Title: Reporting and Recordkeeping Requirements Under the PFC Emission Reduction Partnership for the Semiconductor Industry EPA ICR No. 1823.01.

Abstract: In April 1993, President Clinton issued the Climate Change Action Plan, which establishes the nation's commitment to returning U.S. greenhouse gas emissions to their 1990

levels by the year 2000. EPA's PFC Emission Reduction Partnership for the Semiconductor Industry is an important voluntary program contributing to the overall reduction in greenhouse gas emissions. The PFC Emission Reduction Partnership for the Semiconductor Industry, along with ENERGY STAR Buildings, Green Lights, ENERGY STAR Computers, and other EPA Programs is a voluntary program aimed at preventing pollution rather than controlling it after its creation. These programs focus on reducing greenhouse gas emissions.

EPA has developed this ICR to obtain authorization to collect information from Companies participating in the PFC Emission Reduction Partnership. By participating in the program, a Company agrees to endeavor to reduce PFC emissions. In the Partnership, a company will prepare an annual report to be submitted to a designated law firm that provides an overall estimate of PFC emissions, and a normalized PFC emission rate for its U.S. facilities. Information on Company-specific PFC emissions is aggregated into an industry-wide annual report, and used in combination with information on Companies' normalized rates of PFC emissions (submitted on a blind basis) to evaluate the overall PFC emission reductions achieved by the program.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: The projected hour burden for this collection of information is as follows:

Average Annual Reporting Burden Hours=8,206.

Average burden hours/response=328.

Frequency of response=1/year.

Estimated number of respondents=25.

Cost burden to respondents:

Estimated Total Annualized Cost

Burden=\$455,879.

Total capital and start-up

costs=\$1,500.

Estimated Total Operation and Maintenance Cost=\$225.

Purchase of Services Cost=\$1,160.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Dated: August 18, 1997.
