

Commission. The project goal is to retain existing fish and wildlife resources and, to the extent feasible, the enhancement thereof. Further, the ecosystem resulting from implementation of the plan should be naturalistic, biologically diverse, productive, and estuarine in nature. That is, it shall be predominately salt water influenced, but incorporate biologically beneficial freshwater influences. In addition, the acreage of waters and wetlands in the lowland should not be diminished. The proposed Concept Plan for restoration would consist of: (1) Acquisition of approximately 880 acres in the Bolsa Chica lowlands; (2) restoration of wetlands and habitat areas in Bolsa Chica Lowlands, including approximately 384 acres of full tidal and 220 acres of managed tidal; (3) monitoring activities to determine the condition of the restored habitats on a regular basis and the necessary operation, maintenance and management of the project feature and its associated physical features, both during and after construction of those physical features, and (4) necessary maintenance/management of the restored wetland. The Concept Plan involves the dredging of approximately 1.5 million cubic yards of material from the interior of the wetland, the construction of a new stabilized tidal inlet through the existing beach, and associated bridges as required to maintain traffic flows through the area.

2. Alternatives

A series of informal public workshops were held to solicit public input into the development of preliminary project alternatives. These preliminary alternatives conceptually include the "No Action" Scenario; water management measures; the Concept Plan, as described above; alternate scenarios for routing floodwaters from the existing Garden Grove-Wintersburg flood control channel through the project area; alternate locations for a new tidal inlet; and alternate ways to restore tidal influence to the wetland (such as culverts or a non-jettied inlet). These preliminary project alternatives, along with the proposed action and the No Action scenarios, will be screened down into a series of final alternatives. These final alternatives will be carried forward into detailed analyses pursuant to the National Environmental Policy Act (NEPA) of 1969 (42 U.S.C. 4321, as amended) and the California Environmental Quality Act (CEQA) of 1970 (Public Resources Code, Sections 21000-21177).

3. Scoping Process

The Corps, Service and CSLC, on behalf of all 8 Project Steering Committee agencies, are preparing a joint Environmental Impact Statement/Report (EIS/R) to address potential impacts associated with implementing their respective discretionary actions associated with the proposed project. The Corps and the Service are the Lead Federal Agencies for compliance with NEPA for the project, and the CSLC is the Lead State Agency for compliance with the CEQA for the non-Federal aspects of the project. The Draft EIS/R (DEIS/R) document will incorporate public concerns in the analysis of impacts associated with the Proposed Action and associated project alternatives. The DEIS/R will be sent out for a 45-day public review period, during which time both written and verbal comments will be solicited on the adequacy of the document. The Final EIS/R (FEIS/R) will address the comments received on the DEIS/R during public review, and will be furnished to all who commented on the DEIS/R, and is made available to anyone that requests a copy during the 30-day public comment period. The final step involves, for the federal EIS, preparing a Record of Decision (ROD) and, for the state EIR, certifying the EIR and adopting a Mitigation Monitoring and Reporting Plan. The ROD is a concise summary of the decisions made by the Corps and the Service from among the alternatives presented in the FEIS/R. The ROD can be published immediately after the FEIS public comment period ends. A certified EIR indicates that the environmental document adequately assesses the environmental impacts of the proposed project with respect to CEQA. A formal scoping meeting to solicit public comment on the proposed action and alternatives will be held on December 11, 1997 at 7:00 P.M., in the Huntington Beach City Council Chambers, Huntington Beach, California.
