Bangor Hydroelectric Company; Notice of Intent To Prepare an Environmental Assessment and Notice of Solicitation of Written Scoping Comments

June 23, 1997.

The Federal Energy Regulatory Commission (Commission) has received an application from the Bangor Hydroelectric Company (Bangor Hydro) to relicense the Medway Hydroelectric Project No. 2666-007. The 3.44-megawatt project is located on the West Branch of the Penobscot River in the town of Medway, Penobscot County, Maine.

The Commission intends to prepare an Environmental Assessment (EA) for the project in accordance with the National Environmental Policy Act.

In the EA, we will consider reasonable alternatives to the project as proposed by Bangor Hydro, and analyze both site-specific and cumulative environmental impacts on the project, as well as, economic and engineering impacts.

The draft EA will be issued and circulated to those on the mailing list for this project. All comments filed on the draft EA will be analyzed by the staff and considered in a final EA. The staff's conclusions and recommendations presented in the final EA will then be presented to the Commission to assist in making a licensing decision.

Scoping

We are asking agencies, Indian tribes, non-governmental organizations, and individuals to help us identify the scope of environmental issues that should be analyzed in the EA, and to provide us with information that may be useful in preparing the EA.

To help focus comments on the environmental issues, a scoping document outlining subject areas to be addressed in the EA will soon be mailed to those on the mailing list for the project. Those not on the mailing list may request a copy of the scoping document from the environmental coordinator, whose telephone number is listed below.

Those with comments or information pertaining to this project should file it with the Commission at the following address: Lois Cashell, Secretary, Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426.

The comments and information are due to the Commission within 60 days from the issuance date of the scoping document. All filings should clearly show the following on the first page: Medway Hydroelectric Project, FERC No. 2666-007.

Intervenors are reminded of the Commission's Rules of Practice and Procedure which require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

Any questions regarding this notice may be directed to David Turner, environmental coordinator, at (202) 219-2844.

Secretary.

I. Information Collection Request

EPA is seeking comments on the following Information Collection Request:

Title: Data Acquisition for Registration; ICR Numbers: EPA No. 1503.03 and OMB No. 2070-0122.

Expiration Date: Current OMB approval expires on November 30, 1997.

Affected Entities: Parties affected by this information collection are registrants of pesticide products.

Abstract: EPA is responsible for the regulation of pesticides under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). Applicants for pesticide registration must provide EPA with the data needed to assess whether the registration of a pesticide would cause unreasonable adverse effects on human health or the environment, and EPA has authority under FIFRA to require registrants to provide additional data to maintain an existing registration.

When the need for additional data arises, EPA's Office of Pesticide Programs (OPP) issues to affected registrants a Data Call-In Notice (DCI) under the authority of FIFRA section 3(c)(2)(B). In addition, data supporting pesticide inert ingredients may be called-in based on OPP's policy statement on inert ingredients in pesticide products (52 FR 13305, April 22, 1987, and revised on November 22, 1989, 54 FR 48314). A need for additional data may arise from changes in the Agency's general data requirements, from the discovery of deficiencies in previously submitted data, or from the discovery of specific attributes of the pesticide or its ingredients.
