POLICY JUSTIFICATIONSpain - Assault Amphibious Vehicles

The Government of Spain has requested the purchase of 20 vehicles, with ancillary equipment, from the family of Assault Amphibious Vehicles (AAV), communications equipment, 17 HBM2 .50 caliber machine guns, 17 M19 40MM machine guns, 17 M257 smoke grenade launchers, two M240 7.62 machine guns, spare and repair parts, support equipment, publications and technical data, personnel training and training equipment, U.S. Government and contractor technical and logistics services and other related elements of program support. The estimated cost is \$50 million.

This sale will contribute to the foreign policy and national security objectives of the United States by improving the military capabilities of Spain.

Spain will use this new equipment as replacements for its current inventory of amphibious vehicles, previously procured from the United States Government, and to modernize and strengthen its Naval operational amphibious capability in support of national defense objectives. Having had previous operational experience with amphibious vehicles, Spain will have no difficulty absorbing this new equipment into its armed forces.

The sale of these vehicles and support will not affect the basic military balance in the region.

The Assault Amphibious Vehicles will be procured for Spain through a competitive procurement. There are no offset agreements proposed in connection with this potential sale.

Implementation of this sale will not require the assignment of any additional U.S. Government personnel or contractor representatives to Spain.

There will be no adverse impact on U.S. defense readiness as a result of this sale.
