[Project No. 2596-002 New York]

#### **Rochester Gas & Electric Corporation; Notice Soliciting Applications**

May 29, 1998.

On November 10, 1997, Rochester Gas & Electric Corporation (RG&E), the existing licensee for the Station 160 Hydroelectric Project No. 2596, filed a letter withdrawing its pending application for subsequent license for the project. The original license for Project No. 2596 expired December 31, 1993, and the project is currently operating under an order requiring continued project operation issued on January 21, 1994.

On November 19, 1997, the Commission disallowed the withdrawal of the license application until after Commission review and approval of an application to surrender the license for the project. On March 31, 1998, RG&E filed an application to surrender the license for Project No. 2596.

The project is located on the Genesee River, in Livingston County, New York. The project consists of: (1) an existing reservoir with a surface area of 4.5 acres and a total storage volume of 480 acre-feet at the normal maximum surface elevation of 579.1 feet mean sea level (msl); (2) an existing dam, about 334 feet long, comprised of (a) an existing stone masonry wingwall; (b) an existing uncontrolled spillway section with a crest elevation of 579.1 feet msl, constructed of cut stone, with concrete footings, 257 feet long; and (c) an existing 23-foot-long spillway section controlled with timber gates; (3) an existing concrete and masonry powerhouse with a Francis turbine-generator unit rated at 340 kW; (4) an existing 18-foot-long concrete spillway; and (5) appurtenant equipment and facilities.

Pursuant to Section 16.20 of the Commission's Regulations, the deadline for filing an application for subsequent license and any competing license applications was December 31, 1991. There are no other pending applications for license for this project. Because the existing licensee has requested to withdraw its application and surrender

its license, the situation is similar to that contemplated by Section 16.25 of the Commission's Regulations, which applies when an existing licensee files a notice of intent to file a new license application and then fails to do so. In these circumstances, Section 16.25 of the Commission's Regulations, the Commission is soliciting applications from potential applicants other than the existing licensee.

A potential applicant that files a notice of intent within 90 days from the date of issuance of this notice: (1) may apply for a license under Part I of the Federal Power Act and Part 4 (except Section 4.38) of the Commission's regulations within 18 months of the date on which it files its notice; and (2) must comply with the requirements of Section 16.8 of the Commission's Regulations.

Pursuant to Section 16.19 of the Commission's Regulations, the licensee is required to make available certain information described in Section 16.7 of the Commission's regulations. Such information is available from the licensee at Rochester Gas & Electric Corporation, 89 East Avenue, Rochester, NY 14649.
