

applying per year, for an annual respondent burden of 1,040 hours.

The annual public reporting and recordkeeping burden for State/Tribal permit application information is estimated to average 5 hours per one-time response, with an estimated 4,000 permit applicants per year, for an annual respondent burden of 40,000 hours.

The public reporting and recordkeeping burden for a State/Tribal annual report is estimated to average 80 hours per response for 2 States/tribes per year, for an estimated total annual burden of 160 hours.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Send comments regarding the burden estimates, or any other aspect of the information collection including suggestions for reducing the burden, to the following addresses. Please refer to EPA ICR No. 0220.07 and OMB Control No. 2040-0168 in any correspondence.

Ms. Sandy Farmer, U.S. Environmental Protection Agency, Regulatory Information Division (2137), 401 M Street, SW, Washington, DC 20460.
and

Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for EPA, 725 17th Street, NW, Washington, DC 20503.

Dated: August 13, 1996.

David Schwarz,
Acting Director, Regulatory Information Division.

Agency Information Collection Activities Under OMB Review; EPA ICR Nos. 659.07, 660.06, 663.06, 1178.04, and 1415.03

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Requests (ICRs) abstracted below have been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICRs describe the nature of the information collections and their expected costs and burdens; where appropriate, they include the actual data collection instruments.

DATES: Comments must be submitted on or before September 18, 1996.

FOR FURTHER INFORMATION OR A COPY CALL:

Sandy Farmer at EPA, (202) 260-2740, and refer to the appropriate EPA ICR Number: 659.07, 660.06, 663.06, 1178.04, or 1415.03.

SUPPLEMENTARY INFORMATION:

Title: NSPS for Industrial Surface Coating: Large Appliances (Subpart SS); EPA ICR No. 659.07; OMB No. 2060-0108. This is a request for an extension of a currently approved collection.

Abstract: Owners or operators of each surface coating operation in a large appliance surface coating line must provide EPA, or the delegated State authority, with one-time notifications and reports, and must keep records as required of all facilities subject to the general NSPS (New Source Performance Standards) requirements. In addition, facilities subject to this subpart must install devices to measure and record operating temperatures, and must notify EPA or the State regulatory authority of the date upon which the demonstration of the equipment performance commences. Owners or operators must report all periods of emissions in excess of the standard. The notifications and reports enable EPA or the delegated State regulatory authority to determine that best demonstrated technology is installed and properly operated and maintained and to schedule inspections.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9. The Federal Register Notice with a 60-day comment period

soliciting comments on this collection of information was published on 03/26/96 (61 FR 13172).

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 23 hours per response. This estimate includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents: Large appliance surface coating lines.

Estimated No. of Respondents: 294.

Frequency of Collection: Quarterly.

Estimated Total Annual Burden on Respondents: 29,512 hours.

Estimated Total Annualized Cost Burden: \$618,000.

Title: NSPS for Metal Coil Surface Coating (subpart TT) (EPA ICR No. 660.06; OMB No. 2060-0107). This is a request for an extension of a currently approved collection.

Abstract: The provisions of the subpart apply to the following affected facilities in a metal coil surface coating operation: (1) Each prime coat operation; (2) each finish coat operation; and (3) each prime and finish coat operation combined when the finish coat is applied wet on wet over the prime coat and both coatings are cured simultaneously. Owners or operators of subject facilities must provide EPA, or the delegated State regulatory authority, with one-time notifications and initial compliance reports, and must keep records, as required of all facilities subject to the general NSPS requirements. Owners and operators of subject facilities must notify EPA or the State regulatory authority of the date upon which demonstration of the compliance devices commences. In addition, the owner or operator of the subject facilities must install and operate devices that control emissions and that measure and record the operating characteristics of those devices. Where compliance is achieved through the intermittent use of a control device, reports must include separate values of the weighted average VOC content of coatings used with and without the control device in operation.

Where compliance is achieved through the use of an emission control device that destroys VOCs, reports must include the combustion temperature for thermal incinerators, and the gas temperature both upstream and downstream of the incinerator catalyst bed. Owners or operators of subject facilities must report all emissions in excess of the standard quarterly. The notifications and reports enable EPA or the state delegated regulatory authority to determine that best demonstrated technology is installed and properly operated and maintained and to schedule inspections.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9. The Federal Register Notice with a 60-day comment period soliciting comments on this collection of information was published on 03/26/96 (61 FR 13172).

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 24 hours per response. This estimate includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents: Facilities having the following metal coil surface coating operations: (1) Prime coat operations, (2) finish coat operations; and (3) prime and finish coat operations combined when the finish coat is applied wet on wet over the prime coat and both coatings are cured simultaneously.

Estimated No. of Respondents: 143.

Frequency of Collection: Quarterly.

Estimated Total Annual Burden on Respondents: 13,839 hours.

Estimated Total Annualized Cost Burden: \$279,000.

Title: NSPS for Beverage Can Coating (Subpart WW) (EPA ICR No. 663.06; OMB No. 2060-0001). This is a request for an extension of a currently approved collection.

Abstract: The provisions of this subpart apply to the following affected

facilities in beverage can surface coating lines: (1) Each exterior base coating operation; (2) each over varnish coating operation; and (3) each inside spray coating operation. The owner or operator of an affected facility must provide EPA, or the delegated State regulatory authority, with one-time notifications and initial compliance reports, and must keep records, as required of all facilities subject to the general NSPS requirements.

In addition, owners or operators of affected facilities that apply only coatings with VOC content less than that specified in the regulations must provide a list of coatings and the VOC content of each coating used. Where one or more coatings do have VOC content higher than that specified in the regulation, owners or operators must install measuring and recording devices and report on specified operating characteristics of their equipment based on how compliance is achieved. If compliance is achieved through the use of thermal incineration the owner or operator must install equipment to measure and report on the temperature of the combustion gases upstream and downstream of the incinerator or combustion chamber. If compliance is achieved through the use of catalytic incineration, the owner or operator must install equipment to measure and report on upstream and downstream temperatures of the catalytic bed. If compliance is achieved through the use of a solvent recovery system, the owner or operator must install equipment to measure and report the amount of solvent recovered by the system for each affected facility.

The owner or operator of an affected facility must also notify EPA or the State regulatory authority of the date upon which demonstration performance commences. Owners or operators must report all periods of emissions in excess of the standard, and must report on monitoring system performance quarterly. The notifications and reports enable EPA or the delegated State regulatory authority to determine that best demonstrated technology is installed and properly operated and maintained and to schedule inspections.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9. The Federal Register Notice with a 60-day comment period soliciting comments on this collection of information was published on 03/26/96 (61 FR 13172).

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 29 hours per response. This estimate includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents: Owners or operators of beverage can surface coating lines.

Estimated No. of Respondents: 24.

Frequency of Response: Quarterly.

Estimated Total Annual Burden on Respondents: 3,092 hours.

Estimated Total Annualized Cost Burden: \$50,000.

Title: Standards of Performance of Volatile Organic Compound (VOC) Emissions from the Synthetic Organic Chemical Manufacturing Industry (SOCMI), Reactor Processes (Subpart RRR) (OMB Control No. 2060-0269; EPA ICR No. 1178.04). This is a request for an extension of a currently approved collection.

Abstract: The EPA uses the information collected under this part to identify sources subject to the standards and to insure that the best demonstrated technology is being properly applied. The standards require periodic recordkeeping to document process information relating to the sources' ability to meet the requirements of the standard and to note the operation conditions under which compliance was achieved.

Owners or operators of the affected facilities described must make the following one-time-only reports: Notification of the date of construction or reconstruction; notification of the anticipated and actual dates of startup; notification of any physical or operational change to an existing facility which may increase the regulated pollutant emission rate; notification of the date of the initial performance test; and the results of the initial performance test. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These

notifications, reports and records are required, in general, of all sources subject to NSPS.

An Agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR chapter 15. The Federal Register Notice with a 60-day comment period soliciting comments on this collection of information was published on 06/11/96 (61 FR 29555).

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 62 hours per response. This estimate includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Synthetic organic chemical manufacturers.

Estimated No. of Respondents: 203.

Frequency of Collection: semiannual.

Estimated Total Annual Burden on Respondents: 20,440 hours.

Estimated Total Annualized Cost Burden: \$102,200.

Title: NESHAAP for PCE Dry Cleaning Facilities (Subpart M) (OMB Control No. 2060-0234; EPA ICR No. 1415.03). This is a request for renewal of a currently approved information collection request.

Abstract: These standards apply to owners or operators of dry cleaning facilities that use perchloroethylene (PCE). Owners or operators of such facilities must provide EPA, or the delegated State regulatory authority, with the one-time notifications and reports. The owners or operators must also perform weekly monitoring (or biweekly for the smallest facilities) and must keep records for 5 years. The notification and reports enable EPA or the delegated State regulatory authority to determine whether the appropriate control technology is installed and properly operated and maintained, and to schedule inspections and/or compliance assistance activities. The

responses to this information collection are mandatory under Clean Air Act section 112 and 40 CFR Part 63, Subpart M. The responses are not anticipated to be kept confidential due to the nature of the information collected; however, any information submitted to the Agency for which a claim of confidentiality is made will be safeguarded according to the Agency policies set forth in 40 CFR Part 2.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15. The Federal Register Notice required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on March 26, 1996 (61 FR 13172). No comments were received.

Burden Statement: The annual public reporting burden for this collection of information is estimated to average 9 hours per response for new dry cleaning facilities and zero hours per response for existing dry cleaning facilities. The public recordkeeping burden is estimated to average 48 hours per respondent for a total 1,192,879 hours. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents: Dry cleaning facilities.

Estimated Number of Respondents: 25,090.

Frequency of Response: weekly or biweekly.

Estimated Total Annual Hour Burden: 1,212,055 hours.

Estimated Total Annualized Cost Burden: \$0.

Send comments on the Agency's need for the information in any of these collections, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the

following addresses. Please refer to the appropriate EPA ICR Number and OMB Control Number in any correspondence.

Performance Partnership Grants for State and Tribal Environmental Programs: Revised Interim Guidance

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: The "Performance Partnership Grants for State and Tribal Environmental Programs: Revised Interim Guidance" is the revised version of the Performance Partnership Grant (PPG) guidance dated December 1995. The revisions reflect the change in year and the existence of Congressional authority to award PPGs. A few other minor clarifications were also made. This revised guidance will serve as the operating guidance for States and Tribes interested in applying for PPGs.

PPGs are intended to provide States and Tribes with greater flexibility to address their highest environmental priorities, improve environmental performance, achieve administrative savings, and strengthen partnerships between EPA and the States or Tribes.

FOR FURTHER INFORMATION CONTACT:

Juanita Smith, Office of Water (4102), U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460, Telephone: (202) 260-6226, FAX: (202) 260-5711, or Jack Bowles, U.S. Environmental Protection Agency, Region VIII, 999 18th Street, Suite 500, Denver, CO 80202-2466, Telephone: (303) 312-6315, FAX: (303) 312-6067.

SUPPLEMENTARY INFORMATION: PPGs are a powerful funding tool that EPA is offering to eligible States and Tribes. A PPG is a multi-program grant made to a State or Tribal agency from funds otherwise available for categorical grant programs. A State or Tribe can combine funds from 2 or more of 16 eligible grant
