

and may often be better managed than in the country of origin. It may be more economically efficient to export wastes to the United States for management in existing U.S. facilities, particularly for specialized waste streams and substances, than to construct new facilities in the country of origin. In many cases, advanced facilities in the United States enable the environmentally sound recovery of valuable secondary materials.

Under the type of import agreements described in this notice, the Environmental Protection Agency (EPA), the designated competent authority of the U.S. Government, will be able to express its consent, conditional consent, or objection to proposed imports of hazardous wastes. EPA will exercise its prerogative to consent or object to imports consistent with its statutory and regulatory authority. Current U.S. Government policy is to withhold consent only if it has reason to believe a shipment may not be managed in accordance with applicable U.S. laws and regulations.

Based on experience to date, the negotiation of each agreement is likely to take some time (several months). Administration resources are limited, and it is not expected that additional resources will be available for these purposes. In addition, the notice and consent procedures referred to above will impose an increased administrative burden on the U.S. Government. Once the U.S. Government evaluates the demand for these agreements, it will consider how many agreements to enter into, and how to prioritize requests, if necessary.

Public Comment

The Department of State is seeking the comment from the public on the potential demand for additional agreements for the movements of Basel-covered waste to the United States, and would be interested in the following specific information, where applicable, from firms and others with an interest in such agreements:

- (a) Expected country of export, expected amount and frequency of such exports to the United States;
- (b) whether more than one generator produces wastes which could be handled under an agreement;
- (c) types of waste (including whether the wastes are considered to be hazardous under the Convention and/or under the laws and regulations of the United States or the exporting party);
- (d) whether such wastes are for final disposal or treatment or recovery, and whether a substantially increased

proportion is likely to be recovered in the future;

(e) whether such wastes are being exported because of a lack of adequate management capabilities and/or pressing environmental conditions in the exporting country;

(f) whether destinations closer than the United States to the generation of the waste would also provide environmentally sound and efficient management;

(g) whether U.S. waste management capabilities are superior to those in the exporting country; and

(h) whether acceptance of such wastes by the United States would reasonable be expected to provide a disincentive to the future development of adequate environmental facilities in the exporting country;

(i) whether any other conditions require that such wastes be exported to the United States for disposal or recovery.

The State Department will use this information to determine whether, given available resources, it will be necessary to develop criteria for entering into and prioritizing among proposed bilateral agreements. The State Department welcomes public input regarding such criteria.

[STB Finance Docket No. 32870]

David L. Durbano—Continuance in Control Exemption—Cimarron Valley Railroad, L.C.

David L. Durbano (Applicant), a noncarrier, has filed a verified notice under 49 CFR 1180.2(d)(2) to continue in control of Cimarron Valley Railroad, L.C. (CVR), upon CVR's becoming a Class III rail carrier. Consummation was expected to occur on or shortly after February 23, 1996.

CVR, a noncarrier, has concurrently filed a verified notice of exemption under 49 CFR 1150.31 in *Cimarron Valley Railroad, L.C.—Exemption to Acquire and Operate—Cimarron Valley and Manter Branches of The Atchison, Topeka and Santa Fe Railway Company*, STB Finance Docket No. 32869, in which CVR seeks to acquire and operate 151.04 miles of the Cimarron Valley Branch rail line and 103.83 miles of the Manter Branch rail line both of which are owned by The Atchison, Topeka and Santa Fe Railroad Company. CVR's acquisition of the rail lines was expected to have been consummated on or shortly after February 23, 1996.

Applicant controls four other Class III rail carriers: Wyoming and Colorado Railroad Company, Inc. (WYCO); Oregon Eastern Railroad Company, Inc. (OER); Arizona Central Railroad, Inc. (AZCR); and Southwestern Railroad Company, Inc. (SWR).

The transaction is exempt from the prior approval requirements of 49 U.S.C. 11323 [formerly section 11343] because Applicant states that: (1) CVR, WYCO, OER, AZCR, and SWR will not connect with each other; (2) the continuance in control is not part of a series of anticipated transactions that would connect the railroads with each other; and (3) the transaction does not involve a Class I carrier.

No. 104-88, 109 Stat. 803, which was enacted on December 29, 1995, and took effect on January 1, 1996, abolished the Interstate Commerce Commission (ICC) and transferred certain functions to the Surface Transportation Board (Board). This notice relates to functions that are subject to Board jurisdiction pursuant to 49 U.S.C. 11323.

As a condition to this exemption, any employees adversely affected by the transaction will be protected under *New York Doc Ry.—Control—Brooklyn Eastern Dist.*, 360 I.C.C. 60 (1979).

If the verified notice contains false or misleading information, the exemption is void *ab initio*.
