NUCLEAR REGULATORY COMMISSION

Notice of Availability of Draft NUREG-1628 "Staff Responses to Frequently Asked Questions Concerning Decommissioning of Nuclear Power Reactors"

The Nuclear Regulatory Commission (NRC) is announcing the availability of NUREG-1628, "Staff Responses to Frequently Asked Question Concerning Decommissioning of Nuclear Power Reactors," a draft report for comment dated April 1998.

This document, through a question-and-answer format, provides information to the public on decommissioning. The questions were taken from a variety of sources over the past several years, including written inquiries and questions asked at public meetings and during informal discussions with the NRC staff. The document was prepared in response to (1) the increase in the number of power reactors beginning the decommissioning process, (2) recent changes in the decommissioning regulations, and (3) a perceived lack of information available to members of the public on decommissioning. This document is being issued for public comment. As a

result of comments received from the members of the public, the final document may be modified.

The report contains information on the following topics as they relate to decommissioning: definition of decommissioning, decommissioning alternatives, decommissioning experience in the U.S. regulation of decommissioning, low-level waste storage and disposal of wastes associated with facility storage and decommissioning, high-level waste storage and disposal, license termination, hazards associated with decommissioning, financing, and public involvement during the decommissioning process.

Draft NUREG-1628 is available for inspection and copying for a fee at the NRC Public Document Room, 2120 L Street NW, (Lower Level), Washington, D.C. A free single copy of the draft NUREG-1628 may be requested by writing to U.S. Nuclear Regulatory Commission, Reproduction, and Distribution and Inventory Services Section, Washington, DC 20555-0001 or by faxing a request to 301-415-2289. For further information contact, John L. Minns, Division of Reactor Program Management, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-3166.

Dated at Rockville, Maryland, this 21st day of April 1998.
