

support structure of columns and beams with cross braces. High bays are offset by rows of windows at the ceiling. Early site documents used for the original radiological survey noted that uranium was machined on lathes in the large machine room on the first floor of this section of the building. A portion of the first floor is currently occupied by Union Paper Company. The remainder of the building is unoccupied and is used for storage.

On August 29 and 30, 1988, and April 24, 1989, radiological surveys were conducted at the request of DOE and with the consent of the property owner. The results of the radiological surveys revealed no radionuclide concentrations in excess of the applicable DOE criteria for air and soil on the first floor, and no beta or gamma radiation above background could be detected. Consequently, the site was eliminated from consideration under FUSRAP.

Later interviews with individuals formerly associated with the site revealed that uranium machining operations for MED also occurred in the southeastern corner of the building in a section with three floors, accessed by a stairwell and an elevator. Uranium was machined on the third floor in a room with concrete columns. Radiological surveys performed in 1988 and 1989 did not include that area of the building because it has not been previously identified as an area where uranium operations had taken place. A third radiological survey, conducted by Oak Ridge National Laboratory in 1993, identified uranium in portions of the floor and walls of the 9,000-square-foot third floor area. Also, it was determined from historical records that MED and/or its agents exercised significant control over the fabrication process and that MED had an on-site representative during some operations. In June 1993, the property was designated for remedial action by FUSRAP. Remedial action was conducted at the site from December 1994 to March 1995.

Post-remedial action surveys have demonstrated and DOE has certified that the subject property is in compliance with DOE radiological decontamination criteria and standards. The standards are established to protect members of the general public and occupants of the properties and to ensure that future use of the properties will result in no radiological exposure above applicable health-based guidelines. Accordingly, this property is released from FUSRAP.

The certification docket will be available for review between 9:00 a.m. and 4:00 p.m., Monday through Friday (except Federal holidays) in the DOE Public Reading Room located in Room

1E-190 of the Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585. Copies of the certification docket will also be available in the DOE Public Document Room, U.S. Department of Energy, Oak Ridge Operations Office, Oak Ridge, Tennessee, 37831, and in the Lane Public Library, 300 N. Third Street, Hamilton, Ohio, 45011.

DOE, through the Oak Ridge Operations Office, Former Sites Restoration Division, has issued the following statement:

Statement of Certification: Herring-Hall-Marvin Safe Company Site in Hamilton, Ohio

DOE, Oak Ridge Operations Office, Former Sites Restoration Division, has reviewed and analyzed the radiological data obtained following remedial action at the Herring-Hall-Marvin Safe Company Site in Hamilton, Ohio. Based on analysis of all data collected, including post-remedial action surveys, DOE certifies that any residual contamination on the site falls within current guidelines for use without radiological restrictions. This certification of compliance provides assurance that reasonably foreseeable future use of the site will result in no radiological exposure above current radiological guidelines established to protect members of the general public as well as occupants of the site.

Property owned by William Burchfield, 1550 Grand Boulevard, Hamilton, Ohio 45011.

Issued in Washington, D.C., on November 25, 1996.

James M. Owendoff,

Deputy Assistant Secretary for Environmental Restoration.

Texas Eastern states that the purpose of this filing is to (1) delete the Index of Firm Customers from its tariff and

replace it with a statement indicating that the index is available on Texas Eastern's Electronic Bulletin Board (EBB), and (2) update the title pages to reflect the correct person to whom communications regarding the tariff should be sent. Texas Eastern states that it is in compliance with the electronic filing requirements of Section 284.106(c) of the Commission's Regulations, regarding the posting of the current Index of Firm Customers on its EBB in a downloadable format each calendar quarter and submitting the electronic file to the Commission. Accordingly, pursuant to Section 154.111(a) of the Commission's Regulations, Texas Eastern is not required to provide an index of customers in its tariff.

Texas Eastern states that copies of the filing were served on firm customers of Texas Eastern and interested state commissions.

Any person desiring to be heard or to protest this filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, DC 20426, in accordance with Sections 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations.
