14 CFR Part 71

[Airspace Docket No. 95-AAL-4]

Revision of Class E Airspace; Ketchikan, AK

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action revises the Class E airspace at Ketchikan, AK. The FAA has developed a Global Positioning System (GPS) instrument approach procedure to RWY 31 and established a Special Visual Flight Rules (VFR) seaplane holding area at Ward Cove at Ketchikan, AK. This action is intended to provide adequate controlled airspace to contain instrument flight rule (IFR)

operations for aircraft executing instrument approach procedures and provide Special VFR seaplane holding at Ketchikan, AK.

EFFECTIVE DATE: 0901 UTC, January 30, 1997.

FOR FURTHER INFORMATION CONTACT:

Robert van Haastert, System Management Branch, AAL-538, Federal Aviation Administration, 222 West 7th Avenue, Box 14, Anchorage, AK 99513-7587; telephone number (907) 271-5863.

SUPPLEMENTARY INFORMATION:

History

On July 2, 1996, a proposal to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) to revise the Class E airspace at Ketchikan was published in the Federal Register (61 FR 34391). Revision of the Class E airspace is required for the IFR approach and departure procedures using GPS at Ketchikan, AK, and required for Special VFR seaplane holding at Ward Cove, Ketchikan, AK. This action will provide adequate controlled airspace for IFR operations and Special VFR seaplane holding at Ketchikan, AK.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments to the proposals were received. However the proposal was published without the coordinates for Clam Cove NDB, which has been added: lat. 55°20'44" N, long. 131°41'47" W. The FAA has determined that this change is editorial in nature and will not increase the scope of this rule. Except for the non-substantive changes just discussed, the rule is adopted as proposed.

The coordinates for this airspace docket are based on North American Datum 83. Class E airspace areas designated as airport surface areas are listed in paragraph 6002 and airspace designated as 700/1200 foot transition areas are published in Paragraph 6005 of FAA Order 7400.9D, dated September 4, 1995, and effective September 16, 1996, which are incorporated by reference in 14 CFR 71.1 (58 FR 36298; July 6, 1993). The Class E airspace designations listed in this document will be published subsequently in the Order.

The Rule

This amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) revises the Class E airspace located at Ketchikan, AK, to provide controlled airspace extending upward from the surface area for aircraft

executing instrument landing and departing procedures and Special VFR operations at Ward Cove.

The FAA has determined that these proposed regulations only involve an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
