ENVIRONMENTAL PROTECTION
AGENCY

Acid Rain Division; Acid Rain
ProvisionsAGENCY: Environmental Protection
Agency.

ACTION: Notice.

SUMMARY: EPA today announces the allocation of allowances to small diesel refineries for desulfurization of fuel during 1996. The eligibility for and calculation of allowances to small diesel refineries is in accordance with Section 410(h) of the Clean Air Act, implemented at 40 CFR Part 73, subpart G.

FOR FURTHER INFORMATION CONTACT:

Kathy Barylski, EPA Acid Rain Division (6204J), 401 M St., SW, Washington DC; telephone (202) 233-9074. Information is also available through the Acid Rain Division website at <http://www.epa.gov/acidrain>.

SUPPLEMENTARY INFORMATION: EPA's Acid Rain Program was established by Title IV of the Clean Air Act Amendments of 1990 (CAAA) to reduce acid rain in the continental United States. The Acid Rain Program will achieve a 50 percent reduction in sulfur dioxide (SO₂) emissions from utility units. The SO₂ reduction program is a flexible market-based approach to environmental management. As part of this approach, EPA allocates "allowances" to affected utility units. Each allowance is a limited authorization to emit up to one ton of SO₂. At the end of each calendar year, each unit must hold allowances in an amount equal to or greater than its SO₂ emissions for the year. Allowances may be bought, sold, or transferred between utilities and other interested parties. Those utility units whose annual emissions are likely to exceed their allocations may install control technologies or switch to cleaner fuels to reduce SO₂ emissions or buy additional allowances.

Section 410(h) of the Clean Air Act provides allowances for small diesel refineries that desulfurize diesel fuel from October 1, 1993 through December 31, 1999. Small refineries are not otherwise affected by the Acid Rain Program and do not need the allowances to comply with any provision of the Clean Air Act. Thus, the allowances serve as a financial benefit to small diesel refineries desulfurizing diesel fuel.

The following table lists allowances to be allocated to eligible refineries for desulfurization of diesel fuel during calendar year 1996.

Refiner	Refinery/location	Allocation
Big West Oil	Flying J, Utah ...	1389

A total of 27,578 allowances are allocated to 17 refineries, which produced 55,721 thousand barrels of desulfurized diesel fuel. These allowances have a compliance year of 1997.

Requests for allowances for desulfurization during 1997 are due no later than April 1, 1998. Allowances allocated in 1998 will have a compliance year of 1998.

Dated: June 11, 1997.

Director, Acid Rain Division.
