Accidental Release Prevention Requirements: Risk Management Program Under Section 112(r)(7) of the Clean Air Act as Amended; Clean Air Act Advisory Committee: Accident Prevention Subcommittee's Electronic Submission Workgroup Final Recommendations Report

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: The Clean Air Act section 112(r) required EPA to publish regulations focusing on the prevention of chemical accidents. On June 20, 1996, EPA published the final rule for risk management programs.

An estimated 66,000 facilities are subject to this regulation based on the quantity of regulated substances they have on-site. Facilities that are subject will be required to implement a risk management program at their facility, and submit a summary of this information "in a method and format" to a central location as specified by EPA prior to June 21, 1999.

The Accident Prevention Subcommittee of the CAA Advisory Committee created the Electronic Submission Workgroup in October 1996 to make recommendations on the method and format of RMP submissions. The "Electronic Submission Workgroup Final Recommendations Report" contains recommendations on the technical and practical issues associated with creating a national repository of electronic Risk Management Plans. The report includes recommendations on how the regulated community will report their Risk Management Plans, and how state and local governments, EPA and the public will have access to this information.

Subject to review by the public pursuant to this document, the agreement has met with the approval of the Attorney General or her designee, the United States Department of Justice.

The Respondent has agreed to pay \$125,000, subject to the contingency that EPA may elect not to complete the settlement if comments received from the public during this comment period disclose facts or considerations which indicate the proposed settlement is inappropriate, improper, or inadequate. This settlement was reached through means of an alternative dispute resolution process.

Money collected from this settlement will be used to reimburse the Superfund for past response costs incurred at or in connection with the Site. These costs were incurred when EPA conducted a removal at the Site in 1990 and 1991. The removal action consisted chiefly of the offsite disposal of contaminated drums and soil found at the Site.
