*Needs and Uses:* The Census Bureau is requesting clearance for the collection of data concerning the School Enrollment Supplement to be conducted in conjunction with the October 1996 CPS. The Bureau of the Census and the Bureau of Labor Statistics (BLS) sponsor the basic annual school enrollment questions, which have been collected annually in the CPS for over 25 years. The National Center for Education Statistics (NCES) sponsors the inclusion of additional questions on education and computer usage-related questions.

These supplemental questions provide information on public/private elementary and secondary school enrollment, and characteristics of private school students and their families, which is used for tracking historical trends and for policy planning and support. This survey is the only source of national data on the age distribution and family characteristics of college students, and the only source of demographic data on preprimary school enrollment. As part of the Federal Government's efforts to collect data and provide timely information to local governments for policymaking decisions, the survey provides national trends in employment and progress in school.

The data are used by Federal agencies; state, county, and city governments; and private organizations responsible for education to formulate and implement

education policy. They are also used by employers and analysts to anticipate the composition of the labor force in the future.

*Affected Public:* Individuals or households.
