### Fish and Wildlife Service

#### 50 CFR Part 17

RIN 1018-AD36

#### Endangered and Threatened Wildlife and Plants; Determination of Endangered Status for Nine Plants From the Grasslands or Mesic Areas of the Central Coast of California

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Final rule.

**SUMMARY:** The U.S. Fish and Wildlife Service (Service) determines endangered status pursuant to the Endangered Species Act of 1973, as amended (Act) for nine plants: *Alopecurus aequalis* var. *sonomensis* (Sonoma alopecurus), *Astragalus clarianus* (Clara Hunt's milk-vetch), *Carex albida* (white sedge), *Clarkia imbricata* (Vine Hill clarkia), *Lilium pardalinum* ssp. *pitkinense* (Pitkin Marsh lily), *Plagiobothrys strictus* (Calistoga allocarya), *Poa napensis* (Napa bluegrass), *Sidalcea oregana* ssp. *valida* (Kenwood Marsh checker-mallow), and *Trifolium amoenum* (showy Indian clover). These nine species grow in a variety of habitats including valley grasslands, meadows, freshwater marshes, seeps, and blue oak woodlands in Marin, Napa, and Sonoma Counties on the central coast of California. Habitat loss and degradation, competition from invasive plant species, elimination through plant community succession, trampling and herbivory by livestock and wildlife, collection for horticultural use, and hydrological alterations to wetland areas threaten the continued existence of these plants. This rule implements Federal protection and recovery provisions afforded by the Act for these nine species.

**DATES:** Effective November 21, 1997.

**ADDRESSES:** The complete file for this rule is available for public inspection, by appointment, during normal business hours at the Sacramento Field Office, U.S. Fish and Wildlife Service, 3310 El Camino Avenue, Suite 130, Sacramento, California 95821-6340.

**FOR FURTHER INFORMATION CONTACT:**
