

meetings. While industry will receive the questions early, the data will generally be developed with a Review Team member. Government program managers and agents will be consulted for data prior to interviewing industrial participants in order to further reduce the latter's time expenditure. For example, DARPA personnel in the JDUPO have been consulted as to the availability of material. Their files have been used to minimize further collection. In addition, Service, Department of Transportation (DOT), Department of Energy (DOE), National Science Foundation (NSF), and other agencies involved have been contacted and consulted. Further, this review will be conducted only once (as opposed to yearly) although a follow-up will be made on each unfinished project in order to update the data.

There is no need for respondents to make any capital expenditures to support this effort. The average time required of the respondents is estimated at two hours. (Since most of the questions have already been addressed as part of normal business practices, little preparation is usually needed).

POLICY JUSTIFICATIONJapan - Vertical Launch System

The Government of Japan has requested a possible sale of two MK-41 Vertical Launch Systems (VLS), two MK-48 Guided Missile Vertical Launch Systems (GMVLS), two MK-36 Decoy Launching Systems, systems engineering and testing services, U.S. Government and contractor engineering and logistics services, spare and repair parts, personnel training and training equipment, support equipment, publications and technical documentation, system software support and other related elements of logistics support. The estimated cost is \$105 million.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of an allied country which has been and continues to be an important force for political stability and economic progress in Asia.

Japan will use these weapon systems and equipment to outfit naval vessels under construction, to augment its current missile weapon system inventories and to provide an air defense capability for operational naval vessels. Japan currently operates these naval weapon systems and equipment and therefore will have no difficulty absorbing this additional equipment into its armed forces.

The proposed sale of this equipment and support will not affect the basic military balance in the region.

The principal contractors will be Lockheed Martin Aerospace and Naval Systems, Baltimore, Maryland and Raytheon Company, Wayland, Massachusetts. There are no offset agreements proposed in connection with this proposed sale.

Implementation of this proposed sale will not require the assignment of any U.S. Government personnel or contractor representatives to Japan.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 98-10

Notice of Proposed Issuance of Letter of Offer
Pursuant to Section 36(b)(1)
of the Arms Export Control Act

Classified Annex
Item No. vi

(vi) Sensitivity of Technology:

1. The Vertical Launch System equipment, technical data, training, services, and documentation are not sensitive and are Unclassified. Computer Operational tapes/programs are Confidential.

2. The Guided Missile Vertical Launch System equipment, technical data, training, services and documentation are not sensitive and are Unclassified. Computer operational tapes/program are Confidential.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements of the aforementioned systems, the information could be used to develop countermeasures or equivalent systems capable of reducing weapon system effectiveness. This information could also be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that the recipient country can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This proposed sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.
