

ENVIRONMENTAL PROTECTION AGENCY**40 CFR Part 147**

[FRL-5629-4]

Montana Board of Oil and Gas Conservation; Underground Injection Control (UIC) Program; Primacy Program Approval**AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Approval of Montana Underground Injection Control Program.

SUMMARY: The state of Montana, through the Montana Board of Oil and Gas Conservation (MBOGC) has submitted an application to EPA under Section 1425 of the Safe Drinking Water Act (SDWA), 42 U.S.C. 300h-1, for approval of an Underground Injection Control (UIC) program governing Class II (i.e., oil and gas) injection wells. After careful review of the application, the EPA has determined that the MBOGC's UIC program for Class II injection wells meets the requirements of the SDWA and, therefore, approves it.

EFFECTIVE DATE: This approval shall become effective on November 19, 1996. The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of November 19, 1996.

ADDRESSES: The public docket and support documents for this rulemaking are available for review during normal business hours at the Environmental Protection Agency, Region VIII, 999 18th Street, Suite 500, Denver, CO 80202-2466.

FOR FURTHER INFORMATION CONTACT: Paul S. Osborne, Ground Water Program (8P2-W-GW); Environmental Protection Agency, Region VIII, 999 18th Street, Room 4P-114, Denver, CO 80202-2466, Phone: 303-312-6125.

SUPPLEMENTARY INFORMATION: Part C of the SDWA contains provisions for state administration of UIC programs. Section 1421 of the SDWA requires the Administrator to promulgate minimum requirements for effective State programs to prevent underground injection activities which endanger underground sources of drinking water (USDW). To obtain federal approval, the State must submit to the Administrator an application showing that the State: (1) has adopted, after reasonable notice and public hearings, a UIC program that meets the requirements of regulations in effect under section 1421 of the SDWA; and (2) will keep such records and make such reports with respect to its UIC

program as the Administrator may require by regulations. After reasonable opportunity for public comment, the Administrator shall, by rule, approve, disapprove, or approve in part, the State UIC program.

The SDWA was amended on December 5, 1980, to include section 1425. Section 1425 established an alternative method by which a State may obtain primary enforcement responsibility for a UIC program to regulate the following types of injection practices: injection of fluids produced during oil or gas production, injection of fluids for the storage of hydrocarbons, and injection of fluids for enhanced recovery of oil and natural gas. Specifically, instead of meeting the federal regulations in 40 Code of Federal Regulations (CFR) parts 124, 144, 145, 148, and the related technical criteria and standards in 40 CFR part 146, a State may demonstrate that its program meets the more general statutory requirements of section 1421(b)(1)(A) through (D) and represents an effective program to prevent endangerment of USDWs.

On September 14, 1995, the MBOGC submitted a complete application under Section 1425 of SDWA, for primary enforcement authority for Class II wells on all State, private, and federal leases in Montana, excluding those on land within Indian Country. EPA published notice in the FR on December 15, 1995, to request public comments, and to schedule a public hearing. A similar public notice was also published in a daily Montana newspaper on December 15, 1995. A public hearing was held on January 18, 1996, in Billings, Montana. No significant negative comments were received. The comments, which were generally supportive of the MBOGC's application, and a responsiveness summary are contained in the public record for today's decision.

After careful review of the application and comments received from the public, the EPA has determined that the MBOGC UIC program for Class II injection wells meets the requirements of section 1425 of the SDWA and is hereby approved. Inasmuch as the State of Montana has not requested jurisdiction to administer the Class II UIC program on Indian lands, EPA's delegation of primary enforcement authority for Class II injection wells does not extend to "Indian Country", as defined in 18 U.S.C. part 1151, including the following reservations within the State:

1. Blackfeet
2. Crow
3. Flathead

4. Fort Belknap
5. Fort Peck
6. Northern Cheyenne
7. Rocky Boys

In withholding program approval for Indian Country, EPA is not making a determination that the State either has adequate jurisdiction or lacks such jurisdiction. EPA will continue to administer the Class II UIC program on Indian leases and in Indian Country unless and until future approval for such administration is granted to either the State of Montana or an Indian tribe.

This program replaces the existing EPA-administered program for all Class II injection wells in non-Indian Country in the State of Montana. EPA promulgated a UIC program for all wells in Montana (including those in Indian Country) on June 24, 1984, in order to comply with the requirements of the SDWA to promulgate a Federally-administered program. Now that EPA has determined that the State-administered program will meet all applicable Federal requirements, the EPA is withdrawing the EPA-administered program for Class II injection wells in non-Indian Country and establishing the State-administered program as the applicable UIC program for Class II injection wells in non-Indian Country in the State of Montana. EPA continues to administer the UIC program for Class I, III, IV, and V wells and Class II wells for Indian lands in the State of Montana. EPA will also have an oversight role in the administration of the Class II program in Montana outside of Indian Country. EPA's approval will be codified in Part 147 of 40 CFR, State Underground Injection Control Programs in § 147.1350 currently reserved for the state-administered program. State statutes and regulations that contain standards, requirements, and procedures applicable to owners or operators are incorporated by reference into the federal regulations. Any provisions incorporated by reference, as well as all permit conditions or permit denials issued pursuant to such provisions, are enforceable by EPA pursuant to section 1423 of the SDWA. See 40 CFR 147.1(3).

The Office of Management and Budget (OMB) has determined that this rule is not a "significant regulatory action" under the terms of Executive Order 12866 and is therefore not subject to OMB review. EPA has determined that an Information Collection Request under the Paperwork Reduction Act, 44 U.S.C. 3501 et seq., is unnecessary because today's decision imposes no new federal reporting or record-keeping requirements.

The Regulatory Flexibility Act (RFA) provides that, whenever an agency promulgates a final rule following notice and comment on rulemaking under 5 U.S.C. § 553, an agency must prepare a final regulatory flexibility analysis unless the head of the agency certifies that the final rule will not have a significant economic impact on a substantial number of small entities.

Pursuant to section 605(b) of the RFA, the Administrator certifies that approval of the Montana UIC program will not have a significant economic impact on a substantial number of small entities. EPA's approval action does not impose any new economic impacts on affected small entities in the State of Montana and therefore no final regulatory flexibility analysis has been prepared. This is true for several reasons. First, the immediate impact of the rule is on the State of Montana itself. Second, there is no subsidiary economic impact on small entities that flows from EPA's action in approving the Montana program. The economic impact on small entities in Montana arises as the direct result of Montana's earlier action in adopting its own UIC program. The obligation of small entities to comply with the Montana requirements antedates EPA's action and the nature of that obligation has not been changed by today's approval action.

While one effect of today's action is to make Montana's requirements enforceable in federal court under the Safe Drinking Water Act, the requirements remain the same. Because facilities were already obliged to comply with the state requirements, making the requirements federally enforceable does not represent a new or *additional* economic burden on affected entities within the meaning of the RFA.

Under section 801(a)(1)(A) of the Administrative Procedures Act (APA) as amended by the Small Business Regulatory Enforcement Fairness Act of 1996, EPA submitted a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives and the Comptroller General of the General Accounting Office prior to publication of the rule in today's Federal Register. This rule is not a "major rule" as defined by section 804(2) of the APA as amended.

Pursuant to Executive Order 12898 (59 FR 7629, February 16, 1994), the Agency has considered environmental justice related issues with regard to the potential impacts of this action on the environmental and health conditions in low-income and minority communities. The Agency has determined that since this rule merely authorizes Montana to implement what had previously been a

Federal program, there are no environmental justice issues raised.

Pursuant to Title II of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4), EPA has determined that this regulatory action does not contain any "federal mandates," as described in the Act, for the States, local or tribal governments or the private sector. The rule merely authorizes the State of Montana to implement the Class II Underground Injection Control Program in the State. Montana has requested this authority from EPA.

In light of the lack of significant public comment received on the proposal, there is good cause for making this approval effective immediately. 5 U.S.C. (553(d)).

For the reasons set out in the preamble, part 147 of title 40 of the Code of Federal Regulations is amended as follows:

PART 147—STATE UNDERGROUND INJECTION CONTROL PROGRAMS

1. The authority citation for part 147 continues to read as follows:

Authority: 42 U.S.C 300h; and 42 U.S.C. 6901 *et seq.*

2. Subpart BB is amended by revising § 147.1350 to read as follows:

§ 147.1350 State-administered programs—Class II wells.

The UIC program for Class II injection wells in the State of Montana, except for those in Indian Country, is the program administered by the Montana Board of Oil and Gas Conservation (MBOGC) approved by the EPA pursuant to Section 1425 of the SDWA. Notice of this approval was published in the Federal Register on November 19, 1996; the effective date of this program is November 19, 1996. This program consists of the following elements as submitted to EPA in the State's program application:

(a) *Incorporation by reference.* The requirements set forth in the State statutes and regulations cited in this paragraph are hereby incorporated by reference and made part of the applicable UIC program under the SDWA for the State of Montana. This

incorporation by reference was approved by the Director of the FR in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained at the Montana Board of Oil and Gas Conservation, 2535 St. Johns Avenue, Billings, Montana, 59102. Copies may be inspected at the Environmental Protection Agency, Region VIII, 999 18th Street, Suite 500, Denver, Colorado, 80202-2466, or at the Office of the Federal Register, 800 North Capitol Street, NW, Suite 700, Washington, D.C.

(1) Montana Statutory Requirements Applicable to the Underground Injection Control Program, August, 1996.

(2) Montana Regulatory Requirements Applicable to the Underground Injection Control Program, August, 1996.

(b) *Memorandum of Agreement (MOA).* (1) The MOA between EPA Region VIII and the MBOGC signed by the Acting EPA Regional Administrator on June 9, 1996.

(2) Letter dated May 24, 1996, from the Administrator of the MBOGC and the attached addendum (Addendum No. 1-96) to the MOA between MBOGC and EPA Region VIII, signed by the Acting EPA Regional Administrator on August 14, 1996.

(c) *Statement of legal authority.* (1) Letter from the Montana Attorney General to the Regional Administrator dated August 1, 1995.

(2) MBOGC independent counsel's certification of Montana's UIC program for Class II wells dated July 24, 1995.

(3) Letter dated March 8, 1996, from MBOGC independent counsel to USEPA, Region VIII; "Re: EPA comments of November 29, 1995, on Montana Class II primacy application."

(4) Letter dated March 8, 1996, from the Administrator of the MBOGC and the attached proposed replacement language for the MOA; "Re: Responses to EPA comments on Montana Class II Primacy Application."

(d) *Program Description.* The Program Description and any other materials submitted as part of the application or as supplemented thereto:

(1) Application and accompanying materials for approval of Montana's UIC program for Class II wells submitted by the Governor of Montana, August 3, 1995.

(2) (reserved)

3. Section 147.1351 is amended by revising first the sentence of paragraph (a) to read as follows:

§ 147.1351 EPA-administered program.

(a) *Contents.* The UIC program in the State of Montana for Class I, III, IV, and

V wells, and for all Classes of wells in Indian Country is administered by EPA.
