with a 30 day comment period. Only one letter containing the following general comments was received in regard to this Notice.

Comment: The commenter expressed concern about the categorization of Growth/No Growth of Bacteria on Solid Culture Media (22167) as a moderate complexity test, and requested that this test system be recategorized as high complexity. The commenter used as an example the primary plating of a normally sterile joint fluid to a selective medium, such as Thayer-Martin, if *Neisseria gonorrhoeae* is suspected. The commenter stated that if *N. gonorrhoeae* were not present, Thayer-Martin may inhibit the growth of other significant organisms. If no other media had been inoculated at the time the Thayer-Martin was set up, the commenter suggested that a "no growth" result could incorrectly be reported.

Response: We disagree with the commenter. In this case, the result that should be reported is "no growth of *N. gonorrhoeae*", since Thayer-Martin media is selective for *Neisseria gonorrhoeae*. Under CLIA, laboratories are required to have protocols for the primary inoculation of cultures from specific sites to appropriate culture media. It is the responsibility of the

laboratory director to review and approve these protocols. A normally sterile joint fluid should be inoculated to a combination of the appropriate enriched, selective, and differential media to permit isolation and enhance the growth of any of a number of possible aerobic or anaerobic organisms that could be present in the fluid. For this culture type, it would not be appropriate to inoculate only Thayer-Martin media.

Primary inoculation of any microbiology culture media, in and of itself, is not considered a complete test system under the CLIA regulations, and is not categorized for complexity. The inoculation of the media becomes part of the test system when the primary media is observed to determine whether growth is present after an incubation period. It is the responsibility of the testing personnel to evaluate the growth or absence of growth. When solid culture media is evaluated, the amount of training, experience, interpretation, and judgment required to determine if any bacterial colonies are present, results in a score that is in the moderate complexity category. If, however, there is any growth that must be interpreted, or the medium being evaluated is a broth or liquid medium, such as thioglycollate, more training, experience, interpretation, and judgment is required, and the examination scores as a high complexity test.

Comment: The commenter requested clarification of the categorization of automated blood culture systems as moderate complexity. This commenter stated that although the loading and monitoring of these automated analyzers might be considered moderate complexity, the analysis of positive bottles detected on these instruments should be categorized as high complexity.

Response: We agree with the commenter. The categorization of automated blood culture systems as moderate complexity includes only the the loading and monitoring of these instruments to detect microbial growth in the bottles or vials. Once a signal for growth is detected, the evaluation of the growth, including Gram stain, and subculturing to isolate and identify the microorganism is the high complexity test system "identification from culture". On an automated blood culture instrument, if a specimen does not signal a positive result for growth, the reporting of a negative result is considered a moderate complexity test, provided no followup testing is performed.

Comment: Concern was expressed by the commenter that an inadequate response was provided in the May 15, 1995 Federal Register to a previous comment on the question of recategorization of "large" hematology analyzers and microscopy procedures from high to moderate complexity. The commenter pointed out that the complexity categorization should take into account whether or not the specimen being analyzed is a normal or abnormal sample.

Response: We disagree with the commenter that a "large" hematology analyzer requires a higher complexity categorization when the results of the sample being processed are abnormal rather than normal. The level of technical expertise needed to operate the analyzer does not vary with the results produced as the results are determined automatically by the instrument. If the analyst chooses to repeat those parameters of the hematologic evaluation that are considered to be abnormal, then the repeat testing would be categorized based upon the test methodology/procedure employed.

The categorization of the microscopic examination of a blood smear (differential) does take into account whether or not the cellular elements present in the sample are those found in normal peripheral blood. The manual differential performed on a normal blood smear requires the analyst to have a general knowledge of cellular morphology and maturation and is categorized as moderate complexity, whereas the manual differential performed on an abnormal specimen requires that the analyst have a comprehensive knowledge of normal/abnormal cellular morphology and maturation and is categorized as high complexity. A more detailed explanation of categorization of blood cell differentials can be found on page 39873 of the July 26, 1993 Federal Register (58 FR 39873).

Corrections

The test system (07689)Bayer GLUCOMETER ENCORE+ Blood Glucose Meter has been added to the list of waived procedures. This test system was previously categorized as moderate complexity. Recently, the FDA cleared this test system for home use and consequently it is now waived. Please note there has been a change in manufacturer name. This product was formerly listed under Ames.

Test System and Analyte Nomenclature

Due to advances in technology, the analyte (4024)Mycobacteria has been

refined, and specific analytes have been designated for test systems that are used to identify specific mycobacterial organisms. These new analytes are: (4008)Mycobacterium avium, (4009)Mycobacterium avium complex, (4011)Mycobacterium gordonae, (4012)Mycobacterium intracellulare, (4014)Mycobacterium kansasii, and (4015)Mycobacterium tuberculosis complex. While these more specific analytes will replace the analyte (4024)Mycobacteria in most instances, the analyte (4024)Mycobacteria will continue to be used with test systems that are not used to identify a specific mycobacterial organism.

Also due to technological advances, a new analyte for thyroid stimulating hormone, (6155)Thyroid Stimulating Hormone (TSH) Third Generation, has been designated for the test systems that are able to detect this analyte.

As a point of clarification, an analyte will be designated specifically as a "urine" analyte when a test procedure requires a modification to the test procedure for the urine analyte as opposed to that required for the "serum" analyte.

Test System and Analyte Modifications

The development of new technology in the specialty of microbiology has necessitated a distinction in the categorization of aerobic/anaerobic culture identification (ID) and the categorization of antimicrobial susceptibility testing (AST). For clarification, we are deleting the test system (04372)All Organism ID and Antimicrobial Susceptibility Testing, and replacing it with two test systems (04636)All Conventional Organism Identification from Culture, and (04637)All Antimicrobial Susceptibility (disk diffusion/dilution) from Culture. These two test systems will be assigned to the analyte (0412)Aerobic &/or Anaerobic Organisms—Unlimited Sources, just as the previous test system (04372) was listed. We realize that there are a number of different techniques used for the conventional methods of identifying aerobic and anaerobic organisms from culture; and that these identification methods can be quite different from the processes used to perform standardized disk diffusion, agar or broth dilution antimicrobial susceptibility testing from culture. Although identification and susceptibility testing from culture are often performed together, they are distinct methods that may be done independently. In an effort to be specific, we are separating the two tests.

Dated: June 28, 1996.

David Satcher,

Director, Centers for Disease Control and Prevention (CDC).

List of Previously Unpublished Categorizations

The test categorization scoring scheme was based on an assessment of the complexity of the operation of the test procedure and not on an evaluation of data documenting the procedure's performance over time. Therefore, the categorization of a test system, assay or examination as moderate or high complexity should not be interpreted as an indication of the acceptability or unacceptability of the accuracy, precision or overall performance of the procedure.

Johnson & Johnson CDI Ektachem DT SC Module (31031)
Roche Cobas INTEGRA (55179)
Select Medical Systems Selecta 20/60 (58349)

Analyte: Alkaline Phosphatase (ALP) (0416)

Test System, Assay, Examination:

Abaxis Piccolo Portable Blood Analyzer (04608)
Beckman Synchron CX 4 Delta (07762)
Beckman Synchron CX 5 Delta (07763)
Beckman Synchron CX 7 Delta (07764)
Bio-Chem Laboratory Systems ATAC 8000 (07658)
Boehringer Mannheim Hitachi 917 (07765)
Johnson & Johnson CDI Ektachem 250 (31019)
Johnson & Johnson CDI Ektachem 400 (31020)
Johnson & Johnson CDI Ektachem 500 (31021)
Johnson & Johnson CDI Ektachem 550 XRC (31022)
Johnson & Johnson CDI Ektachem 700 (31023)
Johnson & Johnson CDI Ektachem 700 Analyzer C Series (31024)
Johnson & Johnson CDI Ektachem 700 P (31025)
Johnson & Johnson CDI Ektachem 700 XR (31026)

Johnson & Johnson CDI Ektachem 750 XRC (31027)

Johnson & Johnson CDI Ektachem 950 IRC (31028)

Johnson & Johnson CDI Ektachem DT II (31030)

Johnson & Johnson CDI Ektachem DT SC Module (31031)

Roche Cobas INTEGRA (55179)

Select Medical Systems Selecta 20/60 (58349)

Analyte: Alpha-Hydroxybutyrate Dehydrogenase (HBDH) (0419)

Test System, Assay, Examination:

Beckman Synchron CX 4 Delta (07762)
Beckman Synchron CX 5 Delta (07763)
Beckman Synchron CX 7 Delta (07764)

Analyte: Ammonia, Plasma/Serum (0427)

Test System, Assay, Examination:

Beckman Synchron CX 4 Delta (07762)
Beckman Synchron CX 5 Delta (07763)
Beckman Synchron CX 7 Delta (07764)
Boehringer Mannheim Hitachi 917 (07765)
Johnson & Johnson CDI Ektachem 250 (31019)
Johnson & Johnson CDI Ektachem 400 (31020)
Johnson & Johnson CDI Ektachem 500 (31021)
Johnson & Johnson CDI Ektachem 550 XRC (31022)
Johnson & Johnson CDI Ektachem 700 (31023)
Johnson & Johnson CDI Ektachem 700 Analyzer C Series (31024)
Johnson & Johnson CDI Ektachem 700 P (31025)
Johnson & Johnson CDI Ektachem 700 XR (31026)
Johnson & Johnson CDI Ektachem 750 XRC (31027)
Johnson & Johnson CDI Ektachem 950 IRC (31028)
Johnson & Johnson CDI Ektachem DT 60 (31029)
Johnson & Johnson CDI Ektachem DT II (31030)

Analyte: Amylase (0429)

Test System, Assay, Examination:

Abaxis Piccolo Portable Blood Analyzer (04608)
Beckman Synchron CX 4 Delta (07762)
Beckman Synchron CX 5 Delta (07763)
Beckman Synchron CX 7 Delta (07764)
Bio-Chem Laboratory Systems ATAC 8000 (07658)
Boehringer Mannheim Hitachi 917 (07765)
Johnson & Johnson CDI Ektachem 250 (31019)
Johnson & Johnson CDI Ektachem 400 (31020)
Johnson & Johnson CDI Ektachem 500 (31021)
Johnson & Johnson CDI Ektachem 550 XRC (31022)
Johnson & Johnson CDI Ektachem 700 (31023)
Johnson & Johnson CDI Ektachem 700 Analyzer C Series (31024)
Johnson & Johnson CDI Ektachem 700 P (31025)
Johnson & Johnson CDI Ektachem 700 XR (31026)

Johnson & Johnson CDI Ektachem 750 XRC (31027)
 Johnson & Johnson CDI Ektachem 950 IRC (31028)
 Johnson & Johnson CDI Ektachem DT 60 (31029)
 Johnson & Johnson CDI Ektachem DT II (31030)
 Roche Cobas INTEGRA (55179)
 Select Medical Systems Selecta 20/60 (58349)

Analyte: Amylase, Pancreatic Isoenzymes (p-Amylase) (0500)

Test System, Assay, Examination:

Beckman Synchron CX 4 Delta (07762)
 Beckman Synchron CX 5 Delta (07763)
 Beckman Synchron CX 7 Delta (07764)
 Boehringer Mannheim Hitachi 917 (07765)

Analyte: Apolipoprotein A1 (0462)

Test System, Assay, Examination:

Bio-Chem Laboratory Systems ATAC 8000 (07658)
 Roche Cobas INTEGRA (55179)
 Wako Diagnostics 30R (70002)

Analyte: Apolipoprotein B (0457)

Test System, Assay, Examination:

Bio-Chem Laboratory Systems ATAC 8000 (07658)
 Roche Cobas INTEGRA (55179)

Analyte: Aspartate Aminotransferase (AST) (SGOT) (0405)

Test System, Assay, Examination:

Abaxis Piccolo Portable Blood Analyzer (04608)
 Beckman Synchron CX 4 Delta (07762)
 Beckman Synchron CX 5 Delta (07763)
 Beckman Synchron CX 7 Delta (07764)
 Bio-Chem Laboratory Systems ATAC 8000 (07658)
 Boehringer Mannheim Hitachi 917 (07765)
 Johnson & Johnson CDI Ektachem 250 (31019)
 Johnson & Johnson CDI Ektachem 500 (31021)
 Johnson & Johnson CDI Ektachem 550 XRC (31022)
 Johnson & Johnson CDI Ektachem 700 (31023)
 Johnson & Johnson CDI Ektachem 700 Analyzer C Series (31024)
 Johnson & Johnson CDI Ektachem 700 P (31025)
 Johnson & Johnson CDI Ektachem 700 XR (31026)
 Johnson & Johnson CDI Ektachem 750 XRC (31027)
 Johnson & Johnson CDI Ektachem 950 IRC (31028)
 Johnson & Johnson CDI Ektachem DT II (31030)
 Johnson & Johnson CDI Ektachem DT SC Module (31031)
 Roche Cobas INTEGRA (55179)
 Select Medical Systems Selecta 20/60 (58349)

Analyte: Bilirubin, Direct (0704)

Test System, Assay, Examination:

Abaxis Piccolo Portable Blood Analyzer (04608)
 Beckman Synchron CX 4 Delta (07762)
 Beckman Synchron CX 5 Delta (07763)
 Beckman Synchron CX 7 Delta (07764)

Bio-Chem Laboratory Systems ATAC 8000 (07658)
 Boehringer Mannheim Hitachi 917 (07765)

Johnson & Johnson CDI Ektachem 250 (31019)
 Johnson & Johnson CDI Ektachem 400 (31020)
 Johnson & Johnson CDI Ektachem 500 (31021)
 Johnson & Johnson CDI Ektachem 550 XRC (31022)
 Johnson & Johnson CDI Ektachem 700 (31023)
 Johnson & Johnson CDI Ektachem 700 Analyzer C Series (31024)
 Johnson & Johnson CDI Ektachem 700 P (31025)
 Johnson & Johnson CDI Ektachem 700 XR (31026)
 Johnson & Johnson CDI Ektachem 750 XRC (31027)
 Johnson & Johnson CDI Ektachem 950 IRC (31028)
 Roche Cobas INTEGRA (55179)

Analyte: Bilirubin, Neonatal (0705)

Test System, Assay, Examination:

Johnson & Johnson CDI Ektachem 250 (31019)
 Johnson & Johnson CDI Ektachem 400 (31020)
 Johnson & Johnson CDI Ektachem 500 (31021)
 Johnson & Johnson CDI Ektachem 550 XRC (31022)
 Johnson & Johnson CDI Ektachem 700 (31023)
 Johnson & Johnson CDI Ektachem 700 Analyzer C Series (31024)
 Johnson & Johnson CDI Ektachem 700 P (31025)
 Johnson & Johnson CDI Ektachem 700 XR (31026)
 Johnson & Johnson CDI Ektachem 750 XRC (31027)
 Johnson & Johnson CDI Ektachem DT 60 (31029)
 Johnson & Johnson CDI Ektachem DT II (31030)

Analyte: Bilirubin, Total (0706)

Test System, Assay, Examination:

Abaxis Piccolo Portable Blood Analyzer (04608)
 Beckman Synchron CX 4 Delta (07762)
 Beckman Synchron CX 5 Delta (07763)
 Beckman Synchron CX 7 Delta (07764)
 Bio-Chem Laboratory Systems ATAC 8000 (07658)
 Boehringer Mannheim Hitachi 917 (07765)

 Johnson & Johnson CDI Ektachem 700 P (31025)
 Johnson & Johnson CDI Ektachem 700 XR (31026)

Johnson & Johnson CDI Ektachem 750 XRC (31027)
 Johnson & Johnson CDI Ektachem 950 IRC (31028)
 Johnson & Johnson CDI Ektachem DT 60 (31029)
 Johnson & Johnson CDI Ektachem DT II (31030)
 Roche Cobas INTEGRA (55179)

Analyte: Blood Gases With pH (0708)

Test System, Assay, Examination:

AVL OMNI Combi Analyzer (04609)
 Instrumentation Laboratory IL BGGE (IL 1660) (28438)
 Nova Stat Profile Ultra A (43108)
 Nova Stat Profile Ultra B (43109)
 Nova Stat Profile Ultra C (43110)
 Nova Stat Profile Ultra D (43111)
 Nova Stat Profile Ultra E (43112)
 Nova Stat Profile Ultra F (43115)
 Nova Stat Profile Ultra G (43116)
 Nova Stat Profile Ultra H (43117)
 Nova Stat Profile Ultra I (43118)
 Nova Stat Profile Ultra J (43119)
 Nova Stat Profile Ultra K (43120)
 Radiometer ABL System 605 (55196)
 Radiometer ABL System 615 (55197)
 Radiometer ABL System 625 (55198)
 SenDx 100 pH, Blood Gas and Electrolyte Analysis System (58390)

Analyte: Blood pH (No Blood Gases) (0721)

Test System, Assay, Examination:

Radiometer BPH5 Blood pH System (55158)

Analyte: C-Peptide (1040)

Test System, Assay, Examination:

Cirrus Diagnostics Immulite (10159)
 TOSOH A1A-1200 (61040)
 TOSOH A1A-1200DX (61154)
 TOSOH A1A-600 (61039)

Analyte: Calcium, Ionized (1004)

Test System, Assay, Examination:

AVL OMNI Combi Analyzer (04609)
 Nova Stat Profile Ultra B (43109)
 Nova Stat Profile Ultra C (43110)
 Nova Stat Profile Ultra I (43118)
 Nova Stat Profile Ultra J (43119)
 Nova Stat Profile Ultra K (43120)
 Radiometer ABL System 605 (55196)
 Radiometer ABL System 615 (55197)
 Radiometer ABL System 625 (55198)
 Radiometer EML 105 (55187)
 SenDx 100 pH, Blood Gas and Electrolyte Analysis System (58390)

Analyte: Calcium, Total (1005)

Test System, Assay, Examination:

Abaxis Piccolo Portable Blood Analyzer (04608)
 Beckman Synchron CX 4 Delta (07762)
 Beckman Synchron CX 5 Delta (07763)
 Beckman Synchron CX 7 Delta (07764)
 Bio-Chem Laboratory Systems ATAC 8000 (07658)

Beckman Synchron CX 7 Delta (07764)	Roche Cobas INTEGRA (55179)	Analyte: Herpes Simplex (2529)
Boehringer Mannheim Hitachi 917 (07765)	Analyte: Theophylline (6104)	<i>Test System, Assay, Examination:</i>
Instrumentation Laboratory ILAB 1800 (28323)	<i>Test System, Assay, Examination:</i>	Johnson & Johnson CDI SureCell (direct antigen/visual) (31063)
Instrumentation Laboratory ILAB 900 (28322)	Beckman Synchron CX 4 Delta (07762)	Analyte: Rotavirus (5509)
Johnson & Johnson CDI Ektachem 250 (31019)	Beckman Synchron CX 5 Delta (07763)	<i>Test System, Assay, Examination:</i>
Johnson & Johnson CDI Ektachem 950 IRC (31028)	Beckman Synchron CX 7 Delta (07764)	Vitek Systems Vidas (67038)
Roche Cobas INTEGRA (55179)	Bio-Chem Laboratory Systems ATAC 8000 (07658)	Complexity: High
Analyte: Phenytoin, Free (4904)	Boehringer Mannheim Hitachi 917 (07765)	<i>Speciality/Subspeciality: Bacteriology</i>
<i>Test System, Assay, Examination:</i>	Ciba Corning ACS 180 (10046)	Analyte: Aerobic &/or Anaerobic Organisms-Unlimited Sources (0412)
Roche Cobas FARA II (55041)	Cirrus Diagnostics Immulite (10159)	<i>Test System, Assay, Examination:</i>
Roche Cobas INTEGRA (55179)	Johnson & Johnson CDI Ektachem 250 (31019)	AB Biodisk Etest (including culture) (04592)
Analyte: Primidone (4912)	Johnson & Johnson CDI Ektachem 500 (31021)	All Antimicrobial Suscept. (disk diffusion/dilution) fr cult (04637)
<i>Test System, Assay, Examination:</i>	Johnson & Johnson CDI Ektachem 550 XRC (31022)	All Conventional Organism Identification (ID) from culture (04636)
Roche Cobas INTEGRA (55179)	Johnson & Johnson CDI Ektachem 700 (31023)	Becton Dickinson BBL CRYSTAL ANR ID System (inc. culture) (07561)
Analyte: Procainamide (4913)	Johnson & Johnson CDI Ektachem 700 Analyzer C Series (31024)	Difco DrySlide NEISSERIA (including culture) (13407)
<i>Test System, Assay, Examination:</i>	Johnson & Johnson CDI Ektachem 700 XR (31026)	Analyte: Aerobic Organisms From Urine Specimens Only (0468)
Abbott AxSYM (04532)	Johnson & Johnson CDI Ektachem 750 XRC (31027)	<i>Test System, Assay, Examination:</i>
PB Diagnostics Systems OPUS Magnum (49097)	Johnson & Johnson CDI Ektachem 950 IRC (31028)	Culture Kits, Inc. Uri-Two (nonconfirmatory ID) (10333)
PB Diagnostics Systems OPUS PLUS (49098)	Johnson & Johnson CDI Ektachem DT II (31030)	Analyte: Chlamydia (1016)
Roche Cobas INTEGRA (55179)	Johnson & Johnson CDI Ektachem DT SC Module (31031)	<i>Test System, Assay, Examination:</i>
Analyte: Propoxyphene (4917)	Roche Cobas INTEGRA (55179)	Abbott IMX Select (04229)
<i>Test System, Assay, Examination:</i>	Analyte: Tobramycin (6112)	Abbott LCx Chlamydia trachomatis Assay (04541)
Beckman Synchron CX 4 (CEDIA DAU/automated curve) (07754)	<i>Test System, Assay, Examination:</i>	DAKO IDEIA Chlamydia Blocking Reagents (13322)
Beckman Synchron CX 4 Delta (07762)	Beckman Synchron CX 4 Delta (07762)	Sanofi Pasteur Access Immunoassay System (58257)
Beckman Synchron CX 5 (CEDIA DAU/automated curve) (07755)	Beckman Synchron CX 5 Delta (07763)	Analyte: Enterococcus (1612)
Beckman Synchron CX 5 Delta (07763)	Beckman Synchron CX 7 Delta (07764)	<i>Test System, Assay, Examination:</i>
Beckman Synchron CX 7 (CEDIA DAU/automated curve) (07756)	Boehringer Mannheim Hitachi 917 (07765)	Becton Dickinson Enterococcus Screening Test (inc. culture) (07715)
Beckman Synchron CX 7 Delta (07764)	Analyte: Tricyclic Antidepressants (6117)	Analyte: Escherichia Coli (1604)
Boehringer Mannheim Hitachi 704 (CEDIA DAU/automated curve) (07757)	<i>Test System, Assay, Examination:</i>	<i>Test System, Assay, Examination:</i>
Boehringer Mannheim Hitachi 717 (CEDIA DAU/automated curve) (07758)	Abbott AxSYM (04532)	LMD Laboratories E. coli 0157 ELISA Assay (dir. ag/spectro) (37092)
Boehringer Mannheim Hitachi 747 (CEDIA DAU/automated curve) (07759)	Analyte: Valproic Acid (6701)	LMD Laboratories E. coli 0157 ELISA Assay (dir. ag/visual) (37091)
Boehringer Mannheim Hitachi 911 (07377)	<i>Test System, Assay, Examination:</i>	Meridian Premier EHEC (spectrophotometric) (40205)
Boehringer Mannheim Hitachi 911 (CEDIA DAU/automated curve) (07760)	Boehringer Mannheim Hitachi 917 (07765)	Meridian Premier EHEC (visual) (40204)
Boehringer Mannheim Hitachi 917 (07765)	Roche Cobas INTEGRA (55179)	Analyte: Haemophilus Influenzae, Type B (2510)
Roche Cobas INTEGRA (55179)	Analyte: Valproic Acid, Free (6702)	<i>Test System, Assay, Examination:</i>
Analyte: Quinidine (5202)	<i>Test System, Assay, Examination:</i>	Becton Dickinson Drtgen Meningitis Combo (inc. culture) (07726)
<i>Test System, Assay, Examination:</i>	Roche Cobas FARA II (55041)	Analyte: Moraxella Catarrhalis (4037)
Roche Cobas INTEGRA (55179)	Roche Cobas INTEGRA (55179)	<i>Test System, Assay, Examination:</i>
Analyte: Salicylates (5801)	Analyte: Vancomycin (6703)

Test System, Assay, Examination:

DynaGen MycoAKT Kit for M. kansasii (including culture) (13384)
Gen-Probe AccuProbe—M. kansasii (including culture) (22127)

Analyte: Mycobacterium Tuberculosis Complex (4015)

Test System, Assay, Examination:

Becton Dickinson BACTEC TB System (NAP Differentiat. Test) (07084)
Becton Dickinson BACTEC TB System (Susceptibility Test) (07222)
DynaGen MycoAKT Kit for M. tuberculosis Complex (inc. cult) (13385)

Gen-Probe AccuProbe—M. tuberculosis complex (inc culture) (22132)
Syngene Snap Culture ID Diagnostic Kit/M. tuberculosis cplx (58152)

Speciality/Subspeciality: Mycology

Analyte: Fungi—Fungal Elements Only (1910)

Test System, Assay, Examination:

Remel Calcofluor White Stain Kit (55206)

Analyte: Yeast (7601)

Test System, Assay, Examination:

Remel Calcofluor White Stain Kit (55206)

Speciality/Subspeciality: Parasitology

Analyte: Acanthamoeba (0523)

Test System, Assay, Examination:

Remel Calcofluor White Stain Kit (55206)

Analyte: Cryptosporidium (1109)

Test System, Assay, Examination:

Alexon ProSpecT Giardia/Crypto. Microplate (dirAg/spectro) (04655)
Alexon ProSpecT Giardia/Crypto. Microplate (dirAg/visual) (04654)

Analyte: Entamoeba Histolytica (1631)

Test System, Assay, Examination:

TechLab Entamoeba Test (spectrophotometer) (61169)
TechLab Entamoeba Test (visual) (61168)

Analyte: Giardia lamblia (2222)

Test System, Assay, Examination:

Alexon ProSpecT Giardia/Crypto. Microplate (dirAg/spectro) (04655)
Alexon ProSpecT Giardia/Crypto. Microplate (dirAg/visual) (04654)
TechLab CeLLabs Giardia-Cel IF Test (61218)
Trend Scientific Giardia Direct Detection RS Test (61204)

Analyte: Microsporidia (4039)

Test System, Assay, Examination:

Remel Calcofluor White Stain Kit (55206)

Analyte: Pneumocystis (4926)

Test System, Assay, Examination:

DAKO Quick Staining Kit for Pneumocystis carinii (13376)
Remel Calcofluor White Stain Kit (55206)

Speciality/Subspeciality: Toxicology / TDM

Analyte: Amphetamines (0428)

Test System, Assay, Examination:

Beckman Synchron CX 4 (CEDIA DAU/manual curve) (07722)
Beckman Synchron CX 5 (CEDIA DAU/manual curve) (07723)

Announcement of Boards Approved by HHS

In the personnel regulations at § 493.1443(b)(3)(i), individuals with an earned doctoral degree in a chemical, physical, biological or clinical laboratory science and certification by a board approved by HHS may qualify as a laboratory director. Under § 493.1455(a), individuals who meet the director qualification requirements of § 493.1443(b)(3)(i) may qualify as a clinical consultant. Under these provisions, four boards have been approved by HHS, and HHS has authority to recognize any certification board having comparable requirements. The American Board of Histocompatibility and Immunogenetics (ABHI) and the American Board of Medical Genetics (ABMG) applied for approval and submitted documentation on the education, training and experience required for certification. Both boards were determined to have credentialing requirements comparable to the boards currently approved by HHS, and ABHI and ABMG were subsequently notified that they meet CLIA requirements for board approval.

In this Notice we are announcing HHS approval of ABHI and ABMG certification to qualify individuals as laboratory directors and clinical consultants under the CLIA regulations. Individuals with a doctoral degree in a chemical, physical, biological or clinical laboratory science and certification by ABHI or ABMG meet the CLIA qualification requirements to serve as a laboratory director or clinical consultant.
