July 14, 1998.

Rule 2010 of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure provides that, to eliminate unnecessary expense or improve administrative efficiency, the Secretary may establish a Restricted Service List for a particular phase or issue in a proceeding.¹ The Restricted Service List should contain the names of persons on the service list who, in the judgment of the decisional authority establishing the list, are active participants with respect to the phase or issue in the proceeding for which the list is established.

The Commission staff is consulting with the New Hampshire and Vermont State Historic Preservation Officers (hereinafter, "SHPOs") and the Advisory Council on Historic Preservation (hereinafter, "Advisory Council") pursuant to the Advisory Council's regulations, 36 CFR Part 800, implementing Section 106 of the National Historic Preservation Act, as amended, (16 U.S.C. Section 470 f), to prepare a Programmatic Agreement for managing properties included in, or eligible for inclusion in, the National Register of Historic Places at Project No. 2077.

The Programmatic Agreement, when executed by the Commission, the SHPOs, and the Advisory Council, would satisfy the Commission's Section 106 responsibilities for all individual undertakings carried out in accordance with the license until the license expires or is terminated (36 CFR 800.13[e]). The Commission's responsibilities pursuant to Section 106 for the above project would be fulfilled through the Programmatic Agreement, which the Commission proposes to draft in consultation with certain parties listed below. The executed Programmatic Agreement would be incorporated into any Order issuing a license.

New England Power Company, as prospective licensee for Project No. 2077, is invited to participate in consultations to develop the

Programmatic Agreement and to sign as a concurring party to the Programmatic Agreement.

Title: Correction of Misreported Chemical Substances on the TSCA Inventory

Abstract: Section 8(b) of the Toxic Substances Control Act (TSCA) requires EPA to compile and keep current an Inventory of Chemical Substances in Commerce, which is a listing of chemical substances manufactured, imported, and processed for commercial purposes in the United States. The purpose of the Inventory is to define, for the purpose of TSCA, what chemical substances exist in U.S. commerce. Since the Inventory thereby performs a regulatory function by distinguishing between existing chemicals and new chemicals, which TSCA regulates in different ways, it is imperative that the Inventory be accurate.

However, from time to time, EPA or respondents discover that substances have been incorrectly described by reporting companies. Reported substances have been unintentionally misidentified as a result of simple typographical errors, the misidentification of substances, or the lack of sufficient technical or analytical capabilities to characterize fully the exact chemical substances. EPA has developed guidelines (45 FR 50544, July 29, 1980) under which incorrectly described substances listed in the Inventory can be corrected.

This information collection request pertains to the use of the TSCA Chemical Substance Inventory Reporting Form C (EPA Form 7710-3C), which is used by the chemical industry in submitting requests to EPA to correct misreported chemical identities of substances listed on the Inventory. The correction mechanism ensures the accuracy of the Inventory without imposing an unreasonable burden on the chemical industry. Without the Inventory correction mechanism, a company that submitted incorrect information would have to file a premanufacture notification (PMN) under TSCA section 5 to place the correct chemical substance on the Inventory whenever the previously reported substance is found to be misidentified. This would impose a much greater burden on both EPA and the submitter than the existing correction mechanism.

Responses to the collection of information are voluntary.

Burden Statement: The annual public reporting burden for this collection of information is estimated to average 1.0 hour per response for an estimated 200 respondents making one or more submissions of information. These estimates include the time needed to review instructions; develop, acquire, install and utilize technology and systems for the purposes of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information. No person is required to respond to a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for these regulations are displayed in 40 CFR part 9.

Respondents/Affected Entities: Entities potentially affected by this action are persons who manufacture, process or import chemical substances in the United States.

Estimated No. of Respondents: 200.

Estimated Total Annual Burden on Respondents: 200 hours.

Frequency of Collection: On occasion.

Changes in Burden Estimates:

There is no change in the total estimated respondent burden as compared with that identified in the information collection request most recently approved by OMB.

According to the procedures prescribed in 5 CFR 1320.12, EPA has submitted this ICR to OMB for review and approval. Any comments related to the renewal of this ICR should be submitted within 30 days of this document, as described above.

Dated: July 14, 1998.

Acting Director, Regulatory Information Division.
