**1997 Amendment to Cotton Board  
Rules and Regulations Adjusting  
Supplemental Assessment on Imports****AGENCY:** Agricultural Marketing Service, USDA.**ACTION:** Final rule.

**SUMMARY:** The Agricultural Marketing Service (AMS) is amending the Cotton Board Rules and Regulations by lowering the value assigned to imported cotton for the purpose of calculating supplemental assessments collected for use by the Cotton Research and Promotion Program. This action is required by this regulation on an annual basis to ensure that the assessments collected on imported cotton and the cotton content of imported products remain similar to those paid on domestically produced cotton. As a result of changes in the 1997 Harmonized Tariff Schedule (HTS), numbering changes in the import assessment table are amended. Eleven HTS numbers will be eliminated from the assessment table because negligible assessments have been collected on these numbers and their elimination would contribute to reducing the overall burden to importers.

**EFFECTIVE DATE:** October 2, 1997.**FOR FURTHER INFORMATION CONTACT:**  
Craig Shackelford, (202) 720-2259.**SUPPLEMENTARY INFORMATION:****Executive Order 12866**

This rule has been determined to be "not significant" for purposes of Executive Order 12866, and, therefore, has not been reviewed by the Office of Management and Budget.

**Executive Order 12988**

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. It is not intended to have retroactive effect. This rule would not preempt any state or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Cotton Research and Promotion Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under Section 12 of the Act, any person subject to an order may file with the Secretary a petition stating that the order, any provision of the plan, or any

obligation imposed in connection with the order is not in accordance with law and requesting a modification of the order or to be exempted therefrom. Such person is afforded the opportunity for a hearing on the petition. After the hearing, the Secretary would rule on the petition. The Act provides that the District Court of the United States in any district in which the person is an inhabitant, or has his principal place of business, has jurisdiction to review the Secretary's ruling, provided a complaint is filed within 20 days from the date of the entry of the ruling.

**Regulatory Flexibility Act**

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*) AMS has considered the economic impact of this action on small entities and has determined that its implementation will not have a significant economic impact on a substantial number of small businesses.

There are an estimated 16,000 importers who are presently subject to rules and regulations issued pursuant to the Cotton Research and Promotion Order. This rule will affect importers of cotton and cotton-containing products. The majority of these importers are small businesses under the criteria established by the Small Business Administration. This rule will lower the assessments paid by the importers under the Cotton Research and Promotion Order. Even though the assessment will be lowered, the decrease is small and will not significantly affect small businesses.

Also, as a result of changes in the 1997 HTS, numbering changes in the Import Assessment table have been made. These changes present no economic impact to persons subject to this regulation.

When the assessment table in the regulation containing HTS numbers was published in 1992 it included about 700 of approximately 2,500 available HTS cotton containing classifications. These HTS numbers represented approximately 97 percent of the annual volume of imported cotton containing textiles and apparel. The other classifications comprising about three percent of the annual import volume were omitted from the assessment table in order to accomplish the goal of the program to maximize assessment collection while, at the same time, minimizing the overall administrative burden involved.

In this rule, eleven additional HTS numbers were removed from the table because assessments collected on these numbers have been insignificant. Their removal is consistent with the overall

intent of the program. The assessments levied on the cotton content of these HTS numbers have accounted for an average of 0.11 percent or \$17,383 of the total assessments collected over the last three years. Total assessment collections for the same period averaged \$16,169,969. Collections on the four numbers in Chapter 53 averaged \$12,000 over the last three years and collections on the seven numbers in Chapter 54 averaged \$22,000 for the same period.

The current assessment on imported cotton is \$0.012874 per kilogram of imported cotton. The amended assessment is \$0.012412, a decrease of \$0.000462 or a 3.6 percent decrease from the current assessment. From January through December 1996 approximately \$19,003,626 was collected at the \$0.012874 per kilogram rate. Should the volume of cotton products imported into the U.S. remain at the same level in 1997, one could expect the decreased assessment to generate \$18,319,495 or a 3.6 percent decrease from 1996.

The combined effect of the elimination of the eleven HTS numbers and the reduction in the value of imported cotton for the purpose of the assessment mechanism is expected to result in an annual reduction in assessment collections of approximately \$718,131.

**Paperwork Reduction**

In compliance with Office of Management and Budget (OMB) regulations (5 CFR part 1320) which implement the Paperwork Reduction Act (PRA) of 1980 (44 U.S.C. 3501 *et seq.*) the information collection requirements contained in the regulation to be amended have been previously approved by OMB and were assigned control number 0581-0093.

**Background**

The Cotton Research and Promotion Act Amendments of 1990 enacted by Congress under Subtitle G of Title XIX of the Food, Agriculture, Conservation and Trade Act of 1990 on November 28, 1990, contained two provisions that authorized changes in the funding procedures for the Cotton Research and Promotion Program.

These provisions are: (1) The assessment of imported cotton and cotton products; and (2) termination of the right of cotton producers to demand a refund of assessments.

An amended Cotton Research and Promotion Order was approved by producers and importers voting in a referendum held July 17-26, 1991. Proposed rules implementing the

amended Order were published in the **Federal Register** on December 17, 1991, (56 FR 65450). The final implementing rules were published on July 1 and 2, 1992, (57 FR 29181) and (57 FR 29431), respectively.

This rule decreases the value assigned to imported cotton in the Cotton Board Rules and Regulations (7 CFR 1205.510 (b)(2)). This value is used to calculate supplemental assessments on imported cotton and the cotton content of imported products. Supplemental assessments are the second part of a two-part assessment. The first part of the assessment is levied on the weight of cotton produced or imported at a rate of \$1 per bale of cotton which is equivalent to 500 pounds or \$1 per 226.8 kilograms of cotton.

Supplemental assessments are levied at a rate of five-tenths of one percent of the value of domestically produced cotton, imported cotton, and the cotton content of imported products. The agency has adopted the practice of assigning the calendar year average price received by U.S. farmers for Upland cotton to represent the value of imported cotton. This is done so that the assessment on domestically produced cotton and the assessment on imported cotton and the cotton content of imported products remain similar. The source for the average price statistic is "Agricultural Prices", a publication of the National Agricultural Statistics Service (NASS) of the Department of Agriculture. Use of the average price figure in the calculation of supplemental assessments on imported cotton and the cotton content of

imported products yields an assessment that approximates assessments paid on domestically produced cotton in the prior calendar year.

The current value of imported cotton as published in the **Federal Register** (61 FR 31817) on June 21, 1996, for the purpose of calculating supplemental assessments on imported cotton is \$1.6931 per kilogram. This number was calculated using the annual average price received by farmers for Upland cotton during the calendar year 1995 which was \$0.768 per pound and multiplying by the conversion factor 2.2046. Using the Average Price Received by U.S. farmers for Upland cotton for the calendar year 1996, which is \$0.726 per pound, the new value of imported cotton is \$1.6005 per kilogram. The amended value is \$0.0926 per kilogram less than the previous value.

An example of the complete assessment formula and how the various figures are obtained is as follows:

One bale is equal to 500 pounds.  
One kilogram equals 2.2046 pounds.  
One pound equals 0.453597 kilograms.

#### **One Dollar Per Bale Assessment Converted to Kilograms**

A 500 pound bale equals 226.8 kg. (500×.453597).

\$1 per bale assessment equals \$0.002000 per pound (1÷500) or \$0.004409 per kg. (1÷226.8).

#### **Supplemental Assessment of 5/10 of One Percent of the Value of the Cotton Converted to Kilograms**

The 1996 calendar year average price received by producers for Upland cotton

is \$0.726 per pound or \$1.6005 per kg. (0.726×2.2046)= 1.6005.

Five tenths of one percent of the average price in kg. equals \$0.008003 per kg. (1.6005×.005).

#### **Total Assessment**

The total assessment per kilogram of raw cotton is obtained by adding the \$1 per bale equivalent assessment of \$0.004409 per kg. and the supplemental assessment \$0.008003 per kg. which equals \$0.012412 per kg.

The current assessment on imported cotton is \$0.012874 per kilogram of imported cotton. The amended assessment is \$0.012412, a decrease of \$0.000462 per kilogram. This decrease reflects the decrease in the Average Price of Upland Cotton Received by U.S. Farmers during the period January through December 1996.

Since the value of cotton is the basis of the supplemental assessment calculation and the figures shown in the right hand column of the Import Assessment Table 1205.510(b)(3) are a result of such a calculation, the figures in this table have been revised. These figures indicate the total assessment per kilogram due for each Harmonized Tariff Schedule (HTS) number subject to assessment.

As a result of changes in the Harmonized Tariff Schedule, numbering revisions to the Import Assessment Table used in the Cotton Research and Promotion program were necessary. These changes are as follows:

The Cotton Board, the cotton producer and cotton importer board of directors that assist the Secretary in administering the import assessment, has requested that AMS remove certain HTS numbers from the assessment table. AMS has accepted this recommendation and has removed 11 HTS numbers from the assessment table. These numbers will no longer be subject to assessment.

The 1990 Amendments to the Cotton Research and Promotion Act provided

authority to implement exemptions from assessments for de minimis values or quantities of cotton. The Act amendments further provided exemption from assessment for industrial products made of cotton. The Agency implemented the first assessment table on July 1, 1992 (56 FR 29181) and stated that in determining which of approximately 2,500 cotton containing HTS numbers to include, the primary objective was to meet the intent

of the 1990 Act amendments by maximizing assessment collection and at the same time minimize the burden of administering the assessment provision.

It was determined that approximately 97 percent of the annual volume of imported textiles and apparel were classified under approximately 700 HTS numbers. The agency determined that limiting assessments to these approximate 700 HTS numbers would

accomplish the objective of maximizing assessment collection and minimizing administrative burden. At the same time, the vast majority of the volume of imported cotton textiles and apparel would be assessed.

The agency has determined that an additional reduction in the number of HTS numbers assessed is consistent with the concept of excluding from assessment de minimis amounts of cotton and is also consistent with the objective of maximizing assessment collections while minimizing administrative burdens.

Eleven numbers found in the HTS chapter 53 (man-made fiber filaments) and chapter 54 (other vegetable fibers) have been removed. Assessments levied on the cotton content of these HTS numbers have accounted for an average of 0.11 percent or \$17,383 of the total assessments collected over the last three years. Total assessment collections for the same period averaged \$16,169,969. Collections on the four numbers in Chapter 53 averaged \$12,000 over the last three years and collections on the

seven numbers in Chapter 54 averaged \$22,000 for the same period.

It is the view of the Cotton Board and AMS that elimination of these 11 numbers will reduce the number of HTS numbers subject to assessment without any appreciable decrease in the total assessments collected. Eliminating these numbers will also contribute to lowering the overall administrative burden of processing and collecting the assessments.

The HTS numbers eliminated from the assessment table are as follows:

A proposed rule with a request for comments was published in the **Federal**

**Register** (62 FR 31012) on June 6, 1997. No comments were received during the comment period (June 6 through July 7, 1997).

During the comment period additional changes to the Harmonized Tariff Schedule became effective. These changes affected seven HTS numbers subject to assessment pursuant to this regulation and found in the assessment table. In order to maintain consistency between the HTS and the assessment table the changes to these seven numbers have been incorporated into the assessment table. Each of the seven numbers was divided into two new numbers to provide greater detail for statistical reporting. It has been determined that these numbering changes involve no physical change to the products they represent. Therefore, the assessment rate is not affected by the change. The assessment rate for each of the seven numbers has been applied to each of the two new replacement numbers in the assessment table. The following table represents the changes:
