

The applications were approved on February 11, 1997, for manufacturing or formulating purposes only for the products Bedoukian *trans*-11-Tetradecenyl Acetate Technical Pheromone (EPA Registration Number 52991-8) and Bedoukian *cis*-11-Tetradecenyl Acetate Technical Pheromone (EPA Registration Number 52991-7).

The Agency has considered all required data on risks associated with the proposed use of German cockroach pheromone, *trans*-11-tetradecenyl acetate, and *cis*-11-tetradecenyl acetate, and information on social, economic, and environmental benefits to be derived from use. Specifically, the Agency has considered the nature of the chemical and its pattern of use, application methods and rates, and level and extent of potential exposure. Based on these reviews, the Agency was able to make basic health safety determinations which show that use of German cockroach pheromone, *trans*-11-tetradecenyl acetate, and *cis*-11-tetradecenyl acetate when used in accordance with widespread and commonly recognized practice, will not generally cause unreasonable adverse effects to the environment.

More detailed information on these registrations is contained in an EPA Pesticide Fact Sheet on German cockroach pheromone, *trans*-11-tetradecenyl acetate, and *cis*-11-tetradecenyl acetate.

A copy of these fact sheets, which provide a summary description of the pesticides, use patterns and formulations, science findings, and the Agency's regulatory position and rationale, may be obtained from the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22161.
