

On page 278, in instruction 1, the word reporting is changed to report. On page 301 the reference to page 104 in instruction 5 is changed to 108. Portions of the index were modified to correct page references and add some new references.

On pages 1, 230, and 254, items or lines were renumbered to ensure every item or line number has a unique reference. A unique reference is necessary for footnotes. For the same reason, line numbers were added to pages 2, 3, 102, and 103.

Unnecessary lines were removed from pages 220 and 336. On pages 253 and 340, the instruction to add additional columns if deemed appropriate with respect to any account is eliminated.

Several pages require the respondent to report data which will require an unknown number of rows. The number of rows necessary to report the data will depend on the respondent's business. In Form No. 11, the issue of variable numbers of rows was solved by allowing the respondent to insert rows. Where a row is inserted between line number 3 and line number 4, the row is numbered 3.01. Subsequent inserted lines are numbered 3.02, 3.03, etc. This solution is adopted for Form Nos. 2 and 2-A. Pages 118, 119, 120, 121, 219, 234, 235, 274, 275, 276, 277, 338, 355, 518, and 520 are modified to permit variable numbers of rows to be inserted.

Several pages have space at the bottom of the page to enter notes. The pre-existing electronic filing instructions required all notes to be entered as footnotes. Based on deliberations with the working group participants, the space for notes on pages 234, 235, 255, 274, 275, 276, 277, and 338 is eliminated. In some cases the added flexibility granted by variable rows made the space for notes unnecessary. In other cases, the notes could be handled as footnotes. On page 255, the entire response is text therefore the word notes at the top of the page is misleading.

In some cases, the respondent is asked to enter an asterisk to mark data meeting a specified condition, such as, marking an associated company. To conform the paper form to the electronic form, the asterisk will be entered in a separate column. Pages 212, 213, 222, 223, 252, 332, 357, and 514 are modified to add a column to report an asterisk where applicable.

The footnote page is split in two. Previously the footnote page consisted of a report of the page number, the line number, the column letter, and the footnote text. This configuration did not permit the respondent to enter footnote text once and refer to it many times. To

add this capability, the first footnote page, page 551, consists of the page number, line or item number, the column letter, and the footnote number. The second footnote page, page 552, consists of the footnote number and the footnote text. Page 551 will be sorted by page number. Page 552 will be sorted by footnote number. A general instruction is added to page iii explaining this change. Permitting the respondent to enter a footnote once which can be referred to more than once saves processing time and paper.

All of the changes outlined above apply to the Form No. 2 and also to Form No. 2-A if the referenced page is part of Form No. 2-A. The modified instructions in the attachments are effective for the 1996 report year to be filed in 1997.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[FRL-5648-1]

Agency information collection activities: Proposed Collection; Comment Request; Significant New Alternatives Policy (SNAP) Program Final Rulemaking Under Title VI of the Clean Air Act Amendments of 1990

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that EPA is planning to submit the following proposed and/or continuing Information Collection Request (ICR) to the Office of Management and Budget (OMB): Significant New Alternatives Policy (SNAP) Program Final Rulemaking under Title VI of the Clean Air Act Amendments of 1990, OMB Control No. 2060-0226, Expiration Date February 28, 1997. Before submitting the ICR to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collection as described below.

DATES: Comments must be submitted on or before January 6, 1997.

ADDRESSES: Written comments should be sent to: Docket A-91-42, Central Docket Section, South Conference Room 4, U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC, 20460. Interested persons may make a copy of the ICR without charge from

the docket. The docket is open between 8 a.m. and 4:00 p.m. on weekdays. The telephone number is (202) 260-7549, and the fax number is (202) 260-4400. To expedite review of comments, a second copy of the comments should be sent to Carol Weisner, Stratospheric Protection Division, Mail Code 6205J, EPA, 401 M Street, Washington, DC 20460. Overnight mail should be sent to our 501-3rd Street, NW, Washington, DC 20001 street address.

FOR FURTHER INFORMATION CONTACT: Carol Weisner at (202) 233-9193, or fax (202) 233-9665.

SUPPLEMENTARY INFORMATION:

Affected entities: Entities potentially affected by this action are those which manufacture, formulate, and/or sell substitutes for ozone-depleting chemicals.

Title: Significant New Alternatives Policy (SNAP) Program Final Rulemaking under Title VI of the Clean Air Act Amendments of 1990, OMB Control No. 2060-0226, Expiration Date February 28, 1997.

Abstract: Information collected under this rulemaking is necessary to implement the requirements of the Significant New Alternatives Policy (SNAP) program for evaluating and regulating substitutes for ozone-depleting chemicals being phased out under the stratospheric ozone protection provisions of the Clean Air Act (CAA). Under CAA section 612, EPA is authorized to identify and restrict the use of substitutes for class I and class II ozone-depleting substances where EPA determines other alternatives exist that reduce overall risk to human health and the environment. The SNAP program, based on information collected from the manufacturers, formulators, and/or sellers of such substitutes, provides for the identification of acceptable substitutes. Anyone submitting confidential business information (CBI) as part of an information collection subject to this ICR must assert and substantiate a claim of confidentiality for the data under 40 CFR, Part 2, Subpart B, at the time of submission. Under CAA section 114(c), emissions information may not be claimed as confidential. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15.

The EPA would like to solicit comments to:

(i) evaluate whether the proposed collection of information is necessary

for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) enhance the quality, utility, and clarity of the information to be collected; and

(iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: EPA estimates the projected hour burden of the renewed information collection is an annual total of 16,630 hours. This annual total includes an estimated average annual reporting burden of 8,880 hours and an estimated average annual recordkeeping burden of 7,750 hours. The average annual reporting burden is calculated from an estimated average of 148 burden hours per response, a one-time only frequency of response, and an estimated 60 likely respondents. The average annual recordkeeping burden is calculated from an estimated average of 310 recordkeepers and an estimated 25 burden hours per recordkeeper. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources, complete and review the collection of information; and transmit or otherwise disclose the information.

Dated: October 31, 1996.

Reynaldo Forte,

Acting Director, Stratospheric Protection Division.

[FRL-5648-5]

Agency Information Collection Activities: Submission for OMB Review; Comment Request; Information Collection Request for Solid Waste Disposal Facility Criteria

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the following Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval: Solid Waste Disposal Facility Criteria, RCRA Part 258, OMB Control Number; 2050-0122, expiring December 31, 1996. The ICR describes the nature of the information collection and its expected burden and cost; where appropriate, it includes the actual data collection instrument.

DATES: Comments must be submitted on or before December 6, 1996.

FOR FURTHER INFORMATION OR A COPY CALL: Sandy Farmer at EPA, (202) 260-2740, and refer to EPA ICR No. 1381.05

SUPPLEMENTARY INFORMATION:

Title: Solid Waste Disposal Facility Criteria RCRA Part 258, (OMB Control Number; 2050-0122; EPA ICR No. 1381.05). This is a request for extension of a currently approved collection.

Abstract: Under statutory authority found in RCRA Part 258, EPA established mandatory regulations (See 40 CFR Part 258) that established the criteria for Municipal Solid Waste Landfills (MSWLFs) that co-dispose of sewage sludge and that receive ash from municipal waste combustion (MWC) facilities (including ash monofills). EPA believes these requirements mitigate potential hazards to human health and the environment from the potential mismanagement by owners or operators of MSWLFs. This information will be used by the State Director to confirm owner or operator compliance with the regulations under Part 258.

The Part 258 Criteria requires that information be recorded in the MSWLF operating record as it becomes available and that this information be retained by the owner or operator of each MSWLF unit and made available to the State upon request. The following information is requested: demonstrations that facilities meet the requirements for the "small" landfill exemption; any required location restriction demonstrations; training procedures, monitoring results, and demonstrations required by operating

requirements; demonstrations required under Subpart D—Design Criteria; any monitoring, testing, or analytical data required for groundwater monitoring and corrective action; closure and post-closure care plans and any monitoring, testing, or analytical data required by Sections 258.60 and 258.61; and any cost estimates and financial assurance documentation required under Subpart G—Financial Assurance Criteria.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15. The Federal Register Notice required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on 7/30/96 (61 FR 39641); no comments were received.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 85 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: 3500.

Estimated Number of Respondents: 3500.

Frequency of Response: On occasion.

Estimated Total Annual Hour Burden: 297,800 hours.

Estimated Total Annualized Cost Burden: \$12,667,314.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses. Please refer to EPA ICR No. 1381.05 and OMB Control No. 2050-0122 in any correspondence.

Ms. Sandy Farmer, U.S. Environmental Protection Agency, OPPE Regulatory
