

This survey is the only comprehensive source of public fiscal data collected on a nationwide scale using uniform definitions, concepts and procedures. The collection covers the revenues, expenditures, debt, and assets of all public school systems. This data collection has been coordinated with the National Center for Education Statistics (NCES). The NCES uses this collection to satisfy its need for school system level finance data.

Information on the finances of our public schools is vital to assessing their effectiveness. This data collection makes it possible to access a single data base to obtain information on such things as per pupil expenditures and the percent of state, local, and federal funding for each school system. Recently, as exemplified by the establishment of the America 2000 education goals, there has been increased interest in improving the Nation's public schools. One result of this intensified interest has been a significant increase in the demand for school finance data.

The three forms used in the school finance portion of the survey are:

Form F-33. This form contains item descriptions and definitions of the elementary-secondary education finance items collected jointly by the Census Bureau and NCES. It is used primarily as a worksheet by the state education agencies that provide school finance data centrally for all of the school systems in their respective states. Most states supply their data by electronic means.

Form F-33-1. This form is used at the beginning of each survey period to solicit the assistance of the state education agencies. It establishes the conditions by which the state education agencies provide their school finance data to the Census Bureau.

Form F-33-L1. This is a supplemental letter sent to the school systems in nine states. In these states, the state education agencies collect adequate

detail in all aspects of school finance except for assets. Respondents provide the assets data on this letter and it is merged with the other data collected from the state education agencies.

This request is to reinstate the previous collection for which approval expires July 31, 1997. The data to be collected is identical to the previous collection except as follows:

1—In order to differentiate between payments made to public school systems and those made to private school systems, we are adding an item that identifies payments to private schools.

2—In order to differentiate between payments made to public schools, those made to private schools, and those made to quasi-public charter schools, we are adding an item that identifies payments to charter schools.

II. Method of Collection

Through central collection arrangements with the state education agencies, the Census Bureau collects almost all of the finance data for local school systems from state education agency data bases. The states transfer most of this information in electronic format on microcomputer disks and over the Internet. The Census Bureau has facilitated central collection of school finance data by accepting data in whatever formats the states elect to transmit.
