#### **6. Rayburn Country Electric Cooperative, Inc.**

[Docket No. ER98-2717-000]

(Rayburn Electric), on April 28, 1998, tendered a rate change filing pursuant to Section 205 of the Federal Power Act and Section 35.13 of the regulations of the Federal Energy Regulatory Commission (FERC, or Commission). Rayburn Electric proposes to implement changes to its tariff which are revenue-neutral to its system wide rates approved by the Commission in 1995, and by the Public Utility Commission of Texas (PUCT) in 1994. Rayburn Electric indicates that its FERC-jurisdictional rate resulting from the proposed rate change will not

increase. Rayburn states that all wholesale customers that belong to the affected rate class consent to the proposed rate change. Rayburn Electric requests an effective date of June 1, 1998, or such other date as may be approved by the PUCT regarding Rayburn Electric's companion rate filing submitted to the PUCT, and requests any waivers or other authority deemed necessary by the FERC to permit its rate change to become effective as proposed.

Rayburn Electric proposes changes to its rates currently charged to its member cooperatives, as presently reflected in Rayburn Electric's Rate Schedule WP-2 on file with the FERC. The changes are proposed primarily due to new power supply arrangements that Rayburn Electric has entered into on behalf of its member cooperatives, which will result in substantial savings in purchased power costs. Although Rayburn Electric indicates that the new power supply arrangements affect only the portion of Rayburn Electric's load in the Electric Reliability Council of Texas, the savings under the new arrangements, according to Rayburn Electric, will benefit all of Rayburn Electric's load through the blended, system wide rates.

Rayburn Electric has served copies of this filing on each of the parties to the Agreement, its member/customers and the PUCT.
