NUCLEAR REGULATORY COMMISSION

Draft Regulatory Guide; Issuance, Availability

The Nuclear Regulatory Commission has issued for public comment a draft of a guide planned for its Regulatory Guide Series. This series has been developed to describe and make available to the public such information as methods

acceptable to the NRC staff for implementing specific parts of the Commission's regulations, techniques used by the staff in evaluating specific problems or postulated accidents, and data needed by the staff in its review of applications for permits and licenses.

The draft guide, temporarily identified by its task number, DG-3013 (which should be mentioned in all correspondence concerning this draft guide), is titled "Nuclear Criticality Safety Standards for Fuels and Material Facilities." The guide is intended for Division 3, "Fuels and Materials Facilities." This draft guide is being developed to provide guidance on procedures for preventing nuclear criticality accidents in operations involving handling, processing, storing, and transporting special nuclear material at fuels and materials facilities. The guide will also endorse 13 standards on nuclear criticality safety that have been developed by the American National Standards Institute/American Nuclear Society.

The draft guide has not received complete staff review and does not represent an official NRC staff position. Public comments are being solicited on Draft Regulatory Guide DG-3013. Comments may be accompanied by additional relevant information or supporting data. Written comments may be submitted to the Rules and Directives Branch, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Copies of comments received may be examined at the NRC Public Document Room, 2120 L Street NW., Washington, DC. Comments will be most helpful if received by March 31, 1998.

You may also provide comments via the NRC's interactive rulemaking website through the NRC home page (<http://www.nrc.gov>). This site provides the availability to upload comments as files (any format), if your web browser supports that function. For information about the interactive rulemaking website, contact Ms. Carol Gallagher, (301) 415-5905; e-mail CAG@nrc.gov.

Although a time limit is given for comments on this draft guide, comments and suggestions in connection with items for inclusion in guides currently being developed or improvements in all published guides are encouraged at any time.

Regulatory guides are available for inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC. Requests for single copies of draft or final guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future draft guides in specific

divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Printing, Graphics and Distribution Branch; or by fax at (301) 415-5272. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

thereunder,² a proposed rule change to permit a FLEX equity option to have a term of five years in certain circumstances.

The proposed rule change was published for comment in the **Federal Register** on November 14, 1997.³ No comments were received on the proposal. This order approves the proposal.

II. Description

The CBOE is proposing to allow FLEX equity options⁴ traded on the Exchange to have a maturity beyond three years and up to five years when the longer term is requested by a submitting member and the FLEX Post Official⁵ determines that sufficient liquidity exists among Equity FLEX Qualified Market Makers. Currently, FLEX equity options, by operation of Rule 24A.4(a)(4)(i), are limited to a maturity of three years.

When the Exchange filed for permission to list and trade FLEX equity options⁶ it determined to limit the maturity of these options to three years because, unlike FLEX Index options which had been traded on the Exchange since February 1993 and which could have a maturity of up to five years, the Exchange was concerned that there would not be sufficient liquidity in many equity option classes to support series with a longer term to expiration. The CBOE represents, however, that since it has traded FLEX equity options, the Exchange has had numerous requests from broker-dealers to extend the maturity of FLEX equity options to five years. According to the Exchange, among the reasons the broker-dealer firms have been interested in seeking an extension in the allowable maturity is that such longer expiration FLEX equity options might be used to hedge a firm's issuance of long-term structured products linked to returns of an individual stock. The Rule would permit the longer term FLEX equity options (up to a maximum of five years) to be listed when requested by the submitting member if the FLEX Post

⁴ FLEX equity options are flexible exchange-traded options contracts which overlie equity securities. In addition, FLEX equity options provide investors with the ability to customize basic option features including size, expiration date, exercise style, and certain exercise prices.

⁵ Under CBOE Rule 24A.1(g), a FLEX Post Official is the Exchange employee designated pursuant to Rule 24A.12 to perform the FLEX post functions set forth in that rule.
