

### Summary of the Environmental Assessment

The purpose of decommissioning a nuclear facility is to remove the facility safely from service, and to reduce residual radioactivity at the site to levels that permit the license granted by the NRC to be terminated.

The NRC staff has reviewed the licensees' application and the SNEC Decommissioning Environmental Report prepared in accordance with 10 CFR 51.53(d). The staff also referred to the SNEC Facility Updated Safety Analysis Report, Revisions 0, 1, and 2 and the SNEC Facility Decommissioning Quality Assurance Plan. To document its review, the staff has prepared an environmental assessment (EA) which examined decommissioning alternatives, non-radiological and radiological impacts of decommissioning, and effects of postulated radiological accidents during decommissioning. The alternatives available for decommissioning—DECON, ENTOMB, SAFSTOR, and no action—are evaluated and discussed in the "Final Generic Environmental Impact Statement on Decommissioning of Nuclear Facilities," NUREG-0586, dated August 1988 (GEIS). Based on its review of the licensees' application and plans for decommissioning described in the Post Shutdown Decommissioning Activities Report (PSDAR), the staff has determined that the environmental impacts, both radiological and nonradiological, associated with the decommissioning of the SNEF, are bounded by the impacts evaluated by the GEIS and have been adequately evaluated by the licensees. The staff also finds that the proposed decommissioning of the SNEF complies with 10 CFR Part 50, Appendix I, and 10 CFR Part 20.

### Finding of No Significant Impact

The staff has reviewed the licensees' application for license amendment and environmental report in accordance with the requirements of 10 CFR Part 51. Based upon the EA, the staff concluded that there are no significant environmental impacts associated with the proposed action and that the proposed action will not have a significant effect on the quality of the human environment. Therefore, the Commission has determined, pursuant to 10 CFR 51.31, not to prepare an environmental impact statement.
