SUPPLEMENTARY INFORMATION: Pursuant to Council on Environmental Quality regulations (40 CFR parts 1500-1508) implementing the procedural provisions of the National Environmental Policy Act, the Department of the Navy has prepared and filed with the U.S. Environmental Protection Agency, the Pacific Missile Range Facility (PMRF) Enhanced Capability Draft Environmental Impact Statement at Pacific Missile Range Facility. The DEIS assesses the potential impacts associated with enhancing PMRF capabilities. The Proposed Action would enable PMRF to fully accommodate the testing and training needs of the Navy's Theater Ballistic Missile Defense (TBMD) program as well as other DOD Theater Missile Defense (TMD) programs. The proposed enhancement would also serve to increase PMRF's viability in the future by providing the capability for potential customers to develop, test and train in the use of evolving defensive systems.

The DEIS analyzes additional missile launch and support locations, facility construction, launch preparation activities, missile flight tests, radar and optical tracking operations, and intercept tests in the Pacific Ocean.

Environmental issues analyzed in the DEIS for enhancing PMRF include: Air quality; airspace control; biological resources; cultural resources; geology and soils; hazardous materials and waste; safety and health; land use; noise; socioeconomics; transportation; utilities; visual and aesthetics; and

water resources. In addition, the document addresses ocean areas and environmental justice.

Proposed Action

The Navy proposes to enhance capabilities of PMRF to conduct missile defense testing by (1) upgrading existing radar, telemetry, optics, electronic warfare, differential global positioning system, and other instrumentation facilities; and (2) the construction and operation of additional missile launch sites, sensor and instrumentation facilities, and a missile storage building.

Areas being considered for the launch and/or instrumentation sites include (1) Kauai and Niihau; (2) land-based support locations on Tern Island and Johnston Atoll; and (3) ocean areas within and outside U.S. territorial waters. Any testing would comply with current U.S. policy concerning compliance with treaties and international agreements.

No Action

The No-Action Alternative is the continuation of existing range and land-based training and operations; existing research development, testing and evaluation activities; and ongoing base operations and maintenance of the technical and logistical facilities that support the training and operations missions conducted at PMRF.

Dated: April 7, 1998.
