

new model for use in merger analysis, how should it be tested to ensure that the design criteria have been met?

How should a model and associated databases be maintained and updated? What process should be followed to identify needed modifications to the model and create new versions of the computer code? Should a fixed set of data inputs be identified, in order to avoid this potential difficulty and provide consistent a starting point for analysis (assuming applicants can file additional data for further analyses if they choose)? As an alternative, should applicants be permitted to substitute the most recent data from the same sources even if these data have not previously tested in the model? Or should a standard set of model inputs be maintained and updated as a group? If a standard set of inputs is maintained, should Commission staff be directly responsible for the maintenance of these data or can this responsibility be carried out by third parties?

SUPPLEMENTARY INFORMATION:

I. Background

At the 2-day meeting, the TDR Committee will focus mainly on discussing options for burden reduction associated with the TRI program. The meeting will include discussion of the renewal of the Information Collection Request for the Alternate Reporting Threshold Certification Statement (Form A) and possible modifications to the Form A or the alternate threshold to increase burden reduction for eligible facilities. Also, at the March meeting, the Committee broke up into four groups and came up with suggestions for overall revisions to the Form R. At the May meeting, the
