Title: Amendment of Part 63 of the Commission's Rules to Provide for Notification of Common Carriers of Service Disruptions—Section 63.100.

Estimated Annual Burden: 1040 total annual hours; 5 hours per respondent (average); 208 respondents.

Description: 47 CFR Section 63.100 requires that any local exchange or interexchange common carrier that operates transmission or switching facilities and provides access service or interstate or international telecommunications service that experiences an outage on any facilities which it owns or operates must notify the Commission if such service outage continues for 30 minutes or more. An initial and a final report is required for each outage. In an Order on Reconsideration in CC Docket No. 91-273, the Commission amended the rules to require, among other things, that local exchange or interexchange common carriers or competitive access providers that operate either transmission or switching facilities and provide access service or interstate or international telecommunications service report outages that effect 30,000 or more customers or that affect special facilities and report fire-related incidents impacting 1,000 or more lines. nursing homes) and hotels and motels eventually would be hearing aid compatible and have volume control. The NPRM also contained several information collection requirements. OMB approved the information collection requirements as proposed for Section 68.112(b)(1)(G) and existing Section 68.224(a) and amendment thereof, regarding equipment packaging.
