Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared March 17, 1997 through March 21, 1997 pursuant to the Environmental Review Process (ERP), under Section 309 of the Clean Air Act and Section 102(2)(c) of the National Environmental Policy Act as amended. Requests for

**Summary of Rating Definitions
Environmental Impact of the Action****LO—Lack of Objections**

The EPA review has not identified any potential environmental impacts requiring substantive changes to the proposal. The review may have disclosed opportunities for application of mitigation measures that could be accomplished with no more than minor changes to the proposal.

EC—Environmental Concerns

The EPA review has identified environmental impacts that should be avoided in order to fully protect the environment. Corrective measures may require changes to the preferred alternative or application of mitigation measures that can reduce the environmental impact. EPA would like to work with the lead agency to reduce these impacts.

EO—Environmental Objections

The EPA review has identified significant environmental impacts that must be avoided in order to provide adequate protection for the environment. Corrective measures may require substantial changes to the preferred alternative or consideration of some other project alternative (including the no action alternative or a new alternative). EPA intends to work with the lead agency to reduce these impacts.

EU—Environmentally Unsatisfactory

The EPA review has identified adverse environmental impacts that are of sufficient magnitude that they are unsatisfactory from the standpoint of public health or welfare or environmental quality. EPA intends to work with the lead agency to reduce these impacts. If the potentially unsatisfactory impacts are not corrected at the final EIS stage, this proposal will be recommended for referral to the CEQ.

Adequacy of the Impact Statement**Category 1—Adequate**

EPA believes the draft EIS adequately sets forth the environmental impact(s) of the preferred alternative and those of the alternatives reasonably available to the project or action. No further analysis or data collection is necessary, but the reviewer may suggest the addition of clarifying language or information.

Category 2—Insufficient Information

The draft EIS does not contain sufficient information for EPA to fully

assess environmental impacts that should be avoided in order to fully protect the environment, or the EPA reviewer has identified new reasonably available alternatives that are within the spectrum of alternatives analyzed in the draft EIS, which could reduce the environmental impacts of the action. The identified additional information, data, analyses, or discussion should be included in the final EIS.

Category 3—Inadequate

EPA does not believe that the draft EIS adequately assesses potentially significant environmental impacts of the action, or the EPA reviewer has identified new, reasonably available alternatives that are outside of the spectrum of alternatives analyzed in the draft EIS, which should be analyzed in order to reduce the potentially significant environmental impacts. EPA believes that the identified additional information, data, analyses, or discussions are of such a magnitude that they should have full public review at a draft stage. EPA does not believe that the draft EIS is adequate for the purposes of the NEPA and/or Section 309 review, and thus should be formally revised and made available for public comment in a supplemental or revised draft EIS. On the basis of the potential significant impacts involved, this proposal could be a candidate for referral to the CEQ.

Draft EISs

Summary: EPA expressed environmental objections about the cumulative effects of road construction, timber harvesting, grazing and other anthropogenic activities in the basin. There is insufficient information to evaluate project compliance with the Clean Water Act, the potential for proposed actions to further exacerbate existing "impaired" Musselshell Creek water quality and degraded aquatic habitat.

ERP No. D-AFS-L65282-OR Rating LO, Robinson-Scott Landscape Management Project, Timber Harvest and other Vegetation Management, Willamette National Forest, McKenzie Ranger District, Lane and Linn Counties, OR.

Summary: Our abbreviated review has revealed no EPA environmental concerns on this project.

ERP No. D-USN-D11025-DC Rating EC2, Naval Sea Systems Command Headquarters (NAVSEA), Base Realignment and Closure Action, Relocation from Arlington, VA to Washington Navy Yard (WNY) in southeast Washington, DC.

Summary: EPA expressed environmental concerns regarding the historic preservation of buildings in the preferred alternative; the lack of information on environmental impacts associated with the demolition and renovation of buildings, and the need for mitigation to protect water quality of the Anacostia River.

ERP No. DS-COE-C36030-NJ Rating EC2, Green Brook Sub-Basin Flood Control Plan, Updated Information concerning a Revised Recommended Plan and Mitigation Plan, Implementation, Middlesex, Union and Somerset Counties, NJ.
