Subsistence Management Regulations for Public Lands in Alaska, Subpart C and Subpart D—1998–1999 Subsistence Taking of Fish and Wildlife Regulations**AGENCY:** Forest Service, Agriculture; and Fish and Wildlife Service, Interior.**ACTION:** Proposed rule.

SUMMARY: This proposed rule would revise regulations for seasons, harvest limits, methods, and means related to taking of wildlife for subsistence uses during the 1998–1999 regulatory year. The rulemaking is necessary because Subpart D is subject to an annual public review cycle. When final, this rulemaking will replace the wildlife regulations included in the “Subsistence Management Regulations for Public Lands in Alaska, Subpart D—1997–1998 Subsistence Taking of Fish and Wildlife Regulations,” which expire on June 30, 1998. This rule would also amend the Customary and Traditional Use Determinations of the Federal Subsistence Board (Section _____.24 of Subpart C).

DATES: Written public comments and proposals to change this proposed rule must be received no later than October 24, 1997. Federal Subsistence Regional Advisory Councils (Regional Councils) will hold public meetings to receive proposals to change regulations contained in this proposed rule from September 9–October 17, 1997, at various locations in Alaska. See **SUPPLEMENTARY INFORMATION** for additional information on meetings.

ADDRESSES: Written comments may be submitted to the U.S. Fish and Wildlife Service, Office of Subsistence Management, 1011 E. Tudor Road, Anchorage, Alaska 99503. See **SUPPLEMENTARY INFORMATION** for locations of meetings and additional information on written comment procedures.

FOR FURTHER INFORMATION CONTACT: Chair, Federal Subsistence Board, U.S. Fish and Wildlife Service, Thomas H. Boyd, Office of Subsistence Management; telephone (907) 786–3888. For questions specific to National Forest

System lands, contact Ken Thompson, Regional Subsistence Program Manager, USDA, Forest Service, Alaska Region, P.O. Box 21628, Juneau, Alaska 99802–1628, telephone (907) 586–7921.

SUPPLEMENTARY INFORMATION:**Meeting Locations and Written Comment Procedures**

The meetings on this proposed rule will be held at the following locations in Alaska:

Southeast Regional Council ...	Yakutat.
Southcentral Regional Council.	Anchorage.
Kodiak/Aleutians Regional Council.	Cold Bay.
Bristol Bay Regional Council	Togiak.
Yukon-Kuskokwim Delta Regional Council.	Hooper Bay.
Western Interior Regional Council.	McGrath.
Seward Peninsula Regional Council.	Nome.
Northwest Arctic Regional Council.	Noatak.
Eastern Interior Regional Council.	Dot Lake.
North Slope Regional Council	Barrow.

Notice of specific dates, times, and meeting locations will be published in local and statewide newspapers prior to the meetings. Locations and dates may need to be changed based on weather or local circumstances. Length of the Regional Council meetings will be determined by the amount of work on each Regional Council's agenda. Written proposals to change Subpart D hunting and trapping regulations and customary and traditional use determinations in Subpart C will be compiled and distributed for additional public review during early November 1997. A 30-day public comment period will follow distribution of the compiled proposal packet. Written public comments on distributed proposals will be accepted during the public comment period. Comments on published proposals to change hunting and trapping and customary and traditional use determination regulations may be presented to the Regional Councils at their winter meetings; locations, dates, and times to be announced. The Federal Subsistence Board (Board) will deliberate and take final action on proposals received that request changes to this proposed rule at a public meeting to be held in Anchorage during April 1998.

Public Review Process—Regulation Comments, Proposals, and Public Meetings

Written comments or proposed regulation changes may be submitted in

writing to the address identified at the beginning of this rulemaking by October 24, 1997. Comments or proposals may also be presented at Regional Council meetings to be held from September 9–October 17, 1997.

The public is encouraged to use proposal forms to submit recommendations to the Board. Proposal forms may be obtained from the U.S. Fish and Wildlife Service at the address listed above. This is a mechanism by which the public can best submit their suggested changes to the Board. The Board may defer review and action on some proposals if workload exceeds work capacity of staff, Regional Councils, or Board. These deferrals will be based on recommendations of the affected Regional Council, staff members and on the basis of least harm to the subsistence user.

Proposals should be specific to customary and traditional use determinations or to subsistence hunting and trapping seasons, harvest limits, and/or methods and means. Proposals submitted to the Board should include the following information: (a) The name, address, and telephone number of the individual or organization submitting the proposal; (b) The section and/or paragraph of the proposed rule for which the change is being suggested; (c) A statement explaining why the change is necessary; (d) A proposed solution; (e) Suggested wording for the regulation addition or change; and (f) Any supporting information. Proposals which fail to include the above information, or proposals which are beyond the scope of authorities in § _____.24, Subpart C and § _____.25, Subpart D, may be rejected.

Proposals for Changes Relating to Fish or Shellfish Regulations, and Changes to the Overall Program Will Not be Considered by the Board at this Time. Fish and shellfish regulations were extended through December 31, 1998, pending further development of a separate rulemaking process resulting from the consolidated “Katie John” litigation and petitions to the Secretaries regarding extended jurisdiction.

Following public distribution of proposals for changes to the 1998–1999 proposed regulations, a comment period will be provided to allow public review of those proposals that will be considered by the Board. A second series of Regional Council meetings will be held in February 1998, to assist in developing recommendations to the Board. Written comments on proposals may be submitted to the U.S. Fish and Wildlife Service before conclusion of the comment period which is presently

scheduled to end on January 9, 1998. The Board will discuss and evaluate proposed changes to this rule during a public meeting scheduled to be held in Anchorage, April 1998. The public may provide additional oral testimony on specific proposals before the Board at that time.

Background

Title VIII of the Alaska National Interest Lands Conservation Act (ANILCA) (16 U.S.C. 3111–3126) requires that the Secretary of the Interior and the Secretary of Agriculture (Secretaries) implement a joint program to grant a preference for subsistence uses of fish and wildlife resources on public lands, unless the State of Alaska enacts and implements laws of general applicability which are consistent with ANILCA, and which provide for the subsistence definition, preference, and participation specified in Sections 803, 804, and 805 of ANILCA. The State implemented a program that the Department of the Interior previously found to be consistent with ANILCA. However, in December 1989, the Alaska Supreme Court ruled in *McDowell v. State of Alaska* that the rural preference in the State subsistence statute violated the Alaska Constitution. The Court's ruling in *McDowell* required the State to delete the rural preference from the subsistence statute, and therefore, negated State compliance with ANILCA. The Court stayed the effect of the decision until July 1, 1990.

As a result of the *McDowell* decision, the Department of the Interior and the Department of Agriculture (Departments) assumed, on July 1, 1990, responsibility for implementation of Title VIII of ANILCA on public lands. On June 29, 1990, the Temporary Subsistence Management Regulations for Public Lands in Alaska were published in the **Federal Register** (55 FR 27114–27170). Consistent with Subparts A, B, and C of these regulations, a Federal Subsistence Board was established to administer the Federal subsistence management program. The Board's composition includes a Chair appointed by the Secretary of the Interior with concurrence of the Secretary of Agriculture; the Alaska Regional Director, U.S. Fish and Wildlife Service; the Alaska Regional Director, U.S. National Park Service; the Alaska State Director, U.S. Bureau of Land Management; the Alaska Area Director, U.S. Bureau of Indian Affairs; and the Alaska Regional Forester, USDA Forest Service. Through the Board, these agencies have participated in development of regulations for Subparts

A, B, and C, and the annual Subpart D regulations. All Board members have reviewed this rule and agree with its substance. Because this rule relates to public lands managed by an agency or agencies in both the Departments of Agriculture and the Interior, identical text would be incorporated into 36 CFR part 242 and 50 CFR part 100.

Applicability of Subparts A, B, and C

Subparts A, B, and C (unless otherwise amended) of the Subsistence Management Regulations for Public Lands in Alaska, 50 CFR 100.1 to 100.23 and 36 CFR 242.1 to 242.23, remain effective and apply to this rule for §§ _____.23–_____.25. Therefore, all definitions located at 50 CFR 100.4 and 36 CFR 242.4 apply to regulations found in this subpart.

Navigable Waters

At this time, Federal subsistence management program regulations apply to all non-navigable waters located on public lands and to navigable waters located on the public lands identified at 50 CFR 100.3(b) and 36 CFR 242.3(b) of the Subsistence Management Regulations for Public Lands in Alaska, Subparts A, B, and C (57 FR 22940–22964) published May 29, 1992. Nothing in these regulations is intended to enlarge or diminish authorities of the Departments to manage submerged lands, title to which is held by the United States government.

The Board recognizes Judge Holland's order granting preliminary relief to the plaintiffs in the case of the *Native Village of Quinhagak et al. v. United States of America et al.* Therefore, to the extent that these regulations would continue any existing restrictions on the taking of rainbow trout by the residents of Quinhagak and Goodnews Bay in the Kanektok, Arolik, and Goodnews Rivers, those regulations will not be enforced pending completion of proceedings in that case. However, in light of the continuation of the proceedings in the consolidated "Katie John" litigation and a petition to the Secretaries of the Interior and Agriculture addressing jurisdiction in navigable waters, no attempt is being made to alter the fish and shellfish portions of the regulations (§§ _____.26 and _____.27) until final guidance has been received regarding the jurisdictional authority of the Federal government over navigable waters in general, and specifically with respect to the waters at issue in *Native Village of Quinhagak et al. v. United States of America et al.*

Federal Subsistence Regional Advisory Councils

Pursuant to the Record of Decision, Subsistence Management Regulations for Federal Public Lands in Alaska, April 6, 1992, and the Subsistence Management Regulations for Federal Public Lands in Alaska, 36 CFR 242.11 (1992) and 50 CFR 100.11 (1992), and for the purposes identified therein, Alaska has been divided into ten subsistence resource regions, each of which is represented by a Federal Subsistence Regional Advisory Council (Regional Council). The Regional Councils provide a forum for residents of the region to have a meaningful role in the subsistence management of fish and wildlife on Alaska public lands. The Regional Council members represent varied geographical, cultural, and user diversity within each region.

Proposed Changes From 1997–1998 Seasons and Bag Limit Regulations

Subpart D regulations are subject to an annual cycle and require development of an entire new rule each year. Customary and traditional use determinations are also subject to an annual review process providing for modification each year. Regulations contained in this proposed rule will take effect on July 1, 1998, unless elements are changed by subsequent Board action following the public review process outlined herein.

The text of the 1997–1998 Subparts C and D Final Rule served as the foundation for the 1998–1999 Subparts C and D proposed rule. The only changes in this proposed rule are modifications to the lynx seasons in Units 6, 7, 11, 12, 13, 15, 20, and 25 that were approved by the Board consistent with the "harvest tracking strategy" for lynx and changes in the wording regarding permits for muskox in Units 22 and 23.

Conformance With Statutory and Regulatory Authorities

National Environmental Policy Act Compliance

A Draft Environmental Impact Statement (DEIS) that described four alternatives for developing a Federal Subsistence Management Program was distributed for public comment on October 7, 1991. That document described the major issues associated with Federal subsistence management as identified through public meetings, written comments and staff analysis and examined the environmental consequences of the four alternatives. Proposed regulations (Subparts A, B, and C) that would implement the

preferred alternative were included in the DEIS as an appendix. The DEIS and the proposed administrative regulations presented a framework for an annual regulatory cycle regarding subsistence hunting and fishing regulations (Subpart D). The Final Environmental Impact Statement (FEIS) was published on February 28, 1992.

Based on the public comment received, the analysis contained in the FEIS, and the recommendations of the Federal Subsistence Board and the Department of the Interior's Subsistence Policy Group, it was the decision of the Secretary of the Interior, with the concurrence of the Secretary of Agriculture, through the U.S. Department of Agriculture-Forest Service, to implement Alternative IV as identified in the DEIS and FEIS (Record of Decision on Subsistence Management for Federal Public Lands in Alaska (ROD), signed April 6, 1992). The DEIS and the selected alternative in the FEIS defined the administrative framework of an annual regulatory cycle for subsistence hunting and fishing regulations. The final rule for Subsistence Management Regulations for Public Lands in Alaska, Subparts A, B, and C (57 FR 22940-22964, published May 29, 1992) implemented the Federal Subsistence Management Program and included a framework for an annual cycle for subsistence hunting and fishing regulations.

Compliance With Section 810 Of Anilca

The intent of all Federal subsistence regulations is to accord subsistence uses of fish and wildlife on public lands a priority over the taking of fish and wildlife on such lands for other purposes, unless restriction is necessary to conserve healthy fish and wildlife populations. A Section 810 analysis was completed as part of the FEIS process. The final Section 810 analysis determination appeared in the April 6, 1992, ROD which concluded that the Federal Subsistence Management Program, under Alternative IV with an annual process for setting hunting and fishing regulations, may have some local impacts on subsistence uses, but it does not appear that the program may significantly restrict subsistence uses.

Paperwork Reduction Act

These rules contain information collection requirements subject to Office of Management and Budget (OMB) approval under the Paperwork Reduction Act of 1995. They apply to the use of public lands in Alaska. The information collection requirements described below have been approved by OMB under 44 U.S.C. 3501 and have

been assigned clearance number 1018-0075, which expires 5/31/2000.

The collection of information will be achieved through the use of the Federal Subsistence Hunt Permit Application. This collection information will establish whether the applicant qualifies to participate in a Federal subsistence hunt on public land in Alaska and will provide a report of harvest and location of harvest.

The likely respondents to this collection of information are rural Alaska residents who wish to participate in specific subsistence hunts on Federal land. The collected information is necessary to determine harvest success and harvest location in order to make management decisions relative to the conservation of healthy wildlife populations. The annual burden of reporting and recordkeeping is estimated to average 0.25 hours per response, including time for reviewing instructions, gathering and maintaining data, and completing and reviewing the form. The estimated number of likely respondents under this rule is less than 5,000, yielding a total annual reporting and recordkeeping burden of 1,250 hours or less.

Direct comments on the burden estimate or any other aspect of this form to: Information Collection Officer, U.S. Fish and Wildlife Service, 1849 C Street, NW, MS 224 ARLSQ, Washington, D.C. 20240; and the Office of Management and Budget, Paperwork Reduction Project (Subsistence), Washington, D.C. 20503. Additional information collection requirements may be imposed if Local Advisory Committees subject to the Federal Advisory Committee Act are established under Subpart B.

Economic Effects

This rule was not subject to OMB review under Executive Order 12866.

The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*) requires preparation of flexibility analyses for rules that will have a significant effect on a substantial number of small entities, which include small businesses, organizations or governmental jurisdictions. The Departments have determined that this rulemaking will not have a significant economic effect on a substantial number of small entities within the meaning of the Regulatory Flexibility Act.

This rulemaking will impose no significant costs on small entities; the exact number of businesses and the amount of trade that will result from this Federal land-related activity is unknown. The aggregate effect is an insignificant positive economic effect on a number of small entities, such as

ammunition, snowmachine, and gasoline dealers. The number of small entities affected is unknown; but, the fact that the positive effects will be seasonal in nature and will, in most cases, merely continue preexisting uses of public lands indicates that they will not be significant.

In general, the resources harvested under this rule will be consumed by the local harvester and do not result in a dollar benefit to the economy. However, it is estimated that 2 million pounds of meat are harvested by the local subsistence users annually and, if given a dollar value of \$3.00 per pound, would equate to \$6 million State wide.

Title VIII of ANILCA requires the Secretaries to administer a subsistence preference on public lands. The scope of this program is limited by definition to certain public lands. Likewise, these regulations have no potential takings of private property implications as defined by Executive Order 12630.

The Service has determined and certifies pursuant to the Unfunded Mandates Act, 2 U.S.C. 1502 *et seq.*, that this rulemaking will not impose a cost of \$100 million or more in any given year on local or state governments or private entities.

The Service has determined that these final regulations meet the applicable standards provided in Sections 3(a) and 3(b)(2) of Executive Order 12988.

Drafting Information: These regulations were drafted by William Knauer under the guidance of Thomas H. Boyd, of the Office of Subsistence Management, Alaska Regional Office, U.S. Fish and Wildlife Service, Anchorage, Alaska. Additional guidance was provided by Peggy Fox, Alaska State Office, Bureau of Land Management; Sandy Rabinowitch, Alaska Regional Office, National Park Service; Ida Hildebrand, Alaska Area Office, Bureau of Indian Affairs; and Ken Thompson, USDA-Forest Service.

(c) Possession and transportation of wildlife. (1) Except as specified in paragraphs (c)(3)(ii) or (c)(4) of this section, or as otherwise provided, no person may take a species of wildlife in any Unit, or portion of a Unit, if that person's total take of that species already obtained anywhere in the State under Federal and State regulations equals or exceeds the harvest limit in that Unit.

(2) An animal taken under Federal or State regulations by any member of a community with an established community harvest limit for that species counts toward the community harvest limit for that species. Except for wildlife taken pursuant to § _____.6(f)(3) or as otherwise provided for by this Part, an animal taken as part of a community harvest limit counts toward every

community member's harvest limit for that species taken under Federal or State of Alaska regulations.

(3) Harvest limits. (i) Harvest limits, including those related to ceremonial uses, authorized by this section and harvest limits established in State regulations may not be accumulated.

(ii) Wildlife taken by a designated hunter for another person pursuant to § _____.6(f)(2), counts toward the individual harvest limit of the person for whom the wildlife is taken.

(4) The harvest limit specified for a trapping season for a species and the harvest limit set for a hunting season for the same species are separate and distinct. This means that a person who has taken a harvest limit for a particular species under a trapping season may take additional animals under the harvest limit specified for a hunting season or vice versa.

(5) A brown/grizzly bear taken in a Unit or portion of a Unit having a harvest limit of one brown/grizzly bear per year counts against a one brown/grizzly bear every four regulatory years harvest limit in other Units; an individual may not take more than one brown/grizzly bear in a regulatory year.

(6) A harvest limit applies to the number of animals that can be taken during a regulatory year; however, harvest limits for grouse, ptarmigan, and caribou (in some Units) are regulated by the number that may be taken per day. Harvest limits of grouse and ptarmigan are also regulated by the number that can be held in possession.

(7) Unless otherwise provided, any person who gives or receives wildlife shall furnish, upon a request made by a Federal or State agent, a signed statement describing the following: names and addresses of persons who gave and received wildlife, the time and place that the wildlife was taken, and identification of species transferred. Where a qualified subsistence user has designated another qualified subsistence user to take wildlife on his or her behalf in accordance with § _____.6, the permit shall be furnished in place of a signed statement.

(8) A rural Alaska resident who has been designated to take wildlife on behalf of another rural Alaska resident in accordance with § _____.6, shall promptly deliver the wildlife to that rural Alaska resident.

(9) No person may possess, transport, give, receive or barter wildlife that was taken in violation of Federal or State statutes or a regulation promulgated thereunder.

(10) Evidence of sex and identity. (i) If subsistence take of Dall sheep is restricted to a ram, no person may

possess or transport a harvested sheep unless both horns accompany the animal.

(ii) If the subsistence taking of an ungulate, except sheep, is restricted to one sex in the local area, no person may possess or transport the carcass of an animal taken in that area unless sufficient portions of the external sex organs remain attached to indicate conclusively the sex of the animal; however, this paragraph (c)(10)(ii) does not apply to the carcass of an ungulate that has been butchered and placed in storage or otherwise prepared for consumption upon arrival at the location where it is to be consumed.

(iii) If a moose harvest limit includes an antler size or configuration restriction, no person may possess or transport the moose carcass or its parts unless both antlers accompany the carcass or its parts. A person possessing a set of antlers with less than the required number of brow tines on one antler shall leave the antlers naturally attached to the unbroken, uncut skull plate; however, this paragraph (c)(10)(iii) does not apply to a moose carcass or its parts that have been butchered and placed in storage or otherwise prepared for consumption after arrival at the place where it is to be stored or consumed.

(d) A person who takes an animal that has been marked or tagged for scientific studies must, within a reasonable time, notify the ADF&G or the agency identified on the collar or marker, when and where the animal was taken. Any ear tag, collar, radio, tattoo, or other identification must be retained with the hide until it is sealed, if sealing is required; in all cases, any identification equipment must be returned to the ADF&G or to an agency identified on such equipment.

(e) Sealing of bear skins and skulls. (1) Sealing requirements for bear shall apply to brown bears taken in all Units, except as specified below, and black bears of all color phases taken in Units 1-7, 11-17, and 20.

(2) No person may possess or transport from Alaska, the untanned skin or skull of a bear unless the skin and skull have been sealed by an authorized representative of ADF&G in accordance with State or Federal regulations, except that the skin and skull of a brown bear taken under a registration permit in the Western Alaska Brown Bear Management Area, the Northwest Alaska Brown Bear Management Area, Unit 5, or Unit 9(B) need not be sealed unless removed from the area.

(3) A person who possesses a bear shall keep the skin and skull together

until a representative of the ADF&G has removed a rudimentary premolar tooth from the skull and sealed both the skull and the skin; however, this provision shall not apply to brown bears taken within the Western Alaska Brown Bear Management Area, the Northwest Alaska Brown Bear Management Area, Unit 5, or Unit 9(B) which are not removed from the Management Area or Unit.

(i) In areas where sealing is required by Federal regulations, no person may possess or transport the hide of a bear which does not have the penis sheath or vaginal orifice naturally attached to indicate conclusively the sex of the bear.

(ii) If the skin or skull of a bear taken in the Western Alaska Brown Bear Management Area is removed from the area, it must first be sealed by an ADF&G representative in Bethel, Dillingham, or McGrath; at the time of sealing, the ADF&G representative shall remove and retain the skin of the skull and front claws of the bear.

(iii) If the skin or skull of a bear taken in the Northwestern Alaska Brown Bear Management Area is removed from the area, it must first be sealed by an ADF&G representative in Barrow, Fairbanks, Galena, or Kotzebue; at the time of sealing, the ADF&G representative shall remove and retain the skin of the skull and front claws of the bear.

(iv) If the skin or skull of a bear taken in Unit 5 is removed from the area, it must first be sealed by an ADF&G representative in Yakutat; at the time of sealing, the ADF&G representative shall remove and retain the skin of the skull and front claws of the bear.

(4) No person may falsify any information required on the sealing certificate or temporary sealing form provided by the ADF&G in accordance with State regulations.

(f) Sealing of beaver, lynx, marten, otter, wolf, and wolverine. No person may possess or transport from Alaska the untanned skin of a marten taken in Units 1-5, 7, 13(E), and 14-16 or the untanned skin of a beaver, lynx, otter, wolf, or wolverine, whether taken inside or outside the state, unless the skin has been sealed by an authorized representative of ADF&G in accordance with State regulations.

(1) Any wolf taken in Unit 2 must be sealed on or before the 30th day after the date of taking.

(2) The radius and ulna of the left foreleg must remain naturally attached to the hide of any wolf taken in Units 1-5 until the hide is sealed.

(g) A person who takes a species listed in paragraph (f) of this section but

who is unable to present the skin in person, must complete and sign a temporary sealing form and ensure that the completed temporary sealing form and skin are presented to an authorized representative of ADF&G for sealing consistent with requirements listed in paragraph (f) of this section.

(h) Utilization of wildlife. (1) No person may use wildlife as food for a dog or furbearer, or as bait, except for the following:

(i) The hide, skin, viscera, head, or bones of wildlife;

(ii) The skinned carcass of a furbearer;

(iii) Squirrels, hares (rabbits), grouse and ptarmigan; however, the breast meat of grouse and ptarmigan may not be used as animal food or bait;

(iv) Unclassified wildlife.

(2) A person taking wildlife for subsistence shall salvage the following parts for human use:

(i) The hide of a wolf, wolverine, coyote, fox, lynx, marten, mink, weasel or otter;

(ii) The hide and edible meat of a brown bear, except that the hide of brown bears taken in the Western and Northwestern Alaska Brown Bear Management Areas and Units 5 and 9(B) need not be salvaged;

(iii) The hide and edible meat of a black bear;

(iv) The hide or meat of squirrels, hares (rabbits), marmots, beaver, muskrats, or unclassified wildlife.

(3) Failure to salvage edible meat of ungulates, bear, or grouse and ptarmigan is prohibited.

(4) Failure to salvage the edible meat may not be a violation if such failure is caused by circumstances beyond the control of a person, including theft of the harvested wildlife, unanticipated weather conditions, or unavoidable loss to another animal.

(i) The regulations found in this section do not apply to the subsistence taking and use of wildlife regulated pursuant to the Fur Seal Act of 1966 (80 Stat. 927, 16 U.S.C. 1187), the Endangered Species Act of 1973 (87 Stat. 884, 16 U.S.C. 1531-1543), the Marine Mammal Protection Act of 1972 (86 Stat. 1027; 16 U.S.C. 1361-1407), and the Migratory Bird Treaty Act (40 Stat. 755; 16 U.S.C. 703-711), or any amendments to these Acts. The taking and use of wildlife, covered by these Acts, will conform to the specific provisions contained in these Acts, as amended, and any implementing regulations.

(j) Rural residents, non-rural residents, and nonresidents not specifically prohibited by Federal regulations from hunting or trapping on public lands in an area, may hunt or

trap on public lands in accordance with the appropriate State regulations.

(k) Unit regulations. Subsistence taking of unclassified wildlife, all squirrel species, and marmots is allowed in all Units, without harvest limits, for the period of July 1–June 30. Subsistence taking of wildlife outside established Unit seasons, or in excess of the established Unit harvest limits, is prohibited unless otherwise modified by subsequent regulation. Taking of wildlife under State regulations on public lands is permitted, except as otherwise restricted at paragraphs (k)(1) through (26) of this section. The NPL, a list of sites EPA evaluates for priority cleanup of hazardous wastes, is found in Appendix B of the National Oil and Hazardous Substances Pollution Contingency Plan (“NCP”) which is 40 CFR part 300, Appendix B. EPA promulgated the NCP pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (“CERCLA”). The EPA and the State of Arkansas propose this deletion under the terms of a policy published in the **Federal Register** on March 20, 1995. In
