Availability of Final Environmental Impact Statement for the Greybull Valley Irrigation District Dam and Reservoir Project

AGENCIES: Bureau of Land Management, Interior, and U.S. Army Corps of Engineers, Defense.

ACTION: Notice of availability of the Final Environmental Impact Statement (FEIS) for the Greybull Valley Irrigation District Dam and Reservoir Project for public review and comment.

SUMMARY: The FEIS for a proposal from the Greybull Valley Irrigation District (GVID) to construct, operate, and maintain a 150-foot-high zoned-earth embankment dam and an associated 33,470 acre-foot impoundment in an unnamed drainage south of Roach Gulch, a tributary of the Greybull River, on public lands in Park County, Wyoming, is available for public review. The FEIS was prepared by WEST, Inc., a third-party contractor for the Bureau of Land Management (BLM) and the U.S. Army Corps of Engineers (COE) under the provisions of Section 102(2)(C) of the National Environmental Policy Act (NEPA) of 1969, as amended.

The FEIS supplements the Draft Environmental Impact Statement (DEIS), providing additional information, changes, and corrections to the DEIS.

DATES: Written comments concerning the analysis will be accepted for 30 days following the date the Environmental Protection Agency (EPA) publishes the notice of filing of the FEIS in the **Federal Register**, which is expected to be on September 19, 1997.

ADDRESSES: Copies of the DEIS and the FEIS may be reviewed at the following locations: Worland District BLM Office, 101 South 23rd Street, (contact Don Ogaard, BLM Project Manager), Worland, WY; Wyoming State BLM Office, 5353 Yellowstone Road, Cheyenne, WY, (Jon Johnson, Environmental Protection Specialist); COE Cheyenne Regulatory Office, 2232 Dell Range Blvd., Suite 210, Cheyenne, WY (Chandler Peter, COE Project Manager); COE Omaha District Office, 215 N. 17th Street, Omaha, NE (Becky Latka, EIS Technical Manager); and county and city libraries near the proposed project.

FOR FURTHER INFORMATION CONTACT: Don Ogaard, BLM Project Manager, Bureau of Land Management, Worland District Office, P.O. Box 119, 101 South 23rd Street, Worland, WY 82401-0119, telephone 307-347-5100; or Chandler Peter, U.S. Army Corps of Engineers,

Cheyenne Regulatory Office, 2232 Dell Range Blvd., Suite 210, Cheyenne, WY 82009, telephone 307-772-2300.

SUPPLEMENTARY INFORMATION: The GVID proposes to construct a 150-foot-high zoned-earth embankment dam in an unnamed drainage south of Roach Gulch, a tributary of the Greybull River, in Park County, Wyoming. This dam would impound 33,470 acre-feet of water, inundating about 700 acres of public lands. The GVID's purpose and need for the proposal is primarily to provide early and late season water for irrigated crops and to allow better overall regulation of their system. The DEIS also studied an alternative location in Blackstone Gulch, another tributary of the Greybull River, as well as the "No Action" Alternative, under which no dam would be built.

The FEIS is not a decision document. The FEIS supplements the DEIS, providing additional information, changes, and corrections to the DEIS, as well as responses to comments received on the DEIS. The FEIS does not reiterate those sections of the DEIS which were not changed; therefore, the reader must have a copy of the DEIS to use the FEIS. The BLM's Preferred Alternative remains Alternative B, Proposed Action, as modified by the mitigation described in Chapter 5 of the DEIS. The COE does not identify a Preferred Alternative at this time.

Before GVID may construct the project, it must obtain Federal, State, county, and local permits. Because the reservoir would inundate public land administered by the BLM, GVID must obtain a Right-of-Way Grant from the Federal Government. A permit under Section 404 of the Clean Water Act to conduct operations in a Water of the United States, issued by COE, would also be required. As part of the process for granting the permits, these agencies must consider GVID's proposal under NEPA. The agencies will accept public comment on the FEIS for 30 days from the date of publication of EPA's Notice of Filing. At this time, comments will be most helpful if they focus on any remaining technical or factual errors in the final analysis, and factors the agencies should consider in reaching a decision. The BLM's and the COE's decisions will be documented in Records of Decision which could be issued anytime after the 30-day public comment period.

Comments, including names and street addresses of respondents will be available for public review at the Worland District Office, 101 South 23rd Street, Worland, WY, during regular business hours (7:30 a.m. to 4:30 p.m.)

Monday through Friday, except holidays. Individual respondents may request confidentiality. If you wish to withhold your name or address from public review or from disclosure under the Freedom of Information Act, you must state this prominently at the beginning of your comments. Such requests will be honored to the extent allowed by law. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public inspection in their entirety.

Conveyance of Mineral Interests in California

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of segregation.

SUMMARY: The private land described in this notice, aggregating 441.32 acres, is segregated and made unavailable for filings under the general mining laws and the mineral leasing laws to determine its suitability for conveyance of the reserved mineral interest pursuant to section 209 of the Federal Land Policy and Management Act of October 21, 1976. The mineral interests will be conveyed in whole or in part upon favorable mineral examination. The purpose is to allow consolidation of surface and subsurface of minerals ownership where there are no known mineral values or in those instances where the reservation interferes with or precludes appropriate nonmineral development and such development is a more beneficial use of the land than the mineral development.

Minerals Reservation—All coal and other minerals.

Upon publication of this Notice of Segregation in the **Federal Register** as provided in 43 CFR 2720.1-1(b), the mineral interests owned by the United States in the private lands covered by the application shall be segregated to the extent that they will not be subject to appropriation under the mining and mineral leasing laws. The segregative effect of the application shall terminate by publication of an opening order in the **Federal Register** specifying the date and time of opening; upon issuance of a patent or other document of conveyance to such mineral interest; or two years from the date of publication of this notice, whichever occurs first.
