Proposed Project

"National Sciences Foundation Proposal/Award Information—Grant Proposal Guide." The missions of the NSF are to increase the Nation's base of scientific and engineering knowledge

and strengthen its ability to support research in all areas of science and engineering; and promote innovative science and engineering education programs that can better prepare the Nation to meet the challenges of the future. The Foundation is committed to ensuring the Nation's supply of scientists, engineers, and science educators. In its role as leading Federal supporter of science and engineering, NSF also has an important role in national science policy planning.

Use of the Information

The regular submission of proposals to the Foundation is part of the collection of information and is used to help NSF fulfill this responsibility by initiating and supporting merit-selected research and education projects in all the scientific and engineering disciplines. NSF receives more than 30,000 proposals annually for new projects, and makes approximately 10,000 new awards. Support is made primarily through grants, contracts, and other agreements awarded to approximately 2,800 colleges, universities, academic consortia, nonprofit institutions, and small businesses. The awards are based mainly on evaluations of proposal merit submitted to the Foundation (proposal review is cleared under OMB Control No. 3145-0060).

The Foundation has a continuing commitment to monitor the operations of its information collection to identify and address excessive reporting burdens as well as to identify any real or apparent inequities based on gender, race, ethnicity, or disability of the proposed principal investigator(s)/project director(s) or the co-principal investigator(s)/co-project director(s).

Burden on the Public

The Foundation estimates that an average of 120 hours is expended for each proposal submitted. An estimated 38,000 proposals are expected during the course of one year. These figures compute to an estimated 4,560,000 public burden hours annually.

Dated: May 8, 1998.

Gail A. McHenry,

NSF Reports Clearance Officer.
