

situation. Nevertheless, the Department is willing to store non-Government oil for long-term storage in the Reserve if oil acquisition is resumed. The Department solicits views on the use of alternative financing for oil acquisition.

The Department also solicits views on the use of financial options, futures and other financial instruments. The Department would have to become active in the oil markets if it wished to sell options for the purchase and sale of Reserve oil. The intent of this activity would be to generate funds for the Government and provide an automatic mechanism for the release of oil.

Additionally, the oil industry could be provided a hedging instrument backed by oil. The Administration has not taken a position on whether Reserve oil should be offered for trade on public markets.

In addition, the Department seeks views on whether it should sell and repurchase Reserve inventories on a continuous basis to take financial advantage of market anomalies, such as high current prices and low future prices.

The operating, maintenance and management expenses of the Reserve are approximately \$200 million per year currently, and are expected to decline to approximately \$150 million per year over time. The Department seeks views on other alternatives for funding these expenses other than appropriations from general revenues.

Issued in Washington, D.C. on April 24, 1997.

Robert S. Kripowicz,

Principal Deputy Assistant Secretary, Fossil Energy.
