

10 CFR 50.59 requirements are not being met. Application of this example requires weighing factors such as: (a) the time period over which the violations occurred and existed, (b) the number of failures, (c) whether one or more systems, functions, or pieces of equipment were involved and the importance of such equipment, functions, or systems, and (d) the potential significance of the failures;

13. The failure to update the FSAR as required by 10 CFR 50.71(e) where the unupdated FSAR was used in performing a 10 CFR 50.59 evaluation and as a result, an inadequate decision was made demonstrating a significant regulatory concern; or

14. The failure to make a report required by 10 CFR 50.72 or 50.73 associated with (a) an unreviewed safety question, (b) a conflict with a technical specification, or (c) any other Severity Level III violation.

D. Severity Level IV—Violations involving for example:

* * * * *

2. [Reserved]

* * * * *

5. Relatively isolated violations of 10 CFR 50.59 not involving severity level II or III violations that do not suggest a programmatic failure to meet 10 CFR 50.59. Relatively isolated violations or failures would include a number of recently discovered violations that occurred over a period of years and are not indicative of a programmatic safety concern with meeting 10 CFR 50.59 or 50.71(e);

6. A relatively isolated failure to document an evaluation where there is evidence that an adequate evaluation was performed prior to the change in the facility or procedures, or the conduct of an experiment or test;

7. A failure to update the FSAR as required by 10 CFR 50.71(e) where an adequate evaluation under 10 CFR 50.59 had been performed and documented; or

8. A past programmatic failure to meet 10 CFR 50.59 and/or 10 CFR 50.71(e) requirements not involving Severity Level II or III violations that does not reflect a current safety or regulatory concern about the accuracy of the FSAR or a concern that 10 CFR 50.59 requirements are not being met.

E. Minor Violations:

A failure to meet 10 CFR 50.59 requirements that involves a change to the FSAR description or procedure, or involves a test or experiment not described in the FSAR, where there was not a reasonable likelihood that the change to the facility or procedure or the conduct of the test or experiment

would ever be an unreviewed safety question. In the case of a 10 CFR 50.71(e) violation, where a failure to update the FSAR would not have a material impact on safety or licensed activities. The focus of the minor violation is not on the actual change, test, or experiment, but on the potential safety role of the system, equipment, etc. that is being changed, tested, or experimented on.
