

the public the information resulting from priority setting, screening, testing, and risk management decision-making.

EPA's intention is for the EDSTAC to be a consensus-building process. EDSTAC, therefore, needs to be structured in a manner conducive to collaboration and consensus building. In particular, EDSTAC's structure needs to balance the demand for inclusion of key stakeholders and relevant expertise with the need for a manageable number of participants. EPA believes that it is important to have representatives of the chemicals industry, Federal and state government; representatives from environmental, public health, and labor organizations; and scientific expertise from academia on the Committee. EDSTAC members will discuss both policy and scientific issues in an attempt to develop consensus recommendations on how to create and implement an endocrine disrupter screening and testing program. The group is expected to meet approximately once every two months over a period of one year. Because it will not be possible to include all of those who have an interest in this issue, opportunities will be provided during the course of EDSTAC's deliberations to ensure that all voices will be heard. One of the primary agenda items for the October 31–November 1, 1996, meeting is to address questions of formation and membership of EDSTAC and procedures for ensuring that all stakeholders have an opportunity to be heard on the issues.
