

plans for providing client services, preliminary funding and expenditure estimates, and standard assurances and forms common to most Federal funds recipients. This request for comment is an attempt to solicit input from those grantees which participated in the preapplication and/or planning process for FY 1998, and which may have recommendations for improving the process for FY 1999.

II. Current Actions

The proposed ICR will be a revision of Item no. 1205-0383, expiring 03/31/98 for the currently-approved system, that will be used by approximately 80 INA WtW grantees as the preapplication and planning vehicle for applying for INA WtW grants for FY 1999. Grantees will be required to couch their FY 1999 INA WtW plans in terms of planned numbers of enrolled individuals, their characteristics, training and services to be provided, planned outcomes, including job placement and wage data, as well as projections of program expenditures. Current paperwork burdens are covered under OMB Clearance No. 1205-0383 (expiration date 3/31/98), and have been included in the following burden estimates. For ease of analysis, the following burden estimate is broken down into the two main components of INA WtW program application: (1) Preapplication; and (2) planning.

Type of Review: Revision (with changes).

Agency: Employment and Training Administration.

Title: Indian and Native American Welfare-to-Work Grant Programs.

OMB Number: 1205-0383.

Catalog of Federal Domestic Assistance Number: 17.254.

Frequency: Annual (Both preapplication and plan submission).

Affected Public: Federally-recognized tribes, Alaska Native regional non-profit corporations, and/or consortia of any of the above.

Number of Respondents: 80.

Total Responses: 80.

Estimated Time Per Respondent: planning—6 hours; preapplication—3 hours.

Total Burden Hours: 480. (NOTE: no estimate is given for the preapplication process, as only a few tribes or consortia which did not receive FY 1998 INA WtW grants and which are neither TANF nor NEW tribes will have to submit one to establish eligibility.)

Total Burden Cost (capital/startup): None.

Total Burden Cost (operating/maintaining): None (planning and/or preapplication is a once-a-year activity).

Signed at Washington, DC this 20th day of March, 1998.

Anna W. Goddard,

Director, Office of Special Targeted Programs.

NATIONAL FOUNDATION FOR THE ARTS AND HUMANITIES

Institute of Museum and Library Services; Library Service Grant to PREL/FAS

ACTION: Notice.

SUMMARY: Section 221(b)(3)(C) Special Rule of the Library Services and Technology Act (LSTA) states that the Institute of Museum and Library Services (IMLS) Director shall award grants to the Pacific Territories and Freely Associated States (FAS) on a competitive basis and pursuant to recommendations from the Pacific Region Educational Laboratory (PREL) in Honolulu, Hawaii. The Act allows IMLS to compensate PREL for administrative expenses. (PREL has been renamed Pacific Resources for Education and Learning.) This notice provides guidance on administration of FY98 PREL/FAS LSTA grants.

ADDRESSES: Institute of Museum and Library Services, Office of Library Services, 1100 Pennsylvania Avenue, NW, Washington, D.C. 20506.

FOR FURTHER INFORMATION CONTACT: Jane Heiser, Director of State Grants at the address given above, telephone (202) 606-5226.

SUPPLEMENTARY INFORMATION:

1. For projects funded under the LSTA, the Pacific Territories/FAS shall be administered by PREL.

2. The PREL Program Officer will attend training at IMLS on the program and fiscal requirements.

3. PREL, after consultation with the Territories and Freely Associated States, shall submit a plan to the Institute of Museum and Library Services Director describing the administration of the program.

4. Excepting GU and CNMI, grantees will not receive formula grants since they are ineligible under the general funding of the Act. Awards for the competitive grants will be a combination of a basic grant amount based on a formula and a competitive/discretionary process.

5. Formula grants will be based on population (or a percentage of each allotment).

6. The balance of each allotment would be open for discretionary

applications from the appropriate entity (the territorial/FAS library).

7. Activities eligible for assistance are those listed under the LSTA.

8. Funds will be used only for the purposes of the LSTA.

9. A library in a Territory or a Freely Associated State that receives a grant under the LSTA is subject to all laws, regulations, and requirements applicable to this program.

10. To compete for a discretionary grant, a territorial/FAS library shall submit an application to PREL for consideration. The application is to be in accordance with deadlines and other administrative procedures established by PREL.

11. Prior to submission of the application, the territorial/FAS library would coordinate, regarding the development of the application, with appropriate educational agencies, institutions, and organizations that are in the Territory or Freely Associated State and that serve its area.

12. In determining the order of selection for awards under the LSTA, the IMLS Director considers the recommendations of PREL, based on selection criteria established by PREL, which will include an evaluation plan.

13. The IMLS Director may require a grantee to submit reports containing information the Director finds necessary to carry out the Director's functions under the LSTA.

14. At the end of the fiscal year the PREL will collect and abstract the annual reports of the activities supported under LSTA for submission to the IMLS Director.

15. PREL, in consultation with the IMLS Office of Library Services, will include training programs for grantees.

Mamie Bittner,

Director, Public and Legislative Affairs.

NATIONAL SCIENCE FOUNDATION

Advisory Panel for Biomolecular Processes; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation announces the following meeting.

Name: Advisory Panel for Biomolecular Processes (5138) (Panel B).

Date and Time: Wednesday and Thursday, April 15 & 16, 1998, 8:30 am to 5:00 pm.

Place: National Science Foundation, 4201 Wilson Boulevard, Rm. 630, Arlington, VA 22230.

Type of Meeting: Closed.

Contact Person: Dr. Karen Kindler, Program Director for Biochemistry of Gene Expression, Room 655, National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230. (703) 306-1441.

Purpose of Meeting: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: To review and evaluate research proposals submitted to the Biochemistry of Gene Expression Program as part of the selection process for awards.

Reason For Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c) (4) and (6) of the Government in the Sunshine Act.

Dated: March 23, 1998.

M. Rebecca Winkler,

Committee Management Officer.

NATIONAL SCIENCE FOUNDATION

Advisory Panel for Cell Biology; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation announces the following meeting.

Name: Advisory Panel for Cell Biology (1136).

Date and Time: Wednesday, Thursday, and Friday, April 15, 16 and 17, 1998; 8:30 a.m. to 5:00 p.m.

Place: National Science Foundation, 4201 Wilson Boulevard, Room 330, Arlington, VA 22230.

Type of Meeting: Closed.

Contact Persons: Drs. Barbara Zain and Richard D. Rodewald, Program Directors for the Cell Biology Program, National Science Foundation, Room 655 South, Arlington, VA 22230. Telephone: 703/306-1442.

Purpose of Meeting: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: To review and evaluate research proposals submitted to the Cell Biology Program as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c) (4) and (6) of the Government in the Sunshine Act.

Dated: March 23, 1998.

Rebecca M. Winkler,

Committee Management Officer.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-237]

Commonwealth Edison Company; Notice of Consideration of Issuance of Amendment to Facility Operating License, Proposed no Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR-19, issued to Commonwealth Edison Company (ComEd, the licensee), for operation of the Dresden Nuclear Power Station, Unit 2, located in Grundy County, Illinois.

The proposed amendment would reflect a change in the Dresden, Unit 2, minimum critical power ratio (MCPR) Safety Limit and revise footnotes in Technical Specifications (TS) Section 5.3, to allow the use of Siemens Power Corporation (SPC) ATRIUM-9B fuel.

This request for amendment was submitted under exigent circumstances to support Dresden, Unit 2, Cycle 16, operation which is scheduled to begin on April 12, 1998. The licensee had submitted an application for TS amendments on August 29, 1997, (published on January 14, 1998 at 63 FR 227) citing SPC Topical for Revised ANFB Correlation Uncertainty, ANF-1125(P), Supplement 1, Appendix D, to allow the use of SPC ATRIUM-9B fuel. However, the need for additional information has delayed the review of this topical report. To ensure that use of ATRIUM-9B fuel is approved in time for the scheduled Unit 2 startup, ComEd determined that it would submit this one-time cycle-specific amendment request proposing an interim conservative approach to calculating the MCPR Safety Limit. The time necessary for ComEd to develop this TS request would not allow the normal 30-day period for public comment to support Dresden, Unit 2, startup on April 12, 1998. However, should startup on Dresden, Unit 2, be delayed enough to allow the normal 30-day period for public comment, this amendment will not be issued until expiration of the normal 30-day period for public comment.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

Pursuant to 10 CFR 50.91(a)(6) for amendments to be granted under exigent circumstances, the NRC staff

must determine that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated:

The probability of an evaluated accident is derived from the probabilities of the individual precursors to that accident. The consequences of an evaluated accident are determined by the operability of plant systems designed to mitigate those consequences. Limits have been established consistent with NRC approved methods to ensure that fuel performance during normal, transient, and accident conditions is acceptable. This change does not affect the operability of plant systems, nor does it compromise any fuel performance limits.

Revision to Cycle Specific Footnotes for Dresden 2 Cycle 16 Operation With ATRIUM-9B

The revisions to the footnotes in [Technical Specification] Section 5.3 have no implications for accident analysis or plant operations. The purpose of the revisions to the footnotes is to allow operation of Dresden Unit 2 Cycle 16 with an interim conservative approach to calculating the MCPR Safety Limit. This is the same approach that was NRC approved for use for Dresden Unit 3 Cycle 15 and Quad Cities Unit 2 Cycle 15. The Dresden Unit 2 Cycle 16 MCPR Safety Limit was calculated using an interim additive constant uncertainty. The MCPR Safety Limit is used in the determination of the cycle's MCPR Operating Limit. The MCPR Operating Limit ensures that the MCPR Safety Limit is not violated for any anticipated operational occurrence. This revision does not affect any plant equipment or processes; therefore, there is no alteration in the probability or consequences of an accident previously evaluated.

Revision to the MCPR Safety Limit

Changing the MCPR Safety Limit for Dresden Unit 2 from 1.08 to 1.09 will not increase the probability of an accident previously evaluated. Additionally, operational MCPR limits will be applied that will ensure the MCPR Safety Limit is not violated during all modes of operation and anticipated operational occurrences. Changing the MCPR Safety Limit will not alter any physical systems or operating procedures. The Dresden Unit 2 MCPR Safety Limit is set to 1.09, which is a critical power
