Outer Continental Shelf Air Regulations; Consistency Update for California

AGENCY: Environmental Protection Agency ("EPA").

ACTION: Notice of proposed rulemaking; consistency update.

SUMMARY: EPA is proposing to update a portion of the Outer Continental Shelf ("OCS") Air Regulations. Requirements applying to OCS sources located within 25 miles of states' seaward boundaries must be updated periodically to remain consistent with the requirements of the corresponding onshore area ("COA"), as mandated by section 328(a)(1) of the Clean Air Act ("the Act"), the Clean Air Act Amendments of 1990. The portion of the OCS air regulations that is being updated pertains to the requirements for OCS sources for which the South Coast Air Quality Management District (South Coast AQMD) and the Ventura County Air Pollution Control District (Ventura County APCD) are the designated COAs. The OCS requirements for the above Districts, contained in the Technical Support Document, are proposed to be incorporated by reference into the Code of Federal Regulations and are listed in the appendix to the OCS air regulations. Proposed changes to the existing requirements are discussed below.

DATES: Comments on the proposed update must be received on or before August 8, 1996.

ADDRESSES: Comments must be mailed (in duplicate if possible) to: EPA Air Docket (A-5), Attn: Docket No. A-93-16 Section XII, Environmental Protection Agency, Air and Toxics Division, Region 9, 75 Hawthorne St., San Francisco, CA 94105.

Docket: Supporting information used in developing the proposed notice and

copies of the documents EPA is proposing to incorporate by reference are contained in Docket No. A-93-16 Section XII. This docket is available for public inspection and copying Monday-Friday during regular business hours at the following locations:

EPA Air Docket (A-5), Attn: Docket No. A-93-16 Section XII, Environmental Protection Agency, Air and Toxics Division, Region 9, 75 Hawthorne St., San Francisco, CA 94105.

SUPPLEMENTARY INFORMATION:

Background

On September 4, 1992, EPA promulgated 40 CFR part 55¹, which established requirements to control air pollution from OCS sources in order to attain and maintain federal and state ambient air quality standards and to comply with the provisions of part C of title I of the Act. Part 55 applies to all OCS sources offshore of the States except those located in the Gulf of Mexico west of 87.5 degrees longitude. Section 328 of the Act requires that for such sources located within 25 miles of a state's seaward boundary, the requirements shall be the same as would be applicable if the sources were located in the COA. Because the OCS requirements are based on onshore requirements, and onshore requirements may change, section 328(a)(1) requires that EPA update the OCS requirements as necessary to maintain consistency with onshore requirements.

Pursuant to § 55.12 of the OCS rule, consistency reviews will occur (1) at least annually; (2) upon receipt of a Notice of Intent under § 55.4; or (3) when a state or local agency submits a rule to EPA to be considered for incorporation by reference in part 55. This notice of proposed rulemaking is being promulgated in response to the submittal of rules by two local air pollution control agencies. Public comments received in writing within 30 days of publication of this notice will be

considered by EPA before publishing a notice of final rulemaking.

Section 328(a) of the Act requires that EPA establish requirements to control air pollution from OCS sources located within 25 miles of states' seaward boundaries that are the same as onshore requirements. To comply with this statutory mandate, EPA must incorporate applicable onshore rules into part 55 as they exist onshore. This limits EPA's flexibility in deciding which requirements will be incorporated into part 55 and prevents EPA from making substantive changes to the requirements it incorporates. As a result, EPA may be incorporating rules into part 55 that do not conform to all of EPA's state implementation plan (SIP) guidance or certain requirements of the Act. Consistency updates may result in the inclusion of state or local rules or regulations into part 55, even though the same rules may ultimately be disapproved for inclusion as part of the SIP. Inclusion in the OCS rule does not imply that a rule meets the requirements of the Act for SIP approval, nor does it imply that the rule will be approved by EPA for inclusion in the SIP.

EPA Evaluation and Proposed Action

In updating 40 CFR part 55, EPA reviewed the rules submitted for inclusion in part 55 to ensure that they are rationally related to the attainment or maintenance of federal or state ambient air quality standards or part C of title I of the Act, that they are not designed expressly to prevent exploration and development of the OCS and that they are applicable to OCS sources. 40 CFR 55.1. EPA has also evaluated the rules to ensure they are not arbitrary or capricious. 40 CFR 55.12 (e). In addition, EPA has excluded administrative or procedural rules,² and requirements that regulate toxics which are not related to the attainment and maintenance of federal and state ambient air quality standards.

A. After review of the rules submitted by South Coast AQMD against the criteria set forth above and in 40 CFR part 55, EPA is proposing to make the following rules applicable to OCS sources for which the South Coast AQMD is designated as the COA.

1. *The following rules were submitted as revisions to existing requirements:* Rule 102 Definition of Terms (Adopted 11/17/95)

² After delegation, each COA will use its administrative and procedural rules as onshore. In those instances where EPA does not delegate authority to implement and enforce part 55, EPA will use its own administrative and procedural requirements to implement the substantive requirements. 40 CFR 55.14 (c)(4).

- Regulatory Flexibility Act
- The Regulatory Flexibility Act of 1980 requires each federal agency to perform a Regulatory Flexibility Analysis for all rules that are likely to have a "significant impact on a substantial number of small entities." Small entities include small businesses, organizations, and governmental jurisdictions.
- As was stated in the final regulation, the OCS rule does not apply to any small entities, and the structure of the rule averts direct impacts and mitigates indirect impacts on small entities. This consistency update merely incorporates onshore requirements into the OCS rule to maintain consistency with onshore regulations as required by section 328 of the Act and does not alter the structure of the rule.
- The EPA certifies that this notice of proposed rulemaking will not have a significant impact on a substantial number of small entities.

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of report availability; request for comments.

SUMMARY: The FHWA is requesting public comment on the final report and recommendations of the Alliance for Uniform HazMat Transportation Procedures (the Alliance) concerning the implementation of 49 U.S.C. 5119—formerly referred to as section 22 of the Hazardous Materials Transportation Uniform Safety Act of 1990 (HMTUSA). Section 5119 requires the Secretary of Transportation (the Secretary) to establish a working group of State and local government officials to establish uniform forms and procedures for the registration of persons that transport hazardous materials by motor vehicle, and to decide whether to limit the filing of State registration and permit forms and the collection of filing fees. The Alliance is the working group created to fulfill the requirements of the HMTUSA, and accordingly, has published its final report with recommendations which is now available to the public.

DATES: Written comments must be received on or before November 6, 1996.

ADDRESSES: Submit written, signed comments to FHWA Docket No. MC–96–10, room 4232, HCC–10, Office of the Chief Counsel, Federal Highway Administration, 400 Seventh Street, SW., Washington, D. C. 20590. All comments received will be available for examination at the above address from 8:30 a.m. to 3:30 p.m., e.t., Monday through Friday, except Federal holidays. SUPPLEMENTARY INFORMATION:

Background

Section 5119 of Title 49, United States Code, requires that the Secretary establish a working group of State and local government officials to develop recommendations on uniform forms and procedures that the States can use to register and permit persons that transport, or cause the transportation of, hazardous materials by motor vehicle. The working group is also required to make recommendations as to whether the filing of registration and permit forms, and the collection of related fees, should be limited to the State in which a person resides or has its principal place of business. In developing its recommendations, the group is required to consult with persons who are subject to these registration and permit requirements. The recommendations of the working group are to be included in a final report to the Secretary of Transportation.¹ Finally, section 5119 requires the issuance of regulations implementing those recommendations with which the Secretary agrees.

Section 5119 was originally enacted as section 22 of the Hazardous Materials Transportation Uniform Safety Act of 1990 (Pub. L. 101–615, 104 Stat. 3244; November 16, 1990). The HMTUSA amended the Hazardous Materials Transportation Act of 1974 (HMTA), Public Law 93–633, 88 Stat. 2156, which granted regulatory and enforcement authority to the Secretary to provide adequate protection against the risks to life and property inherent in the transportation of hazardous materials in commerce. The HMTA was designed to replace a patchwork of State and Federal laws and regulations concerning hazardous materials transportation with a scheme of uniform, national regulations. The HMTA and HMTUSA were repealed by Public Law 103–272 (108 Stat. 745, 1379; July 5, 1994) with the statutory provisions applicable to the transportation of hazardous materials recodified at 49 U.S.C. 5101 *et seq.*
