Proposed Amendment of Class E Airspace; Savannah, TN

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document proposes to amend Class E airspace at Savannah, TN. A Non-Directional Beacon (NDB) Runway (RWY) 19 Standard Instrument Approach Procedure (SIAP) has been developed for Savannah-Hardin County Airport. As a result, additional controlled airspace extending upward from 700 feet Above Ground Level (AGL) is needed to accommodate the SIAP and for Instrument Flight Rules

(IFR) operations at Savannah-Hardin County Airport. The Class E airspace would be increased from a 6.4 to a 6.5-mile radius of Savannah-Hardin County Airport and the width of the airspace each side of the 009° bearing from the Pinhook NDB extending from the 6.5-mile radius to 7 miles north of the NDB would be increased from 2.4 to 3.2 miles.

DATES: Comments must be received on or before July 27, 1998.

The Proposal

The FAA is considering an amendment to part 71 of the Federal Aviation Regulations (14 CFR Part 71) to amend Class E airspace at Savannah, TN. A Non-Directional Beacon (NDB) RWY 19 SIAP has been developed for Savannah-Hardin County Airport. Additional controlled airspace extending upward from 700 feet AGL is needed to accommodate the SIAP and for IFR operations at Savannah-Hardin County Airport. Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface are published in Paragraph 6005 of FAA Order 7400.9E dated September 10, 1997, and effective September 16, 1997, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

§ 71.1 [Amended]

The Proposal

The FAA is considering an amendment to part 71 of the Federal Aviation Regulations (14 CFR Part 71) to establish Class E airspace at Hartford, KY. GPS RWY's 3–21 and a VOR/DME A SIAP's have been developed for Ohio County Airport. The operating status of the airport will change from VFR to include IFR operations concurrent with the publication of the SIAP. Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface republished in Paragraph 6005 of FAA Order 7400.9E dated September 10, 1997, and effective September 16, 1997, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a
