For a period of thirty [30] days following the date of publication of this notice, the Agency will receive written comments relating to the settlement agreement. EPA or the Department of Justice may withhold or withdraw consent to the proposed settlement agreement if the comments disclose facts or circumstances that indicate that such consent is inappropriate, improper, inadequate, or inconsistent with the requirements of the Act.

Notwithstanding any other provisions of law, no person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Questions concerning the OMB control numbers and expiration dates should be directed to Dorothy Conway, Federal Communications Commission, (202) 418-0217.

Description: On June 28, 1996 the Commission adopted a NPRM proposing certain modifications to our broadband

personal communications service (PCS) rules to expand our geographic partitioning and spectrum disaggregation provisions. The Commission believes that the proposals made will facilitate the efficient use of broadband PCS spectrum by providing licensees with additional flexibility to tailor their business strategies, will increase competition by allowing market entry by new players, and will expedite the provision of broadband PCS service to areas that may not otherwise receive broadband PCS or other wireless services in the near future. For ease of administration and to lessen the burden on applicants by adopting new filing requirements we propose to follow existing partial assignment procedures for broadband PCS licenses in reviewing requests for geographic partitioning, disaggregation or a combination of both.

Rules governing certain equipment operating the licensed services also require equipment authorizations established in procedural rules in Part 2. Such a showing of compliance aids in controlling potential interference to radio communications, and the data may be used for investigating complaints of harmful interference.

(Section 74.24 states that classes of broadcast auxiliary stations may be operated on a short-term basis under the authority conveyed by a Part 73 licensee without prior authorization from the FCC, subject to certain conditions.) The data is used by FCC staff to insure that the temporary operation of a low power auxiliary station will not cause interference to other existing stations and to assure compliance with current FCC rules and regulations.
